It's Not a Home
Until It's Planted

For the beautification of your home grounds you are invited to consult our experienced staff of nurserymen who are at your service to give information regarding desirable plants, trees and shrubs, together with cost estimates.

If you are contemplating planting an orchard or only a few trees for your own use, we offer you the advantage of our experience of thirty years in this section, concerning best varieties and care of stock.

Our methods of digging and packing assure safe delivery of your order

Announcement

SPRING, 1926, again finds it necessary that we enlarge our store and office quarters at the corner of Sixth and Westlake, Times Square, to accommodate the increasing trade with which we have been favored.

It is our aim to continue to merit the confidence of a discriminating patronage appreciating reliable seeds and nursery stock as true economy. We shall be pleased to receive at any time suggestions that may assist us in further improving service to our customers.

MALMO AND COMPANY,

Charles Malmo
Pres.

MAIL ORDERS

For those who are unable to call at our sales yard or nursery to make personal selection of the stock desired, we offer the service of our mail order department. I's staff of experienced nurserymen and seedsmen, will make the selection for you with the same care as if acting under your immediate personal supervision. We realize that the satisfied customer is the essential factor in the business growth that has made us the largest nursery mail order establishment in the Northwest.

HOW TO ORDER—Kindly fill out order sheet carefully, sending in same as soon as convenient after receiving this catalog. Nursery Stock, Seeds and Bulbs should have the desired quantity written distinctly in the column provided for that purpose, with price after each item.

Packing and Shipment—We are especially equipped for packing Nursery Stock and Seeds for long distance shipping. We have had thirty years experience in handling goods of this class and pack to insure arrival at destination in good condition regardless of distance.

Freight—On Nursery Stock orders of \$10.00 or more we prepay freight charges to any point within 50 miles of Seattle. On orders for less than \$10.00 add enough to cover transportation.

Parcel Post. Parcels weighing 8 oz. or less, containing seeds, cuttings, bulbs, roots, scions and plants, 1 cent for each 2 oz. or fraction thereof, regardless of distance.

Other parcels of fourth class matter are chargeable according to distance zone as follows:

Domestic Parcel Post Rates				For First Pound Allow	For Each Additional Pound Add
Within the U. S. and Possessions, zones from Seattle, Wash.					
First Zone	within	50	miles	\$0.07	\$0.01

Third	"	150 to 300	"	.08	.02
Fourth	"	300 to 600	"	.09	.04
Fifth	"	600 to 1000	"	.10	.06
Sixth	"	1000 to 1400	"	.11	.08
Seventh	"	1400 to 1800	"	.13	.10
Eighth	"	over 1800 miles		.14	.12

The limit of size of a package that will be accepted by parcel post is 84 inches in length and girth combined. Larger packages must be forwarded by express or freight.

TERMS—Cash with order. Send remittances by Money Order, Draft or Registered Letter.

We exercise the greatest care to furnish seeds, bulbs, plants, shrubs and trees that are pure and reliable, but owing to the various conditions of climate, soil and cultivation attending success, we do not warrant in any way, express or implied, the description, purity, productiveness or any other matter of any seeds, bulbs, plants, shrubs or trees sold by us, and we will not be in any way responsible for the crop. If the purchaser does not accept these goods on above terms, no sale is made thereof and the goods must be returned to us at once and the money will be refunded.

References—The National City Bank or any bank or wholesale house in Seattle.

LOCAL CUSTOMERS

You may order by telephone. Shopping from your home is facilitated by our telephone order department. It provides you with a quick and efficient method of placing your order which will receive the same careful and prompt attention by our experienced nurserymen and seedsmen as if you were present.

SELECTED NURSERY STOCK

WHEN AND HOW TO PLANT

Special attention is called to the superior quality of Nursery stock which we supply. Our experience in growing and transplanting Nursery stock in the Puget Sound climate covers nearly thirty years. This climate is particularly well adapted to a wide range of varieties of Nursery stock that heretofore have been successfully grown only in certain parts of Europe. The varieties range from the hardiest to semi-tropical plants. Evergreens thrive especially well in our climate, obtaining better growth and color than in any other part of the world.

Evergreens may be successfully transplanted the year round providing sufficient water is used, but the best time to transplant is early in the fall or late in the spring. Ornamental deciduous trees and shrubs and all kinds of fruit trees and berry bushes may be set out any time after the rainy season commences (generally some time in November) until the first of April. The early

planting, however, is much preferable as it gives the trees and plants a chance to establish a new root system before the dry season commences. Plants or trees of any size may be transplanted successfully providing they have been properly cared for in the Nursery. Our stock is transplanted every two or three years, thereby producing a root system on the Evergreens that will hold firmly to a ball of soil, and a mass of fibre roots on the deciduous trees, insuring full success in transplanting.

We make a specialty of large size fruit trees in varieties best adapted to this climate. These are transplanted every year in our nursery to insure a perfect root system and can be set out by the planter as safely as smaller trees. Many of these trees are highly ornamental, producing fruit as well as beautifying the home. Our stock is large and complete. We invite requests for estimates on planting of orchards.

GUIDE FOR THE PLANTING AND CARE OF FRUIT TREES

ORCHARD AND GARDEN

The State of Washington ranks among the first in fruit production. With proper care given to varieties suitable for Western Washington, fruit may be as profitably grown in the Puget Sound section as in the celebrated fruit districts of Eastern Washington.

The Puget Sound climate is adapted to the growing of both sweet and sour cherries, pears and many varieties of apples, including Yellow Transparent and Gravenstein. Western Washington is unexcelled in its production of prunes and plums.

Where one has not sufficient space for an orchard, a few fruit trees in the garden or back yard may be made to yield a high return for the space occupied. Such planting need not exclude the vegetable garden, which may be planted be-

tween the trees, and the soil made, with the addition of proper fertilizers, to accomplish double duty production.

The first requisite for the successful growing of trees is proper preparation of the soil. The ground should be plowed very deeply and thoroughly as the roots will soon gather food from the whole orchard area.

PLANTING

Trees should be heeled in only in a cool shady place. If the trees have, for any reason, before planting, become dried out, they should be buried, tops and all, in a trench which should be filled with water every day for three or four days, or at least soaked in water for a few hours, until the bark is restored to a healthy, plump condition.

GUIDE FOR THE PLANTING AND CARE OF FRUIT TREES—Continued

The holes should be staked out and dug before exposing the trees. The roots must be protected carefully from the sun and drying winds, as either will very soon wither up the fibrous roots which are necessary for quick and vigorous growth. The holes should be dug from six to twelve inches larger around than the roots of the trees, to allow for filling in a few inches of loose soil, on top of which the tree should be planted to the depth it formerly stood in the nursery row.

PRUNING

The first object is to establish a balance between the top and the roots, cutting off all bruised and broken branches. The second is to shape the top so as to make a good foundation for a well-shaped tree. Of course, this cannot all be done at one time. It is necessary each year to look after the shape of the tops, selecting such branches as are most desirable for the building of the tree; then cutting off the surplus. This applies especially to fruit trees. For apple trees, it is a general rule to cut back each year one-half of the previous season's growth. Shade trees and other ornamental stock, including shrubs and evergreens, are pruned only for desired shape.

The best time for pruning fruit trees, in the Puget Sound country, is the month of January, and not later than the end of February. On the east side of the Cascades, it may be done one month later. All winter pruning and spraying should be done at the time the trees are dormant.

SPRAYING

The spraying of fruit trees has proven to be an absolute necessity. Lime and sulphur is effective as a dormant spray to eliminate all pests. Generally the first summer spraying of fruit trees is applied by the time the blossoms are dropping, being followed by a second and third spraying, according to the pest to be eliminated. See spraying table, page 113.

Fig. 2

METHODS OF PLANTING

There are two methods of planting, commonly followed throughout the Fruit Belt, namely, the "Square" method, and the "Hexagonal" or "Triangular" method. Each has its respective merits, and the illustrations given above will explain themselves. Figure 1 sets for the "Square" method, and Figure 2 the "Hexagonal." In each figure the trees are thirty feet apart each way. In the "Square" method of planting, the rows are thirty feet apart in each direction, while in the "Triangular" method, the rows in one direction are only twenty-seven and one-half feet apart, thus allowing a few more trees to be planted to the acre.

GRAPE CULTURE

ISLAND BELLE GRAPES
SOUTHERN PUGET SOUND VINEYARDS,
MASON COUNTY, WASHINGTON.

No other fruit-bearing plant responds so generously to attention as does the grape. It adjusts itself to many conditions and is used for a great variety of purposes. For these reasons its culture has always kept pace with civilization. Grapes are often grown on soils too poor for other purposes, or steep hillsides where no other fruit can be grown, nevertheless producing crops ranging from $1\frac{1}{2}$ to 22 tons of fruit to the acre. The treatment given vines during the first years of their growth largely determines the profit and pleasure to be derived from them.

PLANTING

Plant in rows about 8 feet apart each way. The first summer the plants may be left on the ground, but the second year they should either be staked, as shown in figure 1, or may be tied directly to a wire trellis. A good strong stake is

Fig. 1—Vines headed back for the different systems of training: **A**, the spur and Fan Systems; **B**, the Four-arm renewal system; **C**, the Two-arm Kniffin or Umbrella Overhead System.

sufficient to support the vines until the fourth year, but from that time a trellis is preferable. Grapes will do well tacked up against an out-building, barn or garage and preferably on the south side of the building. Before planting, the roots should be cut back to 3, 4 or 6 inches, according to the size of the plants. The top may be cut back to leave 2 or 3 eyes.

WINTER PRUNING

The vine, when permitted to do so, bears its fruit on young shoots from the previous year's wood growth. Therefore, the cardinal point underlying all correct pruning, be the method of training what it may, is first to grow and shape, or adjust, the main body or permanent part of the

Fig. 2—Diagram of a grapevine, showing the different parts and illustrating the Four-cane System of training: **A**, arms or ramifications of the branches usually of wood two or more years old; **B**, branches which are of mature wood, being several years old; **C**, canes, called shoots when green and canes when mature; **L**, laterals, the secondary shoots of a cane; **S**, suckers, the shoots starting below the ground from the main body; **T**, trunk, the stem or main body of the vine; **W, S**, water sprouts, the shoots which start above the ground from wood older than one year; **1, 2, 3, 4**, 2-year-old arms.

Fig. 3—A vine pruned according to the Four-cane Kniffin System; **C**, canes called shoots when green and canes when mature; **Sp.**, spurs, canes cut back to one to four eyes; **T**, trunk, the stem or main body of the vine; **a, b, c, d**, arms succeeding those shown at their 2-year-old stage in Fig. 2 at 1, 2, 3, 4.

vine to the method of training desired. After this has been done the growth of the fruit-bearing part of the plant should be so pruned that it will be renewed from year to year, never allowing the plant to overbear but making it bear to its full capacity. The second year (in the winter when dormant) the plants should be trimmed to one stem, selecting the strongest shoot. The illustrations A, B and C in Fig. 1 represent the plants after the second or third year's growth, trimmed so as to have two or more canes growing from the main stems. Out of these canes the head or crown is to be formed and from them the growth of the vine is to be renewed from year to year, according to the method recommended by the United States Department of Agriculture. The manner of renewing the growth on the body of the vine so as to leave the body permanent is illustrated in Figs. 2, 3 and 4, which show the vine before and after pruning.

SUMMER PRUNING

Where the vine was cut back to two buds only one should be allowed to grow. All other young shoots should be removed, preferably when quite young and not more than 3 or 4 inches long. This concentrates all the force and growth of the plant into the cane, which is to become the trunk of the vine. The shoot left to grow must be kept carefully tied to the stake to cause it to grow erect and also to protect it from being broken. When a shoot has grown to a foot above where it is intended to head it should be topped slightly above where the head is to be, causing laterals to grow where they are desired. Only such shoots should be allowed to grow as are needed for shaping the vine for the following season (see Fig. 1). All suckers and water sprouts should be promptly removed. After as much fruit has set as the vine is capable of ripening all the other blossoms and growth as well as surplus leaves should be constantly removed.

METHODS OF TRAINING GRAPES

Success in growing grapes depends greatly upon the method of training, of which there are many. Besides growing the grapes tied to stakes, fences and outbuildings, there are possibly a dozen other ways. However, the most recent and

Fig. 4—A, A pruned vine; B, an unpruned vine; showing the method of training by the umbrella system.

successful methods are the Four-Cane Kniffin System, and the Two-Cane Kniffin or Umbrella Overhead System (Fig. 4). The Fan System is possibly well known, being old, but is practically discarded at this time.

THE FOUR-CANE KNIFFIN SYSTEM

On the trunk of the vine at the lower wire of a two-wire trellis, about 30 inches from the ground, two canes and two spurs are left of last year's growth, and two more canes and spurs are left at the top wire, about 56 inches from the ground. These canes, which are tied to the wire on each side of the vine, produce fruiting shoots which are allowed to hang down or droop as seen in Fig. 2. The same vine as it appears after pruning at the end of the fourth year when trained according to this Four-Cane Kniffin System is shown in Fig. 3.

THE TWO-CANE KNIFFIN OR UMBRELLA OVERHEAD SYSTEM

A system very generally used in the training of American vines, known as the Umbrella Overhead or Two-Cane Kniffin System, differs from the foregoing in that no canes or spurs are left at the lower wire, the trunk of the vine extending directly to the top wire, where the growth is annually cut back to two canes and two spurs, one on each side, which are fastened to the top wire (Fig. 4). It is best to tie the trunk to both the upper and lower wires to prevent violent whipping of the hanging shoots. Figure 4, A and B, shows a vine, trained according to this system, before and after pruning at the end of the fourth year.

This system is really an improvement on the Four-Cane Kniffin System. The renewal of the fruit-bearing wood to one head makes the vine more easily pruned, leaves less old wood, and results in cleaner and better ventilated vines, and we believe it is the method best adaptable to the Puget Sound region.

A basket of Island Belles grown at Grapeview, Wash.

FRUIT TREES

(Ask for Prices in Large Quantities)

APPLES

PRICES.

One year or light two year old.

4 to 6 feet:

Each, \$0.75; 10 for \$7.00; 100 for \$60.00.

Lighter grade:

Each, \$0.60; 10 for \$5.00; 100 for \$45.00.

Large size two year old.

Each, \$1.00; 10 for \$9.00; 100 for \$75.00.

Selected heavy two and three year old.

Each, \$1.25; 10 for \$11.00; 100 for \$100.00.

Big three year old, specimen trees.

Each, \$1.50 to \$2.00.

SUMMER AND FALL

Red Astrachan. Deep crimson; large.

Yellow Transparent. Yellow; very early; best quality.

Duchess of Oldenburg. Red and yellow streaked.

Fameuse (Snow). Deep crimson streaked. Flesh snowy white.

Gravenstein. Bright red and yellow. One of the best for this climate.

Red Gravenstein. (New.) Bright red. Same good quality as Gravenstein, a little later and better keeper.

Waxen. Rich yellow. Crisp, tender and juicy.

Wealthy. Yellow shaded with deep red.

Yellow Bellflower. Rich yellow, highly flavored.

WINTER

Arkansas Black. Rich flavor. Very good keeper. Strong, healthy grower.

Delicious. Thrifty grower. Quality and flavor unsurpassed. Very sweet.

Grimes Golden. Golden yellow. High quality.

Jonathan. Red. Fine for table or market.

King of Tomkins Co. Yellowish shaded with red.

Mammoth Black Twig. Red. Large. Late keeper.

Northern Spy. Greenish, brown ribbed. Good keeper. Fine quality.

Oregon Red Winter. Large red. Called Winter Gravenstein. Good keeper.

R. I. Greening. Greenish yellow. Rich and tender.

Rome Beauty. Yellow with red. Aromatic taste.

Spitzenburg Esopus. Splashed red.

Stayman Winesap. Improved Winesap.

Wagener. Deep red. Flesh firm, sub-acid. Early and continuous bearer.

Winesap. Dark red. Medium size, excellent. Late keeper.

Winter Banana. Golden yellow, shaded red. Large, excellent flavor.

Yellow Newtown Pippin. Fine flavor. One of best keepers.

CRAB APPLES

Prices Same as Apples

Florence. Large red.

Hyslop. Dark crimson.

Red Siberian. Red cheek on yellow ground.

Transcendent. Red cheek.

Yellow Siberian. Small, golden yellow.

One Year Old Montmorency Cherry

CHERRIES

PRICES.

One year or light two year old.

6 to 8 feet, extra heavy (sweet cherries only).

Each, \$1.50; 10 for \$14.00; 100 for \$125.00.

4 to 6 feet:

Each, \$1.25; 10 for \$11.00; 100 for \$100.00.

Lighter grade:

Each, \$1.00; 10 for \$9.00; 100 for \$75.00.

Large size two and three year old.

Each, \$2.00; 10 for \$17.50; 100 for \$150.00.

Extra large specimen trees.

Each, \$2.50 to \$3.50.

Ask for prices on quantity.

SWEET

Bing. Very large. Black with solid meat.

Black Republican. Black, medium size.

Black Tartarian. Medium black. Very early.

Lambert. Very large, dark red. Fine shipper.

Royal Ann. Light red on yellow ground.

SOUR CHERRIES

Early Richmond (Kentish). Red. Medium size.
 English Morello. Medium to large. Blackish-red.
 Late Duke. Very large. Dark red.
 May Duke. Medium size. Dark red.
 Montmorency. Large. Bright red, of semi-dwarf growth. All branched trees.
 Extra large selected two year: 4 to 6 ft.
 Each, \$1.50; 10 for \$14.00; 100 for \$125.00.
 Selected one and two year old: 3 to 4 feet:
 Each, \$1.00; 10 for \$9.50; 100 for \$90.00.
 2½ to 3 feet:
 Each, \$0.80; 10 for \$7.50; 100 for \$65.00.

PRICES.**PEARS**

One year or light two year old.
 4 to 6 feet:
 Each, \$1.00; 10 for \$9.00; 100 for \$75.00.
 Lighter grade:
 Each, \$0.75; 10 for \$7.00; 100 for \$60.00.
 Large size two and three year old.
 Each, \$1.25; 10 for \$11.50; 100 for \$100.00.

English Walnut. Grafted, 4 to 6 ft., \$2.50 to \$3.50.
Japan Walnut. 2 to 3 ft., \$1.00 to \$1.50.
Butternut or White Walnut. Large, long nut; bears earlier than English. (Same price as Franquette.)

SMALL FRUITS

Ask for prices on quantity

BLACKBERRIES

Cory Thornless Blackberry. Identical with the Himalaya Giant except entirely thornless. Four of the strongest vines should be trained on wires, pruned annually and no suckers allowed to grow at base of plant.

Big plants, 50c; doz., \$5.00; 100 for \$25.00.

Large, well rooted tips, 25c each; doz., \$2.50 100 for \$15.00.

Evergreen. Each, 15c; doz., \$1.50; per 100, \$8.00.

Himalaya Giant or Everbearing. Each, 20c; doz., \$2.00; \$12.00 per 100; \$100 per 1000.

Extra large plants, each, 35c to 50c.

Kittatinny. Each, 20c; doz., \$2.00; \$12.00 per 100.

Lawton. Each, 20c; doz., \$2.00; \$12.00 per 100.

New Mammoth. Each, 25c; doz., \$2.00; \$15.00 per 100.

RASPBERRIES

Cumberland. Red. Each, 15c; doz., \$1.50; \$10.00 per 100.

Cuthbert. Red. Doz., 75c; \$3.50 per 100; \$15.00 per 1000.

Gregg. Blackcap. Each, 20c; doz., \$2.00.

Golden Queen. Yellow. Each, 15c; doz., \$1.50; \$10.00 per 100.

Plum Farmer. Blackcap. Each, 20c; doz., \$2.00; \$12.00 per 100.

St. Regis. Everbearing. Each, 15c; doz., \$1.50; \$10.00 per 100.

LOGANBERRIES

Strong Rooted Tips. Ready for planting in March and April. Each, 10c; doz., \$1.00; \$5.00 per 100; \$45.00 per 1000.

Year Old Plants. Each, 15c; doz., \$1.50; \$10.00 per 100.

Large Two Year Old Plants. Each, 25c; doz., \$2.50; \$15.00 per 100.

PHENOMENAL BERRIES

Strong Rooted Tips. Each, 20c; doz., \$2.00; \$15.00 per 100.

Year Old Plants. Each, 35c; doz., \$3.50.

Large Two Year Old Plants. Each, 50c; \$5.00 per doz.

CURRENTS

One year old; each, 15c; doz., \$1.50; \$10.00 per 100.

Small plants; doz., \$1.00; \$5.00 per 100; \$35.00 per 1000.

Large one year, or two year old; each, 25c; doz., \$2.50; \$15.00 per 100.

Large two and three year old; each, 35c; doz., \$3.50; \$25.00 per 100.

Extra large selected plants. Each, 50c.

Cherry. Red.

Pomona. Large red.

Fay's Prolific. Red.

Red Cross. Red.

Perfection. Red.

White Grape. White.

GOOSEBERRIES

Oregon Champion. Strong, well rooted plants.

Each, 15c; doz., \$1.50; \$9.00 per 100.

Large one, or light two-year-old. Each, 25c; doz., \$2.50.

Extra large plants. Each, 50c; doz., \$5.00.

Pearl. Yellowish green. Each, 50c; doz., \$5.00.

Poorman. Large yellow. Each, 50c; doz., \$5.00.

Red Jacket (Jossilyn). Large prolific. Each, 35c; doz., \$3.50.

Extra large plants. Each, 50c; doz., \$5.00.

STRAWBERRIES

Etterburg No. 121. The berry with the wild strawberry flavor. Fruit very large, extra firm, dark red, produced on strong stiff straws carried well off the ground. Fast becoming the leading variety for market and canning.

Doz., 35c; \$1.75 per 100; \$15.00 per 1000.

	Doz.	100	1000
Clark's Seedling	-----	\$.35	\$1.50 \$12.00

GRAPES

For Cultural Directions see pages 4 and 5 of this Planting Guide.

Good strong plants. Each, 35c; doz., \$3.50.

Extra large two and three year old plants. Each, 50c; doz., \$5.00.

Prices as above except where noted.

Agawam. Pink, very large and sweet.

Brighton. Pink, medium size, very early.

Campbell's Early. Black, very large.

Concord. Black, 1 year, doz., \$2.00; per 100, \$12.00.

Delaware. Light red, very early.

Moore's Early. Large, blue. Very early.

Niagara. Yellow, large, sweet. The earliest white.

Vergennes. Pink; sweet, very hardy, medium to small.

Island Belle Grapes

ISLAND BELLE. Very early, large, blue. A local favorite produced on Puget Sound. (See pp. 4-5.) Selected two and three year old:

Each, 60c; doz., \$6.00; per 100, \$50.00.

One year old and light two year old:

Each, 35c; doz., \$3.50; per 100, \$25.00.

Lighter grade one year old:

Per 100, \$20.00.

VEGETABLE PLANTS

If larger quantities are wanted ask for special quotations.

CABBAGE

Early Jersey Wakefield, Danish Ball Head, Late Flat Dutch.

Doz., 15c; 2 doz., 25c; 100, \$1.00; 1000, \$7.50.

By mail or express prepaid add 10c for 1st dozen and 5c for each additional dozen, 35c per 100, \$1.50 per 1000.

CAULIFLOWER

Early Snowball, Danish Dry Weather.

Doz., 25c; 100, \$1.50; 1,000, \$13.50.

By mail or express prepaid add 10c for 1st dozen and 5c for each additional dozen, add 35c per 100 and \$1.50 per 1000.

ASPARAGUS

For Cultural Directions see Seed Section.

Write for prices on quantity.

Conover's Colossal. 35c per doz., \$1.75 per 100.

Large plants, per doz., 50c; \$2.50 per 100.

By mail or express prepaid add 15c for 1st dozen and 10c for each additional dozen, 75c per 100.

CHIVES

Clumps, 20c; doz., \$1.75.

By mail or express prepaid add 10c for each and 75c per dozen.

CELERY

White Plume, Golden Self Blanching.

Doz., 20c; 100, \$1.50; 1,000, \$10.00.

By mail or express prepaid add 10c for 1st dozen and 5c for each additional dozen, 35c per 100, \$1.50 per 1000.

HORSERADISH

Roots. 25c per doz., \$1.50 per 100.

By mail or express prepaid add 10c for 1st dozen and 5c for each additional dozen, 50c per 100.

Crowns. 50c per doz.

RHUBARB OR PIE PLANT

Mammoth. Divided roots, 25c each; \$2.50 doz.

Large clumps, 35c, 50c and \$1.00.

Wagner's Crimson Giant. Divided roots, each, 25c; \$2.50 doz.

Divided Roots by mail or express prepaid add 10c each, dozen 50c.

TOMATOES

Spark's Earliana, Dwarf Champion, John Baer. Doz., 25c; 100, \$1.75; 1,000, \$15.00.

By mail or express prepaid add 10c for 1st dozen and 5c for each additional dozen, 35c per 100, \$1.50 per 1000.

Plants from pots, each, 10c; doz., \$1.00.

Big plants from pots in bud or ready to bloom, each, 25c; doz., \$2.50.

A Landscape Setting for Your Home

THE HOME is not quite complete, not wholly inviting, without the soft varying frame of an evergreen setting about the building and grounds. And it is an investment which increases in both intrinsic and beauty value with the passing of years.

The artist who conceives and paints a masterpiece has no greater problem than he who creates and effects a beautiful landscape setting for the home. Both require specialized knowledge.

The landscape department of MALMO & COMPANY is comprised of men skilled in creating a harmonious ensemble—being experienced in designing, expert in the proper method of planting and versed in the knowledge of horticulture.

This service is extended to our patrons to facilitate the effective planting and care of MALMO superior ornamentals, thereby assuring maximum effect with minimum expenditure.

The House, before planting—

The Home, after planting—

A Planting of Ornamentals from our Nurseries.
Residence of Mr. and Mrs. Frederick C. Johnstone, 1044 East Galer Street, Seattle

Court House Grounds at South Bend, Wash., Showing a Group of Hybrid Rhododendrons Transplanted in Full Bloom

Know the Joy of Gardening

RARE PLEASURE for the whole family in the home-yard replete with trees, shrubs, flowers—fresh fruits and crisp vegetables. And gardening, so conducive to bouyant health, to sheer happiness, is a joy never quite finished, but always opening new vistas of delight.

OUR part in this gardening pleasure of yours is furnishing you reliable plants and seeds, potential in bloom and fruitage—and the benefit of our thirty-three years of experience. Yours is the privilege of selecting, planting, caring and garnering—most delightful of avocations!

A Section of Rhododendron Field in our nursery at Georgetown—over 100,000 blossoms

Large Evergreens Being Dug and Packed for Delivery at Our Nurseries

"Evergreens from the Evergreen State"

IT IS OUR AIM to propagate and furnish only high grade dependable nursery stock.

Up to a short time ago the greater amount of ornamental stock used in the United States had been imported from France, Holland, Japan, and other foreign countries where it could be produced at lower labor costs. The recent Federal embargo against importation will necessitate the production of all such nursery stock in this country. No place in the United States is so favored for growing evergreens as is the Puget Sound region, the humid temperate climate of this section affording all the

requirements of the most productive areas of foreign countries. The extremes of temperature in the eastern and middlewestern states preclude the growing of young stock of many varieties except in greenhouses at great expense, thus giving Puget Sound a natural advantage in producing evergreen ornamentals for country-wide distribution, the local advantages in growing far outweighing the freight differentials on young stock shipped to Eastern markets.

Over Half a Million Young Evergreens in the Propagating Houses at Our Nurseries in Georgetown

A Section of a Field of Cypress Erecta Viridis at Our Nurseries, a Variety Fast Growing in Public Favor

The production of nursery stock, unlike most other produce, requires planning several years in advance to supply future demand. It involves continuous propagation through seeds, cuttings, grafts, layers, etc., in season, and requires the carrying of a large stock of hundreds of varieties in various ages and sizes to insure a continuity of supply of mature stock as fast as the same is sold each year. Toward this end we have been adding land, stock, and equipment in developing one of the most complete nursery establishments in the country to render the largest measure of service through the furnishing of reliable products abreast the latest improvements in horticulture.

A Portion of the Georgetown Nursery on Ellis Avenue

Such Evergreens as Are in Large Demand for Creating Immediate Landscape Effects

SPECIAL OFFER NO. 1—ALL EVERGREEN BASE PLANTING \$59.00

This planting has six varieties that berry and bloom in winter and seven that bloom in spring and summer. All are mature plants and evergreen. For further descriptions see Ornamental Section.

HEATHER

This class of popular evergreen plants embraces all of the *Ericas*, *Heaths*, *Callunas*, *Daboecias*, etc. They are distinctive for their tiny bell-like blossoms borne in great profusion. The fine, lacey foliage, which in most varieties is of a lively green color, makes them, even without their bloom, very desirable in any planting. For mass

effect they are excellent and are also valuable for the foreground in groups as they are of low or medium habit. The tall growing variety, "Triumphans," can be used as background or accent. By using an assortment of varieties bloom can be had throughout the whole year. Mediterranean hybrid blooms through freezing weather or under snow. The Heather is destined to become one of the most popular of shrubs.

We make a specialty of hardy heather and have to offer over 25,000 in leading varieties.

- Heather, Bell*. (*Menziesia polifolia* or *Daboecia polifolia*.) Glossy, dark green leaves. Flowers on long terminal racemes, blooming all summer until frost; shading from purple to rose lavender.

Oak, Live . Thick, waxy, evergreen leaves.		
3 to 5 ft.-----	5.00	\$3.50 to

**PERNETTYA**

Pernettya. A new evergreen novelty of dense, compact habit, doing well in any location but preferring a rich, humus soil. The leaves are small, dark, glossy green; white flowers in spring. Most valuable for its attractively colored and profusely produced berries in fall and winter. Moderately dwarf growing and can be trimmed compactly.

Pernettya alba. White berries.

Pernettya atropurpurea. Bright red berried.

Pernettya lilacena. Lilac berries.

Pernettya nigra. Very dark red berries.

Pernettya rosea. Pink berries.

Well berried, trimmed plants.

1 ft.----- (doz., \$25.00) 2.50

1½ to 2 ft.----- \$3.50 to 4.50

Pittosporum Tobira. White or yellowish, fragrant flowers; winter blooming.

12 to 18 in. wide----- 2.50

18 to 24 in. wide----- 3.50

Privet (*Ligustrum*), amurense (Amoor River, or Chinese Privet). Small roundish leaves; white flowers in summer, and covered with small black berries in winter.

Small plants for hedges, per 100----- 10.00

Specimen plants for setting out individually or in group, each----- \$0.50 to 1.00

Extra large plants----- \$1.50 to 2.50

BROAD LEAVED EVERGREENS—Continued

Veronica buxifolia. Dwarf; bright green foliage; excellent for borders.		
Small plants (doz., \$1.50)	.15	
Clumps (doz., \$2.50)	.25	
Large clumps	\$0.50 to 1.00	

Veronica Cupressoides. (Cypress Veronica). A compact Cypress-leaved evergreen of bluish-green color retaining its compact globe shape without trimming. The plant produces a large vigorous root system and it is dug with a large ball of earth.	Each
8 to 10 in.	.75
12 to 14 in.	1.00
14 to 18 in. (doz., \$15.00)	1.50
18 to 24 in. (doz., \$17.50)	2.00
2 to 3 ft. (doz., \$25.00)	2.50
Veronica hectori. Golden	1.50
Veronica incana glauca. Dwarf. Silver blue foliage; flowers violet blue. Good for rocky, banks, or border. Price same as V. buxifolia.	
Veronica latifolia (or thymifolia). Dwarf, but growing a little larger than V. buxifolia, and with smaller leaves. A bright, attractive plant (per doz., \$2.50)	.25
(per doz., \$3.50)	.35
Larger plants \$0.50, \$0.75, \$1.00,	1.50
Veronica selaginelloides. Very dwarf and compact; creeping or tufted. Can be used for border, but to best advantage for rockeries (per doz., \$2.50; per 100, \$15.00)	.25
Veronica Traversii. Tall, attaining 3 to 4 ft. (\$5.00 to \$7.50 doz.)	.75
Large plants \$1.00 to	1.50
Vinca minor. Common periwinkle. Dark glossy leaves, pale blue flowers. For rockeries, covering banks, or hanging over cement walls. Will flourish even in deepest shade (doz., \$2.50)	.25
Vinca minor variegata. Same as above but with variegated leaves.	
From pots	\$0.25 and .35

Yuccas in nursery rows at our Georgetown Nurseries,

BROAD LEAVED EVERGREENS—Continued

	Each
Vinca Major. Larger leaved than <i>V. minor</i> . In both green and variegated leaved ----- (doz., \$2.50) .25	
Yucca filamentosa. Leaves narrower than <i>Y. recurva glauca</i> , and with curly threads. ----- \$0.50, \$0.75 and 1.00	
Yucca recurva glauca. A tropical appearing palm-like plant that is perfectly hardy, having broad, bluish-green, sword-like leaves. When they become very old and large they drop the lower ground leaves and be- come standards on short stems, giving an artistic effect that is very different from that of any other shrub suggesting tropical luxuriance. Some of the plants when old bloom in spikes 4 to 5 feet long of pure white lily-like flowers. (See page 23.) They can be used informally in the shrubby group or border, or formally to mark corners or an entrance. 18 in. spread, 1 ft. high----- 1.50 1½ to 2½ ft. high----- \$2.50 to 5.00 2½ to 3½ ft. high----- \$5.00 to 7.50	

**YUCCA RECURVA GLAUCA**

Rhododendrons
may be trans-
planted at any
time, even while
in full bloom.

RHODODENDRONS

We offer the largest collection of imported grafted Rhododendrons on the Pacific Coast. All are choice bushy plants, well set with flower buds which will cover the plant with massive clusters of blooms the first season. Named varieties are available in all colors and shades. All plants have been recently transplanted and may therefore be moved any time with entire safety.

	Each
Album Elegans. Large pure white, medium height. 36 in. x 36 in.----- 15.00	
Blandyanum. Deep crimson, low growing. 30 in. x 36 in.----- 15.00	
Caractacus. Deep red, one of the best, medium. 36 in. x 42 in.----- 15.00	
Catawbiense Alba. White tinted bluish, medium. 36 in. x 42 in.----- 15.00

24 in. x 20 in.-----\$7.50; 18 in. x 15 in.----- 5.00

Pink-----30 in. x 24 in.----- 10.00

24 in. x 20 in.-----\$7.50; 18 in. x 15 in.----- 5.00

DWARF VARIETIES

Excellent as outside plants in Rhododendron bed or with other shrubbery; very compact. In 10 varieties of pink and red. Some of the best varieties are:

Cunninghami. Very compact habit. Large leaves. Large pink flowers in profusion. Very early.

2 to 3½ ft.-----\$7.50 to 10.00

Wilsoni. Numerous but small leaves. Small bell shaped, clear pink flowers borne in great profusion. Blooms earlier than larger varieties.

2 to 3½ ft.-----\$7.50 to 10.00

Hirsutum. Very dwarf habit. Small down covered leaves. Small brilliant red flowers in May.

1 to 2 ft.-----\$5.00 and 6.50

Other varieties, 2 to 3 ft. in diameter.

-----\$5.00 to \$7.50

**RHODODENDRON—Wilsoni****EVERGREEN WINDOW-BOX OFFER**

2 Cypress pyramidalis compacta or Boxwood. Bright green, pyramid shape, 1 ft.-----	\$1.50	3.00
2 Heather vulgaris. Pink, red or white flowers, profuse summer blooming, 12 in.-----	.75	1.50
1 Heather, Mediterranean hybrid. Lavender-pink; blooming all winter-----	1.00	1.00
4 Euonmus radicans, green or variegated. The only evergreen trailer for all year effect-----	.50	2.00
Collection-----	\$6.50	
Two Collections (for two boxes)-----	\$12.00	\$7.50

All plants are carefully packed so as to arrive in good condition and all but the vines have their roots within a firm ball of earth. Plant in good soil and keep sufficiently moist.

Window boxes of evergreens are effective throughout the year.

Prize Winning Exhibit of Evergreens at Western Washington State Fair

CONIFER EVERGREENS

	Each		Each
Abies concolor. Colorado Fir. Grayish blue.		Cypress Lawsoniana. (Illustrated on page 28).	
1½ to 2 ft.	\$2.00 to 3.00	habit.	
2 to 3 ft.	\$3.50 to 5.00	18 to 24 in.	\$2.00 to 3.50
Extra large plants	\$7.50 to 35.00	2 to 3 ft.	3.50 to 6.00
Araucaria imbricata. Monkey Puzzle or Chile Pine	\$5.00 to 7.50	Cypress arizonica. Same habit as Monterey but of blue color. Same sizes and prices.	
Arbor Vitae. See Thuyas.		Cypress Lawsoniana. (Illustrated on page 28).	
Biota. See Thuya orientalis.		Lawson Cypress. Blue green. The most rapid growing Cypress. Most of the plants are kept trimmed so they will be compact.	
Cedrus atlantica or Libani. Lebanon Cedar.		1½ to 2 ft.	1.50
A tall growing stiff shrub with horizontal branches of bright green. Being irregular in habit they are used informally.		2 to 3 ft.	2.50
2 to 4 ft.	\$2.50 to 7.50	3 to 4 ft.	\$2.50 to 5.00
5 to 18 ft.	\$10.00 to 50.00	4 to 6 ft.	\$5.00 to 7.50
Cedrus atlantica glauca. Same as above except of glaucous blue color and perhaps more irregular branching.		6 to 10 ft.	\$7.50 to 15.00
Large trees	\$12.50 to 50.00	Cypress Lawsoniana Silver Queen. Even shade of light gold or silver.	
Cedrus Deodara. The most graceful of the Cedrus. Light blue-green feathery foliage, more compact than other Cedrus types. Excellent for use in groups or as individual specimens.		2 to 3 ft.	\$3.50 to 5.00
2 to 3 ft.	\$3.50 to 5.00	3 to 4 ft.	\$5.00 to 7.50
3 to 5 ft.	\$5.00 to 10.00	Cypress Lawsoniana versicolor. Bright golden variegated foliage. Drooping branchlets and tip.	
6 to 8 ft.	\$10.00 to 20.00	2 to 3 ft.	\$3.50 to 5.00
10 to 18 ft.	\$25.00 to 50.00	3 to 4 ft.	\$5.00 to 7.50
Cryptomeria elegans. Compact; feathery foliage, bright green in summer, bronzed tipped in winter. 1 to 1½ ft.	\$1.50 to 2.50	4 to 5 ft.	\$7.50 to 10.00
1½ to 3 ft.	\$2.50 to 4.00	Cypress macrocarpa (Monterey). Bright green. Columnar. Can be used in place of Italian Cypress at much less cost.	
Large plants up to 10 ft.	\$5.00 to 10.00	1 to 2 ft.	\$1.00 to 2.00
Cryptomeria japonica. The open branched, tree type Cryptomeria resembling somewhat the Sequoia gigantea but of slower growth and finer habit.		2 to 4 ft.	\$2.00 to 4.00
1½ to 3 ft.	\$1.50 to 3.50	Cypress nestoides. Dwarf, very graceful; the sprays of bright green bending from the center to the outer edge in compact form, growing close to the ground in a shape suggesting an inverted nest. A new variety and an excellent plant for any purpose where dwarf or procumbent evergreens are needed or in dwarf groups. The diameter in each size as listed is about double the height.	
4 to 5 ft.	\$5.00 to 7.50	18 to 20 in. diameter	5.00
7 to 9 ft.	\$10.00 to 15.00	24 in. diameter	6.00
12 to 18 ft.	\$20.00 to 35.00	Large specimen plants	7.50

CONIFER EVERGREENS—Continued

Each

Cypress erecta viridis. Bright green; compact pyramidal. Of very symmetrical formal appearance.

1½ to 2 ft.-----	2.50
2 to 2½ ft.-----	3.50
2½ to 3 ft.-----	5.00
3 to 3½ ft.-----	6.00
4 to 4½ ft.-----	8.00

Cypress sempervirens fastigiata. Italian Cypress. Very compact type.

5 to 6 ft.-----	10.00
6 to 7 ft.-----	12.00
Very large plants-----	\$15.00 to 35.00

Cypress Triumph de Boskoop. Blue gray; of more open habit.

2½ to 4 ft.-----	\$3.50 to 5.00
4 to 6 ft.-----	7.50
6 to 8 ft.-----	\$10.00 to 15.00
8 to 10 ft.-----	\$17.50 to 20.00

Heather. See "Broadleaved Evergreens."

Juniper (Juniperus) chinensis. (Chinese.)

Glaucous, blue color. Slow growing. Very compact, pyramidal habit.

1 ft.-----	\$1.50 to 2.00
1½ ft.-----	3.00
2 to 2½ ft.-----	\$4.00 to 6.00
Larger plants-----	\$7.50 to 10.00

Juniper chinensis, variegated. Yellow tipped.

Same habit as J. chinensis; same prices.

Juniper chinensis femina. More bushy habit than J. chinensis mascula and not fully erect. Sometimes called J. suecica nana.

18 to 20 in.-----	2.50
20 to 24 in.-----	3.50

**CYPRESS—Lawsoniana Versicolor**

Each

Juniper chinensis mascula. Upright, compact, somewhat resembling the Irish Juniper but of pyramidal rather than columnar habit and with branches horizontal from center stem. Very attractive.

1½ to 2 ft.-----	2.50
2 to 2½ ft.-----	3.50
2½ to 3 ft.-----	5.00

Juniper chinensis procumbens. Sprawling habit.

1½ to 3 ft. spread-----	\$2.00, \$3.50 and 5.00
-------------------------	-------------------------

Juniper chinensis procumbens variegated. Sprawling; yellow tipped-----

\$2.50 to 5.00

Juniper communis. Bushy, loose habit.

1 ft.-----	\$1.50 to 2.00
2 to 3 ft.-----	\$2.50 to 5.00

Juniper communis depressa. Sprawling

Larger plants, 18 to 20 in.-----	2.50
24 to 30 in.-----	3.50

Juniper communis depressa aurea. Sprawling; golden. Large plants-----

\$3.50 to 5.00

Juniper hibernica (Irish). The most common columnar form. 1½ to 2 ft.-----

2 to 2½ ft.-----	2.50
3 ft.-----	3.50
3½ ft.-----	5.00
4 ft.-----	6.00
5 ft.-----	7.50
5 to 6 ft.-----	10.00

Juniper Pfitzeriana procumbens. Resembling J. tamariscifolia but grows coarser and larger and not as flat on the ground.

2 to 3 ft., heavy-----	3.50
Larger plants-----	\$5.00 to 7.50

Juniper sabina. Bluish-green color. Half erect habit, growing in direction half way between procumbent and erect. They are used to fine effect in the rock garden or on the edge of groups.

1 ft.-----	1.50
1½ to 2 ft.-----	\$2.50 to 3.50
2 to 3 ft.-----	\$3.50 to 5.00

**JUNIPERUS HIBERNICA (Irish Juniper)**

CONIFER EVERGREENS—Continued

Juniper japonica aurea. (Japanese Golden.)	
Brilliant gold and green. Same habit as <i>J. sabina</i> .	
1½ to 3 ft. spread.....	\$5.00 to 10.00
Juniper tamariscifolia. Fine foliage like a Tamarix, of blue-green color. Habit very flat and close to the ground. A much used sprawling juniper. 18 in. spread.....	
24 in. spread	2.50
30 in. spread	3.50
Larger specimens	5.00
Juniper scopulorum. (Rocky Mt. Juniper.)	7.50
.....	\$2.00 to 4.00
Juniper suecica. (Swedish.) Very much like Irish. Same price as Irish.	
Juniper virginiana. Large growing, but of graceful habit; leaves mostly scale-like, bluish. 2 to 3½ ft.	
4 to 6 ft.	\$1.50 to 3.00
.....	\$5.00 to 7.50
Juniper virginiana glauca. Same habit as <i>J. virginiana</i> but blue foliage.	
1 to 1½ ft.	\$1.50 to 2.00
2 to 3 ft.	\$2.50 to 4.00
Juniper virginiana pyramidalis. Dense, pyramidal form. Green or bluish foliage.	
2 to 4 ft.	\$2.00 to 4.00
4 to 6 ft. trimmed.....	\$5.00 to 7.50

RETINOSPORA PLUMOSA (background)
RETINOSPORA SQUARROSA NANA
 (foreground)

CYPRESS LAWSONIANA

Pine, Austrian. A rapid growing Pine valuable as an ornamental shrub or tree where there is plenty of room to develop. This variety will thrive after the first year without any care or water.		Each
Pine, Chile. See <i>Araucaria imbricata</i> .		
Pine Dwarf Mugho. (<i>Pinus montana mughus.</i>) Compact, low shrub; deep green foliage. Well shaped bushy shrubs.		
.....	\$3.50 to 10.00	
Pine, Umbrella. See <i>Sciadopitys</i> .		
Retinospora ericoides. Compact shrub of dense habit; feathery tip; like <i>R. squarrosa</i> but of light green color.		5.00
Retinospora filifera. Tips of branches threadlike and gracefully pendulous.		
1 ft.	\$1.50 to 2.00	
1½ ft.	2.50	
2½ ft.	3.50	
Larger specimen plants.	\$5.00 to 7.50	
Retinospora filifera aurea. Like <i>R. filifera</i> but golden. Same price.		
Retinospora filifera aurea nana. Very compact and dwarf form of the above.		
14 to 16 in. spread.....	3.00	
Retinospora plumosa. Plume-like branches. Compact habit.		
1 to 2 ft. Trimmed wide conical.....	\$1.50 to 3.50	
2 to 3 ft. Trimmed wide conical.....	\$5.00 to 10.00	
3 to 4 ft. Well shaped, but more slender	7.50	
Larger sizes up to 8 ft.	\$7.50 to 15.00	
Retinospora plumosa aurea. Same as <i>R. plumosa</i> but golden. Same prices. The most popular of the <i>Retinosporas</i> .		
Retinospora plumosa spicata (or <i>argentea</i>). <i>R. plumosa</i> with branchlets tipped white.		
1 ft.	\$1.50 to 2.00	
1½ to 2½ ft.	\$2.50 to 4.00	
Retinospora psifera. More open habit than <i>R. plumosa</i> and not showing the plume characteristic as much.		
12 to 18 in.	\$1.50 to 2.00	
1½ to 2½ ft.	\$2.50 to 3.50	
3 to 4 ft.	\$5.00 to 7.50	
Retinospora psifera aurea. Same as preceding except golden tipped. Same prices.		

CONIFER EVERGREENS—Continued

Retinospora squarrosa. Dense, compact foliage, with nodding feathery branchlet tips and top shoot; color light bluish green with touch of violet in winter.

1 to 2 ft.-----	\$2.00 to 3.50
2 to 3 ft.-----	\$3.50 to 5.00
Larger sizes -----	\$6.00 to 10.00

Retinospora squarrosa aurea. Like *R. squarrosa* but with golden tips.

1½ to 3 ft.-----	\$3.50 to 7.00
------------------	----------------

Retinospora squarrosa nana. Dense, compact form, of low habit, attaining 1 to 2 ft.

1½ to 2 ft.-----	3.50
Very large plants-----	5.00

**RETINOSPORA SQUARROSA NANA**

Sciadopitys verticillata. (Umbrella Pine.) Pyramidal. Compact trimmed plants.

3 to 4 ft.-----	\$7.50 to 10.00
4 to 6 ft.-----	\$10.00 to 15.00

Sequoia gigantea. Cal. Big Tree--\$2.50 up.

Spruce (Picea) excelsa. Norway Spruce. Dark green; a rapid grower, trims well.

1 ft.-----	\$1.00 to 1.50
2 to 3 ft.-----	\$2.00 to 3.50
4 to 6 ft.-----	\$5.00 to 7.50

Spruce Kosteriana. Koster's Blue.

2 to 3 ft.-----	\$3.50 to 6.00
3 to 4 ft.-----	\$7.50 to 10.00

Spruce pungens. Colorado Blue Spruce.

Selected strain, bluest of the blue.

1 to 2 ft.-----	\$2.00 to 3.50
2 to 3 ft.-----	\$3.50 to 5.00

Common Colorado Blue:

1 to 2 ft.-----	\$1.00 to 2.00
2 to 3 ft.-----	\$2.00 to 3.50

Taxus. See Yew.

**JUNIPERUS TAMARISCIFOLIA**

what open when young. Excellent where a large shrub of bright color is desired. It is perfectly hardy.

1½ to 3 ft.-----	\$2.00 to 4.00	Each
3 to 5 ft.-----	\$4.00 to 7.50	
5 to 8 ft. heavy, broad-----	\$7.50 to 12.00	

Thuya occidentalis Ellwangeriana. Tom Thumb Arbor Vitae. Broad pyramid----- 2.50

Thuya obtusa. (Illustration on following page). (Japanese Hinoki Cypress.) An artistic Japanese evergreen of great

**RETINOSPORA SQUARROSA**

CONIFER EVERGREENS—Continued

ornamental value having irregular, fan-shaped branches, with pendulous tips and pendulous top shoot. It is slow growing and is of especial value in a base planting or group that is desired to not overgrow. It gives an exquisitely artistic touch to any planting. Pure green color.

4 ft. -----	\$20.00 to 25.00
5 ft. -----	\$25.00 to 30.00
6 ft. -----	\$30.00 to 35.00
7 ft. -----	\$35.00 to 40.00
8 ft. -----	\$40.00 to 45.00

Extra heavy or light plants may vary slightly from this scale.

Thuya obtusa aurea. Same as *T. obtusa* variety except golden variegated. A little slower growing than the green variety.

4 ft. -----	\$20.00 to 25.00
5 ft. -----	\$25.00 to 32.50
6 ft. -----	\$32.50 to 40.00

Thuya occidentalis globosa. Of natural globe shape; bushy and compact.

1 to 2 ft. -----	\$2.00 to 3.50
Very large plants -----	\$5.00 to 7.50

Thuya occidentalis Hoveyi. Hovey's Arbor Vitae. Semi-dwarf, compact, 1 to 2 ft.-----

2.50

THUYA LOBBII

THUYA OBTUSA (Japanese Cypress)

	Each
<i>Thuya occidentalis lutea</i> . Golden. Rather slender, attaining 12 to 15 feet high.	
1 to 2 ft. -----	\$2.00 to 3.50
Large plants up to 10 ft. -----	to 20.00
<i>Thuya occidentalis pyramidalis</i> . Narrow pyramidal type. 1 to 1½ ft. -----	1.50
2 to 3 ft. -----	\$2.50 to 3.50
Large plants -----	up to 7.50
<i>Thuya occidentalis siberica</i> . Of regular conical outline, and dense foliage. 2-3 ft. -----	3.50
<i>Thuya orientalis</i> (Biota). Chinese Arbor Vitae. Finer foliage than <i>T. occidentalis</i> and slower growing -----	\$1.50 up
<i>Thuya orientalis aurea nana</i> . Golden; compact and bushy; dwarf.	
8 to 10 in. -----	2.00
10 to 12 in. -----	2.50
12 to 14 in. -----	3.50
14 to 16 in. -----	4.50
<i>Thuya orientalis globosa</i> . Round and dwarf. Light green, compact foliage -----	\$1.50 up
<i>Thuya orientalis pyramidalis</i> . Deep green. Broad base, tapering to point.	
16 to 18 in. -----	2.50
20 to 24 in. -----	3.50
<i>Thuyopsis dolabrata</i> . Leaves and scales much wider and flatter than <i>Thuya</i> . Wide pyramidal habit; compact; gold and green. An odd and attractive evergreen.	
2 to 3 ft. -----	\$3.50 to 5.00
3 to 4 ft. -----	\$5.00 to 7.50
<i>Tsuga canadensis</i> . A Hemlock more compact and of larger leaves than our native. Does well in partial shade. 1 to 2 ft. -----	1.50
Larger plants -----	to 7.50

CONIFER EVERGREENS—Continued

Each		Each
Yew, English (<i>Taxus baccata</i>). Compact, bushy habit; dark green; of slow growth making it valuable for base planting or low groups. Does well in partial shade.		
1½ to 2 ft. compact, trimmed	\$3.00 to 4.50	
2 to 3 ft. compact, trimmed	\$4.50 to 6.00	
Large specimen plants, trimmed	\$6.00 to 35.00	
Yew, English golden. (<i>T. baccata aurea</i>). Same habit as <i>T. baccata</i> ; same price.		
Yew, Irish. (<i>T. hibernica</i>). Formal, columnar habit; compact. Bears large bright red berries in fine contrast with the dark green foliage; of slow growth.		
2 to 3 ft.	\$5.00 to 7.50	
3 to 4 ft.	\$10.00 to 15.00	
4 to 5 ft.	\$15.00 to 25.00	
Larger plants	to 35.00	
Yew, Irish Golden (<i>T. hibernica aurea</i>). Same as <i>T. hibernica</i> but foliage is bright green variegated. Same price.		

HEDGE PLANTS

Hedges are valuable for their beauty, forming a graceful, permanent property division and displacing the unsightly fence which soon deteriorates.

In planting a hedge dig a trench twice as large as is required for the roots and refill with rich soil, mixed, if possible, with manure or garden fertilizer. Spread the roots out and plant but very little deeper than previously planted in the nursery being sure to water especially well the first season.

EVERGREEN

The following plants are exceptionally well adapted for hedge purposes:

- Privet, Common, or Privet, California.** For most purposes should be trimmed to about 2 to 4 ft., although they can be allowed to attain their full height of about 8 ft. For best results alternate the plants in a double row. For prices see page 23.
- Laurel, English.** Of more vigorous growth than the Privet and of larger leaf and brighter green color, making an attractive hedge 4 ft. or higher (attaining 8-10 ft. if so desired). For prices see page 22.
- Cypress Lawsoniana.** Valuable for a larger hedge or windbreak, making an excellent landscape background. Will attain 15 ft. or if trimmed heavily can be kept back to about 6 ft. For immediate effect plant 4 ft. stock and trim into a 3 ft. hedge. For prices see page 26.
- Berberis dulcis.** An evergreen Barberry with blue berries in winter. Attains 3 ft. For prices see page 17.

DECIDUOUS

Practically all Flowering Shrubs make beautiful summer hedges, however, dropping their leaves in the winter. Among those best adapted for hedges are:

- Berberis Thunbergii.** For description and prices see page 34.
- Berberis vulgaris.** For description and prices see page 34.
- Deutzia gracilis.** For description and prices see page 34.

Propagation of Evergreens

The measure of satisfaction given by evergreens depends largely upon their selection and training in the nursery. Our evergreens are propagated only from the best strains of selected stock and are frequently transplanted to promote compactness of root and top. They are developed in bench, pot, and field to insure their success in the home grounds.

A section of a bed of young Cypress at our Georgetown Nurseries

SHADE AND ORNAMENTAL TREES

We have a number of very large, fine specimen trees for immediate effect. Prices on application.

Acer Negundo. See Maple, Ash-Leaved.
Ash, Mountain. 3-4 ft., 50c; 4-6 ft., \$1.00; 6-8 ft., \$1.50. Specimen trees from \$2.50 to \$5.00.
Beech, American. 75c and up.
Beech, Purple. 6-10 ft., \$7.50 to \$10.00.
Birch, Cut Leaved. 6 ft., \$2.50.
Birch, White. 5-6 ft., \$1.50; 6-8 ft., \$2.50; also large specimen trees.
Boxelder. See Maple, Ash-Leaved.
Catalpa Speciosa. 8-10 ft., \$2.00, \$2.50; 10-12 ft., \$3.50.
Catalpa Bungei (Chinese). Each, \$5.00 and \$7.50.
Cercis canadensis (American Red Bud). Clusters rosy pink flowers. \$1.50 to \$2.50.
Cherry, Japanese Flowering. Single and double pink. 6-8 ft., \$2.50, \$3.50; also large specimen trees to 18 ft.
Chestnut, American. 4-6 ft., \$1.00; 6-8 ft., \$1.50 to \$2.50.
Chestnut, Horse. White flowering, 6-8 ft., \$2.50 to \$3.50; 8-10 ft., \$5.00 to \$8.00; extra large trees, 12-20 ft., \$8.00, \$10.00, \$15.00.
Chestnut, Horse. Red flowering; \$3.50 to \$5.00.
Dogwood. See Hardy Flowering Deciduous Shrubs.
Elm, American. 3-4 ft., 75c; 4-6 ft., \$1.00; 6-8 ft., \$1.50; 8-10 ft., \$2.50.
Elm, Camperdown. See Deciduous Weeping Trees.
Hawthorn. Double Paul's Scarlet. 6-8 ft., \$2.50; extra large, well branched tops, \$3.50 and \$5.00.
Hawthorn. Pink. Same price as red.
Hawthorn. White. Same price as red.
Hornbeam, European (Carpinus Betulus). Valuable for handsome foliage. \$1.50, \$2.00.
Koelreuteria paniculata (Oriental Varnish Tree). 6-10 ft., \$2.50, \$3.50, \$5.00.
Laburnum (Cytisus). Golden chain; 4-6 ft., \$1.50; 6-8 ft., \$2.50 to \$3.50.
Linden, American and European. 6-8 ft., \$1.50; \$2.50.
Liquidambar Styraciflua (Sweet Gum). Symmetrical pyramidal tree, leaves deep crimson in Autumn. 4-6 ft., \$2.00; 6-8 ft., \$2.50, \$3.50.
Locust, Black. 6-8 ft., \$1.00; 8-10 ft., \$2.50, \$5.00.
Locust, Honey. 5-8 ft., \$1.50 and \$2.50.
Magnolia acuminata. Each \$1.50 to \$5.00.
Magnolia Soulangeana. Each \$1.50 to \$3.50.
Magnolia. White, 8 to 10 ft. \$3.00 to \$7.50.
Maidenhair Tree (Ginkgo Biloba). 4-6 ft., \$1.50 to \$2.00; 6-8 ft., \$2.00 to \$3.50.
Maple, Ash-Leaved Box Elder. 8-10 ft., \$1.00-\$2.50.
Maple, Gold and Silver Variegated Ash-Leaved. (Acer Negunda). Sizes, \$1.50 to \$3.50.
Maple, Schwedleri. Purple leaved. 8-10 ft., \$3.50; 10 to 12 ft., \$5.00; 12 to 20 ft., \$6.00 to \$15.00.
Maple, Norway (Hard Maple). 6-8 ft., \$1.50; 8 to 12 ft., \$2.50 to \$3.50; 12 to 16 ft., \$5.00 to \$7.50; 16 to 20 ft., \$7.50 to \$10.00.

CHERRY—Japanese Flowering

Maple, Silver. 6-8 ft., \$1.00; 8-10 ft., \$1.50 to \$2.50.
Maple, Soft. Native, 6-8 ft., \$1.00; \$1.50 to \$2.50; 10-12 ft., \$3.50, \$5.00.
Mulberry, Russian. 4-8 ft., \$1.00 to \$2.50.
Mulberry, Teas Weeping. See Deciduous Weeping Trees.
Jak, European White. 12-16 ft., \$5.00 to \$10.00.
Oak, Red (Quercus rubra). 4-5 ft., 75c to \$1.00; 5-6 ft., \$1.50.
Pagoda Tree. See Sophora.
Plane, Oriental. 6-8 ft., \$1.00; sizes to 18 ft.
Plum, Purple Leaf. See Prunus Pissardii.
Poplar, Carolina and Lombardy. 4-6 ft., 50c; 6-8 ft., \$1.00; 8-10 ft., \$1.50 to \$2.50; 10-12 ft., \$3.50; 12-16 ft., \$5.00; 16-20 ft., 10.00 to \$15.00.
Poplar, Silver. 4-6 ft., 50c; 6-8 ft., \$1.00 to \$2.50.
Prunus Pissardii. 4-6 ft., \$1.50; 6-8 ft., \$2.50; 8-10 ft., \$3.50 to \$5.00.
Red Bud. See Cercis.
Sophora Japonica (Japanese Pagoda Tree). Valuable for attractive flowers and handsome foliage. \$1.50, \$2.00, \$2.50.
Sumac, Tree. 8-10 ft., \$2.50, \$3.50.
Sweet Gum. See Liquidambar.
Sycamore. 6-8 ft., \$1.50; 10-12 ft., \$3.50, \$5.00.
Tulip Tree (Liriodendron). \$2.50, \$3.50.
Varnish Tree. See Koelreuteria.
Walnut, Black. 6-8 ft., \$2.50; 8-10 ft., \$3.50, \$5.00.
Walnut, English. (See Nut Trees on page 8.)
Willow. See Deciduous Weeping Trees.

DECIDUOUS WEEPING TREES

Ash, Mountain. (Weeping). 2-3 year old heads, \$2.50, \$5.00.
Birch, Cut-Leaved. (See Shade Trees.)
Elm, Camperdown. Young trees, \$3.50 to \$5.00; 5-6 ft. head, 7 ft. stem, \$10.00 to \$15.00.
Willow, Babylonian. \$1.00, \$1.50; large trees \$2.50.
Mulberry, Teas Weeping. 6-8 ft., good heads, \$2.50, \$3.50, \$5.00 to \$7.50.
Willow, Kilmarnoch and New American. 2-4 year old heads, \$3.50; specimen trees, \$5.00.
Willow, Laurel Leaf. 4-6 ft., 75c, \$1.00; 6-8 ft., \$1.00, \$1.50.

Fifty thousand Roses, over two hundred leading varieties.
 Guaranteed true to name. Pages 42 to 51.

HARDY VINES AND CREEPERS

Each

Each

Akebia quinata. A beautiful climber with dark purplish flowers. Very fragrant. Satisfactory for trellis or with ivy-----	1.00	Honeysuckle, Fragrant Dutch. Yellow and red -----	50c, 1.00
Ampelopsis quinquefolia. Virginia Creeper, Woodbine or American Ivy-----	50c to 1.00	Honeysuckle, Halliana. Hall's Japanese Evergreen. Pure white, changing to yellow. Sizes -----	50c and 1.00
Ampelopsis Englemanni. Imported Virginia Creeper; will cling to walls without support; smaller foliage; changes to a brilliant crimson in autumn. Very desirable for covering steep banks. Well rooted plants-----	Doz., \$3.50; per 100, \$25.00	Honeysuckle sempervirens. Scarlet Trumpet Honeysuckle. Scarlet-----	75c and 1.00
Large plants -----	75c and 1.00	Honeysuckle, Variegated leaved. Yellow Sizes -----	50c and 1.00
Ampelopsis Sempervirens. Semi-evergreen, small foliage similar to A. Englemanni -----	50c, \$1.00	Hypericum. Yellow flowers----- (doz., \$1.50)	.15
Ampelopsis Veitchi (tricuspidata). Boston Ivy (or Japan Ivy.) Very popular for covering brick or stone walls, etc.; foliage of rich olive green in summer, changing to scarlet in the fall-----	50c, 75c, 1.00	See "Broadleaved Evergreens."	
Aristolochia Siphon. Dutchman's Pipe. Named by its singular purplish-colored pipe-shaped flowers; very large leaves of deep green color-----	50c, 75c and 1.00	Ivy, English. Evergreen. (doz., \$1.50)-----	.15
Bignonia radicans. Trumpet Creeper-----	.50, .75	Larger plants -----	25c to .75
Celastrus Scandens. Deciduous; clusters of orange berries from November to February, the berries resemble the Euonymus European in size and color-----	50c to 1.50	Ivy, English Small Leaved. Green with variegated veining and about one-half the size of the common English Ivy --- (doz., \$2.50)	.25
CLEMATIS. Large flowering. Strong, 2 year olds.		Larger plants ----- (doz., \$5.00)	.50
Duchess of Edinburgh. Large double white	1.00	Ivy, English Golden. Large golden variegated leaves. Small plants-----	.50
Henryi. Large, white-----	1.00	Jasmine nudiflorum. Yellow-----	1.00
Jackmani. Large, rich purple-----	1.00	Jasmine officinale. White-----	50c, 75c, 1.00
Mme. Baron Veillard. Large, rose-----	1.00	Kudzu Vine (Pueraria thunbergiana). Perennial but very rapid growing vine with pea-shaped, purple flowers-----	50c, 75c and 1.00
Mme. Edouard Andre. Large wine red-----	1.00	Matrimony Vine, Chinese (Lycium chinense). Hardy vines blooming from June to September. Shades ranging from pink to purple. In the fall the long, slender branches are loaded with bright red berries which contrast well with the green foliage. Ideal for rocks, walls, fences, arbors, etc. ----- (doz., \$5.00)	.50
Ramona. Large, light blue-----	1.00	Spurge, Japanese (Pachysandra terminalis). Evergreen creeper with thick, glossy foliage. White to purplish flowers. Ideal for ground cover either in the dense shade or sun ----- (doz., \$ 5.00)	.50
CLEMATIS, Hardy small flowering. Strong 2 and 3 year old plants.		Larger plants ----- (doz., \$10.00)	1.00
Coccinea. Scarlet, bell shaped flowers	.75	Wisteria, Chinese purple (sinensis)-----	1.00 to 2.50
Crispa. Blue, bell-shaped flowers-----	.75	Wisteria, Chinese white -----	\$1.00 to 2.50
Montana. Small white-----	50c and .75	Wisteria multijuga. Japanese Wisteria. Two weeks later flowering than Chinese. Violet to violet-blue-----	\$1.00 to 3.50
Montana rubra. Small pink-----	75c and 1.00	Wisteria multijuga alba. White-----	\$1.00 to 3.50
Paniculata. Common, small flowering, white. A vigorous grower-----	.50	Wistaria multijuga. Pink, white and purple. Very large specimen plants-----	\$3.50 to 10.00
Viticella. Small blue-----	.75	Vinca. Periwinkle. Evergreen. Green or variegated. Small plants (doz., \$1.50)---	.15
Evonymus radicans. Evergreen. Green or variegated leaves. Sizes-----	50c, 75c, 1.00		

BEDDING PLANTS

We offer a complete selection of Bedding Plants, both potted and grown in flats. These are ready for planting out when warmer weather begins in the last part of April, after which they are on display at our store.

WINDOW BOXES PLANTED

HARDY DECIDUOUS FLOWERING SHRUBS

HYDRANGEA OTAKSA

- Almond.** Double flowering. Red, white and pink. 2-3 ft., each, \$2.50.
- Althea (Rose of Sharon).** In colors. Extra large. \$1.00 to \$1.50.
- Amorpha fruticosa (False Indigo).** Each \$1.00.
- Apple, Bechtel's Flowering Crab.** Each, \$1.00, \$1.50 and \$2.50.
- Azalea pontica (Hardy Ghent Azalea).** Each \$3.50.
- Berberis thunbergii (Japanese).** Dwarf, compact; red berried in winter. Each 50c, 75c, \$1.00.
- Berberis vulgaris.** Common Barberry. Large attractive foliage. Yellow flowers. Each 50c to \$1.00.
- Berberis vulgaris purpurea.** Red leaved. Each 50c to \$1.00.
- Berberis Wilsonii.** A very attractive winter berried shrub, half evergreen. Each 75c \$1.00.
- Buddleia magnifica (Butterfly Bush).** Blue. Attains 6 to 10 ft. if not trimmed. Each 75c, \$1.00, \$1.50.
- Calycanthus.** Spice bush. 75c. \$1.00.
- Ceanothus Marie Simon.** Rosy pink, blooms September and October. 2-3 ft. each \$1.00
- Cherry, Double Flowering (Japanese).** 2-3 ft.. \$2.00; 3-4 ft., \$3.50. See Shade and Ornamental Trees.
- Cornus.** See Dogwood.
- Coral Berry (Symphoricarpos vulgaris).** Attains 4 ft. Valuable for its berry effect. Each 50c, 75c, \$1.00.
- Cranberry, High Bush.** See Snowball.
- Currant, Flowering.** Red. 75c and \$1.00.
- Currant, Flowering.** Yellow. 75c and \$1.00.
- Currant, Indian.** See Coral Berry.
- Deutzia crenata magnifica.** Large panicles of large double, pure white flowers. A new and exceptionally attractive variety. Each \$1.50.
- Deutzia crenata latiflora.** Flat racemes of large single, pure white flowers. Each \$1.00.
- Deutzia Fleur de Pommès.** A beautiful dwarf variety with flowers of apple blossom pink. Each \$1.50; dozen \$15.00.
- Deutzia gracilis.** Dwarf, white. Each 75c. \$1.00.
- Deutzia gracilis eximia.** Dwarf; white flowers tinted pink outside. Each 75c, \$1.00.
- Deutzia gracilis Kalmiaflora.** Dwarf; white flowers, with a touch of pink, like that of the Kalmia. Each \$1.00.
- Deutzia gracilis multiflora.** Dwarf; white; profuse flowering. Each 75c, \$1.00.
- Deutzia gracilis rosea.** Dwarf, pink. Each 75c, \$1.00.

- Deutzia Lemoinei.** White. 75c.
- Deutzia Pride of Rochester.** 75c, \$1.00.
- Deutzia scabra.** Double white. 75c, \$1.00.
- Deutzia scabra pleno crenata.** Double pink. Pride of Rochester, 75c, \$1.00.
- Deutzia Vilmorinae.** Large white. Each 75c and \$1.00.
- Diervilla.** See Weigelia.
- Dogwood (Cornus).** White, \$1.00 and \$1.50.
- Dogwood, Florida.** 75c, \$1.00.
- Dogwood, Native (Cornus nuttalli).** White flowering in spring, sometimes blooming again during the summer. Red berries and scarlet leaves in fall. 50c to \$2.50.
- Dogwood.** Pink, \$1.00 and \$1.50.
- Dogwood, Siberian.** Red bark. \$1.00 and \$1.50.
- Dogwood variegata.** Silver variegated leaves. Very attractive. Each \$1.50.
- Elder, Cut Leaf.** 3-4 ft. \$1.00; Standards 6-7 ft. \$2.00.
- Elder, Golden (Sambucus aurea).** Extra large, 6-8 ft., \$1.50 and \$2.50.
- Enkianthus.** White, bell shaped flowers. Most valuable for scarlet leaf effect in fall. Each \$2.50 to \$6.00.
- Evonymus alatus.** Large shrub. Foliage fine, rose color in autumn. Each 75c to \$1.50.
- Evonymus Europaeus.** Large shrub, bearing rose-colored capsules with red seeds in autumn. Each 75c to \$1.50.
- Forsythia.** Very early, bright yellow. Each 75c and \$1.00.
- Fringe, Purple.** 75c to \$1.50.
- Fringe, White.** Each 75c to \$1.50.
- Globe Flower.** See Kerria.
- Golden Bell.** See Forsythia.
- Heather.** See Broad Leaved Evergreens.
- High Bush Cranberry.** See Snowball.
- Honeysuckle, Bush (White Tatarian).** 75c to \$1.50.

HYDRANGEA—Paniculata grandiflora

HARDY DECIDUOUS FLOWERING SHRUBS—Continued

- Honeysuckle, Bush (Red Tatarian).** 75c to \$1.50.
- Hydrangea arborescens.** Very hardy. Pure white, large flowers. Each 75c, \$1.00.
- Hydrangea hortensia japonica.** Pink. Each \$1.50, \$2.50, \$3.50 and \$5.00.
- Hydrangea otaksa.** Pink or blue. Each \$1.50, \$2.50, \$3.50, \$5.00.
- Hydrangea paniculata grandiflora.** Very large showy flowers. Very hardy. Each 75c, \$1.00.
- Hydrangea paniculata grandiflora.** Standard, (tree shaped). \$1.50 and \$2.50.
- Japan Quince.** See Quince.
- Kerria japonica.** (Globe Flower.) Large yellow flowers. 50c, 75c, \$1.00.
- Kerria japonica argentia.** Silver variegated leaves, yellow flowers. 75c, \$1.00, \$1.50.

LILACS**DOUBLE FLOWERING VARIETIES**

NAMED VARIETIES, each \$2.50. Larger plants, \$3.50 to \$5.00 each.

- Alphonse Laval.** Blue, shaded violet.
- Chas. Joly.** Red purple, finest of the darks.
- Humboldt.** Lilac blue.
- Emille Lemoine.** Rose lilac.
- Leon Simon.** Blush crimson red.
- Michael Buchner.** Pale lilac.
- Virginite.** New color, soft pink.

SINGLE FLOWERING VARIETIES

NAMED VARIETIES, each \$1.50, \$2.00 and \$2.50.

- Alba.** Very large and pure white.
- Chas. X.** Large reddish purple. Good forcer.
- Louis Van Houtte.** Lilac. A good variety.
- Maria Legrays.** Large white; best forcer.

**SNOWBERRY (Symphoricarpos Racemosus)****LILACS—Continued**

NOT NAMED. By color only.

Single White. Each 25c, 50c, 75c and \$1.00.

Single Purple. Each 25c, 50c, 75c and \$1.00.

Locust, Sweet. Dwarf pink flowering. \$1.00 to \$1.50.

Lonicera (Chamaecerasus) myrtillus. White. Each 50c.

Lonicera tatarica. See Honeysuckle, bush.

Maple, Japanese Dwarf (Acer palmatum). In yellow, yellow-brown and bright green. 3-5 ft. \$2.50 to \$5.00.

Maple, Japanese Dwarf (Acer palmatum atropurpureum and sanguineum). Bright scarlet. 2-4 ft. \$3.50 to \$7.50.

Maple, Japanese Dwarf Cut Leaf (Acer palmatum dissectum). Very dwarf, cut leaf. Green, 1½-3 ft. spread, \$3.50 to \$7.50. Scarlet, 1½-3 ft. spread, \$5.00 to \$12.50.

Olive, Russian (Eleagnus angustifolia). Extra large, each \$1.00 to \$2.00.

Philadelphus (Mock Orange) Avalanche. Double white. Arching branches closely covered with big clusters of large flowers. \$1.00 and \$1.50.

Philadelphus Banniere. Flowers 2½ in., half double, snow white. \$1.50 and \$3.50.

Philadelphus Boule d'Argent. Very large double white, similar to Avalanche but clusters more compact resembling balls. \$1.00 and \$1.50.

Philadelphus Conquete. Single white flowers, exceptionally large, to 2¾ in. across, sweet scented. An excellent variety. Each \$1.50.

Philadelphus coronarius. Common Mock Orange. Eventually attains 10 ft. if not trimmed. Single white flowers shading to cream, unsurpassed fragrance. Each 75c, \$1.00, \$1.50.

Philadelphus coronarius foliis aureis. Lower habit than above and leaves golden yellow. Each \$1.50.

Philadelphus coronarius grandiflora. Flowers larger than P. coronarius, very fragrant. Each \$1.00, \$1.50.

**PHILADELPHUS VIRGINALE**

HARDY DECIDUOUS FLOWERING SHRUBS—Continued

JAPANESE SNOWBALL

- Philadelphus phantasia.** Flowers single white tinted with pale rose at center. Petals fringed at edge. Each \$1.00.
- Philadelphus Perle Blanche.** Attains 5 ft. Flowers white, semi-double, sweet scented. An excellent variety. Each \$1.50. Dozen \$15.00.
- Philadelphus Virginale.** Double white flowers, very large, to 2½ in. or more across. Very fragrant. Another excellent and new variety becoming popular in the east. Large plants. \$1.50 to \$2.50.
- Plum, Double Flowering.** See *Prunus triloba*.
- Potentilla fruticosa.** Yellow or white flowers, blooms July, August and September. 75c, \$1.00, \$1.50.
- Prunus triloba (Double Flowering Plum).** 2-4 ft., \$1.50 to \$2.50; 4-6 ft., \$2.50 to \$3.50.
- Quince, Flowering Japanese.** In varieties of red, orange and pink. Each 75c, \$1.00, \$1.50.
- Quince, Flowering Japanese Dwarf.** Sprawling. Shades of pink and red. Large plants \$1.00 and \$1.50.
- Rhus Cotinus (Smoke Tree).** Large purplish panicles. Each 75c and \$1.00.
- Snowball, High Bush Cranberry (*Viburnum opulus*).** Most valuable for persistent scarlet berries. Each 75c to \$1.50. Standards (tree shape). Each \$1.50 to \$2.00.
- Snowball, Common (*Viburnum sterile*).** Large snowball-like flowers. Each 75c, \$1.00.
- Snowball, Japanese (*Viburnum plicatum*).** Flowers looser than common, leaves wrinkled and thicker. Each \$1.00, \$1.50.
- Snowberry (*Symphoricarpos Racemosus*).** White berries, 50c to \$1.00 each.
- Spirea Bumalda.** Attains 2 ft. Whitish to deep pink. \$1.00 to \$1.50.
- Spirea Bumalda Anthony Waterer.** Attains 2 ft. Red. Sizes, 50c, 75c, \$1.00, \$1.50, \$2.50.
- Spirea Billardii.** Attains 6 ft. Bright pink. Each 75c. Large size, \$1.00, \$1.50.

- Spirea Budleia (Butterfly Bush).** See *Budleia*.
- Spirea Caryopteris.** Blue. Each \$1.00 to \$2.50.
- Spirea Margaritae.** Same habit as *S. Anthony Waterer* but dark pink in color. Same price.
- Spirea prunifolia.** Attains 6 ft. Pure white. 75c, \$1.00.
- Spirea Van Houttei.** Bridal Wreath. Attains 7 ft. Pure white. Sizes, 75c, \$1.00, \$1.50.
- Spirea Thunbergii.** Attains 3-4 ft. Pure white. 75c, \$1.00.
- Sumac, glabra (Smooth Sumac).** 4-6 ft., 75c to \$1.50; 6-8 ft., \$1.50 to \$2.50.
- Sumac, typhina (Staghorn Sumac).** 4-6 ft., 75c to \$1.50; 6-8 ft., \$1.50 to \$2.50.
- Syringa.** See *Philadelphus* or *Lilac*.
- Tamarix, African.** Each 75c, \$1.00, \$2.50.
- Weigela (Diervilla) Dr. Ballion.** New. Attains 6 ft. Deep red. Excellent variety. Each \$1.50. Dozen \$15.00.
- Weigela, Eva Rathke.** Dwarf, but erect. Deep carmine red. Very free flowering. Blooms later than other shrubs, until heavy frost. A very popular variety. Each \$1.00, \$1.50.
- Weigela Floreal.** Soft pink. 4 ft. Each \$1.00.
- Weigela, Gustave Mallet.** Light pink, bordered white. Each 75c, \$1.00.
- Weigela, Kosteriana variegata.** Dwarf. Golden variegated leaved, pink flowers. Each \$1.50.
- Weigela, Mme. Lemoine.** White with delicate blush, changing to pink. Each, \$1.00, \$1.50.
- Weigela Mont Blanc.** Pure white, fading to pinkish white. Each 75c, \$1.00.
- Weigela, rosea variegata.** Dwarf, pink; silver variegated leaved. Each \$1.00, \$1.50.
- Weigela, Seduction.** Carmine-red, very floriferous and early. Each \$1.00, \$1.50.

WEIGELA—Mme. Lemoine

Packing For Safe Delivery

Our methods of digging and packing insure the delivery of our stock in first class condition. In the handling of every order it is our aim not only to satisfy but to please. The following is typical of unsolicited comment now in our files:

*Malmo & Company,
Seattle, Washington.
Gentlemen:*

" * * I desire to compliment and thank you for the efficient and careful way in which the plants were packed. At various times I have sent for trees and plants from several nurseries but in no case has the goods been received in such splendid condition.*

*Your truly,
(Signed) WM. D. HAMMOND.*

*R. F. D. No. 4, Box 271, Tacoma, Wash.
November 16, 1923.*

ROCKERY PLANTS

The hilly topography of the Northwest has made rockeries about the home both natural and necessary; if planted properly, always an interesting and different part of the landscape. Rock walls too often are built with only the idea in mind of serving as a retaining wall and they are not sloped back enough and the rocks are placed too closely together to permit of sufficient space for soil and plants. Most of the openings should be open to rain and extend backward and downward. Only plants that attain less than 12 inches should be used in the rock wall whereas taller plants may be used in the gentler slopes of rock gardens. It should be a rule that a generous number of plants of each variety should be used for while a full range of color coming at all seasons is desirable too many varieties do not make a pleasing effect of the rockery as a whole.

In either rock wall or rock garden it is essential that good loam be filled in all openings where plants are put. It is equally important that rockeries be well watered each summer, especially the first season after planting. The rocks draw the heat of the sun and dry out the soil quickly, especially if the exposure is to the south or west, making frequent irrigation of prime importance, at least until the plants are established.

The following list of Evergreens and Perennials offers a wide range as regards habits of growth and color of foliage and flower for both summer and winter effect.

ROCKERY BROADLEAVED EVERGREENS

For complete list of Broad Leaved Evergreens see pages 17-25

	Each		Each
Abelia grandiflora. A graceful small leaved shrub with pinkish white flower. Spread-		Cotoneaster adpressa. Like <i>C. horizontalis</i>	
inb habit. 10 to 12 in.----- (doz. \$7.50)	\$0.75	but more dwarf and compact.	
12 to 18 in.----- (doz. 10.00)	1.00	18 to 24 in. spread-----	\$1.50 to 2.00
18 to 24 in.-----	1.50	Cotoneaster horizontalis. Deciduous, with	
2 to 4 ft.-----	2.50	heavy crop red berries in winter; sprawl-	
Berberis dulcis nana. Very dwarf and compact; attains 12 to 14 inches in height.		ing. 10 to 12 in. spread----- (doz. \$7.50)	.75
3 to 4 in. broad----- (doz. \$2.50)	.25	12 to 16 in. spread----- (doz. 10.00)	1.00
4 to 6 in. broad----- (doz. 3.50)	.35	18 to 30 in. spread-----	\$1.50 to 2.00
6 to 8 in. broad----- (doz. 5.00)	.50	Extra large specimen plants-----	2.50
8 to 10 in. broad----- (doz. 7.50)	.75	Cotoneaster microphylla. Sprawling, holds	
10 to 12 in. broad-----	1.00	both leaves and berries in winter; for	
12 in. up broad, specimen plants-----	1.50	same use as <i>C. horizontalis</i> .	
Cotoneaster Henryii. Not procumbent but		10 to 12 in. spread----- (doz. \$7.50)	.75
of low habit, spreading. Fine lacey appearance. Long narrow leaf, red berries;		12 to 18 in. spread----- (doz. 10.00)	1.00
good for top of rockery.		18 to 24 in. spread-----	1.50
24 to 30 in. spread-----	1.50	Euonymus radicans. Hardest evergreen	
30 to 36 in. spread-----	2.00	trailer; smaller leaves than <i>E. japonica</i> .	
		Green foliage and variegated foliage.	
		Each-----	\$0.50, \$0.75, \$1.00 and 1.50

ROCKERY PLANTS—Continued

Each

Each

Heather, Bell. (<i>Menziesia polifolia</i> or <i>Daboecia polifolia</i> .) Glossy dark green leaves. Flowers on long terminal racemes, blooming all summer until frost; shading from purple to rose lavender.	
6 to 8 in.----- (doz. \$7.50)	.75
8 to 10 in.----- (doz. 10.00)	1.00
Large plants -----	\$1.50 to 2.00
Heather tetralix. Rosy pink. Attains 12 in.	
Early. 4 to 6 in.----- (doz. \$5.00)	.50
6 to 8 in.----- (doz. 7.50)	.75
Heather, Mediterranean hybrid. Dwarf. Bright pink. Blooms throughout winter.	
6 to 8 in. spread----- (doz. \$10.00)	1.00
8 to 10 in. spread----- (doz. 15.00)	1.50
Large specimen plants-----	\$2.00 to 3.00
Heather vagans alba. White, compact habit.	
6 to 8 in. wide----- (doz. \$7.50)	.75
8 to 10 in. wide----- (doz. 10.00)	1.00
10 to 14 in. wide----- (doz. 15.00)	1.50
Heather vagans rosea. Pink.	
8 to 10 in. wide----- (doz. \$7.50)	.75
10 to 12 in. wide----- (doz. 10.00)	1.00
12 to 14 in. wide----- (doz. 15.00)	1.50
Heather vagans rubra. Red.	
6 to 8 in. wide----- (doz. \$7.50)	.75
8 to 10 in. wide----- (doz. 10.00)	1.00
10 to 12 in. wide----- (doz. 15.00)	1.50
Heather (Calluna) vulgaris. (Scotch Heather). Rosy purple. Attains 1 to 2 ft. Both single and double flowering varieties.	
5 in. wide---- (doz. \$5.00, per 100 \$40.00)	.50
6 in. wide----- (doz. \$7.50)	.75
8 in. wide----- (doz. 10.00)	1.00
10 to 12 in. wide----- (doz. 15.00)	1.50
Large specimen plants-----	\$2.00 to 2.50
Heather vulgaris alba. White. Same sizes and prices as Heather vulgaris.	
Heather vulgaris Hammondii. Double white. Brightest green foliage of the Callunas.	
4 to 6 in.----- (doz. \$5.00)	.50
6 to 8 in.----- (doz. 7.50)	.75
8 to 10 in.----- (doz. 10.00)	1.00
10 to 12 in.----- (doz. 15.00)	1.50
Heather vulgaris rosea. Pink. compact habit -----	\$0.75, \$1.00 1.50
Heather vulgaris rubra. Red. Compact habit.	
6 in. ----- (doz. \$7.50)	.75
8 in. ----- (doz. 10.00)	1.00
10 to 12 in.----- (doz. 15.00)	1.50
Hypericum calycinum (St. John's Wort). Bright yellow flowers. Per doz. \$1.00 to \$1.50; per 100, \$6.00 to \$10.00; large clumps, each -----	\$0.50 to 1.00
Lavender, spica. Dwarfier and more compact than the common lavender-----	\$0.25 to 1.00
Lonicera pileata. Low growing variety of spreading habit. Each -----	\$0.50 to 1.00
Veronica buxifolia. Dwarf, bright green leaves; the commonest variety.	
Small plants ----- (doz. \$1.50)	.15
Clumps ----- (doz. 2.50)	.25
Large clumps -----	\$0.50 to 1.00
Veronica Hectori. Golden-----	1.50
Veronica incana glauca. Dwarf. Silver blue foliage; flowers violet blue. Price same as V. buxifolia.	

Veronica selaginelloides. Very dwarf and compact; creeping or tufted.	
----- Per doz., \$2.50, per 100, \$15.00	.25
Vinca minor. Common periwinkle. Dark glossy leaves, pale blue flowers.	
----- (doz. \$2.50)	.25
Vinca minor variegata. Same as above but with variegated leaves.	
From pots -----	\$0.25 and .35
Vinca major. Larger leaved than V. minor. In both green and variegated leaved.	
----- (doz. \$2.50)	.25

ROCKERY CONIFER EVERGREENS

(For complete list see pages 26-30.)

Cypress nestoides. Dwarf and very graceful, growing close to the ground in a shape suggesting an inverted nest. A new variety and an excellent plant for any purpose where dwarf or procumbent evergreens are needed or in dwarf groups above rockeries. The diameter in each size as listed is about double the height.	
18 to 20 in. diameter-----	5.00
24 in. diameter -----	6.00

Coccineus. Trailing variety with cerise flowers in July -----	.20	2.00
VIOLA CORNUTA . Purple. Clumps -----	.20	2.00

GRASS FOOD FISH FERTILIZER GETS RESULTS

A court planting of our stock at The Wilsonian, University Way and East Forty-seventh Street.

Planting Ornamentals for Beauty and Profit

This home has little ground space to spare. It can not secure the appearance of privacy by distance. It achieves it by thick walls and roof. Note how our evergreens have helped it by softening the picture and balancing the heavy roof with the base planting. Now the home is protected, cozy, cheerful and attractive the year round. How much a setting of ornamental shrubbery does add beauty to a home and friendliness to a neighborhood.

The builder of this home takes advantage of the spacious grounds to get away from the confusion and publicity of the street. Blank walls alone would keep out noise and prying eyes, but never attract a friendly glance or invite the interest of refined taste. Note what is accomplished by a setting of our beautiful varied evergreen shrubbery. Looking toward the house now, one sees a home of gentle refinement in which one is sure there dwells a kindly spirit

which takes pleasure in making the home both a place of pleasant abode for the family and a source of pleasure and inspiration to the neighbors and the passersby.

The value of good ornamental shrubbery as an aid to business is fast coming to be appreciated. This is evidenced by the increasing number of such places we have been called upon to furnish.

A proper setting of ornamental shrubbery adds to any institution a value in good will and actual business returns far greater than the cost.

Tourists and homeseekers from the East expect something better here. They are attracted to hotels, apartment homes, garages, oil stations, factories, etc., that are dressed in the evergreen beauty peculiar to the Northwest.

Our dependable ornamental shrubbery draws pleased attention of prospective buyers to places of business. And it costs much less than wood, stone, paint, or glass.

ROSES

ROSE MARIE

cool. Never sprinkle the roses in the heat of the day. Keep the surface well cultivated around the plants, allowing no weeds to rob the rose of its food or sunlight. Fertilizer should be applied two or three times during the season unless the soil is exceptionally rich.

Our Roses are of the choicest, two and three year old stock. We have over two hundred varieties of the most select, new as well as old sorts. We can furnish most of them in large quantities. Write for special prices on lots of one hundred or more. **SMALL PLANTS AT LOWER PRICES.**

Rose Marie. H. T. Buds long and pointed, bloom large and well formed. One of the most attractive roses of a delightful shade of pure rose pink-----	1.00	10.00
Safrano. T. Copper apricot, semi-double -----	.75	7.50
Sensation. This beautiful new rose is a pleasing bright, yet deep, velvety red that does not fade; long pointed buds, of most perfect shape when open; borne on long stems with heavy, glossy foliage-----	2.50	25.00
Souv. de Claudius Pernet. Pern. (New) Winner of the International Gold Medal at Paris in 1920. The best yellow rose ever introduced for garden culture. Clear shining yellow with no tinge of orange and without the faded or white edges so common to many yellow varieties. Beautifully formed, elongated buds open flowers very double—a vigorous grower with clean shining foliage -----	2.00	20.00
Souv. de George Beckwith. Per. New. Shrimp-pink shaded to chrome and deeper yellow; of vigorous habit and free blooming. A great improvement on the Lyon-----	1.50	15.00
Souv. de Georges Pernet. Per. Oriental red tipped cochineal-carmine. Entire flower faintly shaded yellow. Very large and full on long, strong stems -----	1.50	15.00
Souv. de Pierre Notting. T. Apricot yellow blended with coppery yellow. Is large, full and fine form-----	1.00	10.00
Sunburst. H. T. Color a rich chrome yellow overlaid and shaded orange-copper with a metallic sheen-----	1.00	10.00
Sunstar. H. T. Deep orange and yellow, edged, veined and splashed crimson and vermillion. Vigorous grower; free bloomer -----	2.50	25.00
Sweet Briar -----	.75	7.50
T. F. Crozier. H. T. Large, well-formed canary-yellow flowers, produced freely and continuously-----	1.25	12.50
The Queen Alexandra Rose. H. T. One of the most unique and striking color effects in roses, the petals being deep vermillion with conspicuous orange base—reverse side richly shaded old gold. Free bloomer and fragrant-----	1.50	15.00
Tipperary. New Irish rose, bright yellow long, slender, shapely pointed buds -----	1.00	10.00
Ulrich Brunner. H. P. Cherry red-----	.75	7.50
William F. Dreer. Per. This rose of the same parentage as the Los Angeles is similar in shape and, like that variety, beautiful in all stages of development. The flowers are a silvery shell-pink suffused golden yellow -----	1.50	15.00
W. R. Smith. Creamy white with rose shadings, large and elegant-----	.75	7.50
Willowmere. H. T. Color rich shrimp pink shaded yellow at center edges of petals bright rosy carmine about the same as Lyon, except it is a strong, robust grower-----	1.00	10.00
Winnie Davis. H. T. Light lively pink, of very good habit-----	.75	7.50

SENSATION

ROSES—Continued

SUNBURST

ROSA RUGOSA AND OTHER BEDDING ROSES

Rosa Rugosa and their hybrids are very hardy, they will stand the coldest climate and do well under most trying conditions, the seashore, mountains or Alaska; are excellent for covering steep banks and for planting among native shrubbery. They make well-branched, dense, compact bushes from 4 to 8 feet high, with a shiny, dark green, thick, leathery foliage which is oddly wrinkled. Some bloom all summer, others but once; however, the flowers are followed by a profusion of orange, red and crimson fruit. They are remarkably free from insect pests and disease.

	Each	Doz.
Austrian Copper. Austrian Briar. Strong erect grower of stately appearance—excellent for planting in borders, alone or with other shrubs. Flowers single bright coppery red, reverse of petals golden yellow—	.75	7.50
Belle Poitevine. H. Rug. Large double flowers of clear magenta-pink. Vigorous and free flowering—	.75	7.50
Conrad F. Meyer. Rugosa Tea, very large, double, hardy, color clear, silvery pink —	.75	7.50
Rosa Hugonis. This spectacular rose blooms very early. The gracefully arching branches of the previous years growth become lined to the very tip with closely set wide open, single flowers like dainty yellow hollyhocks, bending over with the weight of the blooms. For planting among shrubbery this unique rose has few equals, the growth is symmetrical, being about six feet in height and the same in diameter when fully matured—	1.50	15.00
Rosa Rugosa Alba. Pure white, single —	.75	7.50
Rosa Rugosa Rubra. Bright red, single —	.75	7.50
Rosa Wichuraiana. W. White memorial rose, very hardy, creeping, single —	.75	7.50

MOSS ROSES (BUSH)

Crested Moss. Pink, free from mildew —	.75	7.50
Glorie of Mosses. Beautiful blush, large —	.75	7.50
Red Moss —	.75	7.50
White Bath. Pure white, very mossy —	.75	7.50

CLIMBING ROSES

	Each	Doz.
American Pillar. Large single, bright rosy pink approaching carmine. Grows in heavy clusters—	\$0.75	\$ 7.50
Aviateur Bleriot. Beautiful saffron yellow, a thrifty grower and profuse bloomer —	1.00	10.00
Climbing American Beauty. Dark pink —	.75	7.50
Climbing Belle Siebrecht. H. T. Clear bright, pink, extra big —	.75	7.50
Climbing Cecil Brunner. Pol. Pink—	.75	7.50
Climbing Frau Karl Druschki. H. P. Pure white long pointed bud—	.75	7.50
Climbing Gen'l. McArthur. True Sport from Dwarf Variety—New—	1.00	10.00
Climbing Gruss An Tepitz. Intense bright scarlet —	1.00	10.00
Climbing Hoosier Beauty. Velvet crimson —	1.50	15.00
Climbing J. B. Clark. H. P. A rapid climber; color identical with dwarf variety —	1.50	15.00
Climbing Jonkheer J. L. Mock. Identical with dwarf variety except good climber —	1.50	15.00
Climbing Kaiserin. H. T. White, see the Dwarf varieties —	.75	7.50
Climbing Lady Hillingdon. T. This is a valuable addition to the list of climbers. The color is the same as the well-known Lady Hillingdon—	1.50	15.00

	Each.	Doz.
Climbing Mme. C. Testout. H. T. —	.75	7.50
Climbing Maman Cochet. Pink—	.75	7.50
Climbing Maman Cochet. White—	.75	7.50
Climbing Ophelia. Identical with the dwarf Ophelia —	1.50	15.00

PAUL'S SCARLET

ROSES—Continued

DUCHESS DE AUERSTAEDT

Climbing Richmond. H. T. Color, bright red. Well shaped buds, free and continuous bloomer-----	1.50	15.00
Climbing Sunburst. Identical with dwarf Sunburst; a good climber---	1.00	10.00
Climbing Virginia Cox. Dark red, similar to Gruss An Teplitz-----	1.00	10.00
Crimson Rambler. Red, cluster-----	.50	5.00
Desire Bergera. Unique in color being coppery pink on the outside and coppery red on the inside-----	1.25	12.50
Dorothy Perkins. Pink, fine foliage, will not mildew-----	.50	5.00
Dr. Van Fleet. Pink-----	.75	7.50
Duchess de Auerstaedt. Improved Marechal Neil-----	1.00	10.00
Excelsa (Wich.) (Red Dorothy Perkins). Brilliant red, free bloomer--	.75	7.50
Flower of Fairfield. Red-----	.75	7.50
Glorie De Dijon. T. Rich amber yellow-----	.75	7.50
Hiawatha. T. Single, ruby crimson, large single flowers-----	.50	5.00
Lamarque. N. White shaded lemon, early free bloomer, large and sweet scented-----	.75	7.50
Marechal Neil. T. Yellow-----	1.00	10.00
Mme. Alfred Carrier. White-----	.75	7.50
Paul's Scarlet. W. No other rose can compare with this for brilliancy of color, which is a vivid scarlet. The flowers are semi-double and produced in clusters. It is of strong climbing habit and perfectly hardy	1.00	10.00
Silver Moon. Pure white, cluster----	.75	7.50
Wm. Allen Richardson. Chrome yellow with orange center-----	.75	7.50

STANDARD ROSES

These Are Good, Well-Formed Heads on 4 to 5-Foot Stems. For description see general list of Roses.

	Each		Each

Hugh Dickson-----	3.00- 3.50	Sunburst-----	2.50- 3.00

Roses listed by color on page 51

DIRECTIONS

For handling Rose Bushes

Upon receiving from the nursery:

1. Keep moist until planted.
2. Prune back to about eight inches.

3. Firm well rich soil about roots.
4. Soak thoroughly upon planting.

For best blooms continue to water well, keeping the soil constantly moist throughout the growing season.

POTTED ROSE BUSHES

For the convenience of our customers we also offer potted rose bushes in leading varieties which allows late planting with safety, even when in leaf and full bloom. We have been meeting an increasing demand for these roses for shipment to Alaska after June 1st.

For roses in pots add 25c each to the prices listed.

Packing free, f. o. b. Seattle.

A Prize Winning Exhibit of Malmo Ornamentals—Seattle Rose Show 1925

PEONIES

Between the magnificent Rhododendron and the lovely June Rose, comes the Peony. It is used in the same way and in conjunction with its two stately rivals, to continue a bold color display from May to July. While in close harmony with the other, the Peony is more lavish in its bloom and makes the most pretentious show; besides which it is hardier than either and more easily cultivated. Modern culture has developed many superb varieties, with the most delicate tints as well as the most intense colors. Their cut blooms are very lasting, and in most cases are exquisitely scented.

Culture. Peonies are of easy culture being extremely hardy and abundantly repaying proper care. They should be planted early in the fall or winter in deep, rich, well-prepared soil, covering the buds but an inch or two. Do not expect too much of them the first year, as they are a little slow in establishing themselves. Ask for prices on quantity.

	Each	Doz		Each	Doz
Albatre. Midseason. Very large. Color milk white, with a few delicate pencilings of carmine on edge of central petals. Free blooming. Fragrant -----	\$1.25	\$12.50	Edulis Superba. Very early. The Decoration Day Peony. A clear mauve-pink with silvery reflex. Fragrant -----	.50	5.00
Charlemagne. Late. Large double flowers of lilac-white with salmon-pink center. Free flowering -----	.75	7.50	Eugene Verdier. Late. Color delicate hydrangea-pink with outer guard petals lilac-white. Very erect with extra strong stems. Free bloomer -----	1.25	12.50
Claire Dubois. Midseason. Rich, clear, satiny-pink with a pronounced silvery sheen. Very large and double -----	1.50	15.00	Felix Crousse. Midseason. Large, compact flowers of a rich, even ruby-red having none of the purple or crimson shades. Exceptionally brilliant and effective -----	1.00	10.00
Dorchester. Very late. Color salmon-pink; habit upright -----	.50	5.00	Festiva Maxima. Early. The finest white peony. Good cut flower. Fragrant -----	.75	7.50
Duc de Wellington. Midseason. Enormous snow-white blossoms borne on strong, upright stems. Free flowering and fragrant. An ideal cut flower -----	.75	7.50	General Bertrand. Early pink, will bloom with <i>Officinalis Rubra</i> -----	.50	5.00
Duchess d'Orleans. Midseason. Dark carmine pink with soft pink and salmon center. Vigorous grower. Fragrant -----	.50	5.00	General Dodds. Late. Very large globular flowers of an even shade of dark rose. Tall, strong grower and free bloomer. Very fine -----	.75	7.50
Elegantissima. Large, delicate pink, a good cut flower sort; fragrant -----	.75	7.50	Glory de Boskoop. Pure white. Tall strong grower; a choice variety --	1.00	10.00

PEONIES—Continued

Each	Doz.	Mlle. Leonie Calot. Midseason. One of the most beautiful peonies being a delicate rose-white with soft lilac-pink center; tall grower and exceedingly free bloomer	1.00	10.00
		Officialis Alba. Double white	.75	7.50
		Officialis Rosea. Large double pink	.75	7.50
		Officialis Rubra. Earliest dark red	.75	7.50
		Queen Victoria. Early. White, faint blush tint when in bud	.50	5.00
		Rosea. Late, dark red, rather small bloom	.50	5.00
		Double Pink	.50	5.00
		Double Red	.50	5.00
		Double White	.50	5.00
		Double Mixed (Big clumps \$1.00)	.50	5.00

CANNAS

CULTURE. Cannas require little or no care after planting. They are unsurpassed for effectiveness when properly planted and carefully arranged as to color. The best effect is obtained by planting a large quantity of one kind, either in rows as borders, or in large round or oval beds, setting the plants about 2 feet apart. In small circular beds the plants require closer setting. Plant in rich, loam soil in a sunny exposure. In the Puget Sound region, where the summer is not hot, the foliage will not burn.

To prepare a canna bed dig to a depth of 1½ to 2 feet placing in the bottom of the bed or trench ½ to 1 foot of stable manure (horse or chicken manure). This will produce bottom heat as well as being good for the plants during the growing season. The bottom heat will cause the cannas to bloom much earlier and produce larger flowers. If chicken manure is used mix same with a generous amount of straw. The manure should be well tramped down to prevent the sinking of the bed when the same rots. Fill in enough soil on top of the manure to make the plants set about 2 or 3 inches above it. The soil used should be good garden soil enriched with well rotted manure or good commercial fertilizer.

Dry Bulbs
(Postpaid)
Each. Doz

Dry Bulbs
(Postpaid)

Hungaria. Best pink canna; flowers very large with broad petals; color pure La France pink with satin sheen; height 3 to 4 feet; of very compact growth; color of leaves bluish green. Plants from 3 or 4 inch pots—each, 45c; doz., \$4.00 .30 2.50

King Humbert. Flowers bright, orange-scarlet of orchid type; large size; foliage a dark rich bronze color; height 4 to 5 feet. One of the most wonderful flowering and foliage plants. Plants from 3 or 4 inch pots—each, 35c; doz., \$3.50 .20 1.75

Yellow King Humbert. (Giant Canna.) A sport from the well known King Humbert with all its good habits. Flowers deep, rich, yellow with bright red spots, measuring 5 to 7 inches across. Dark green foliage. Plants from 3 or 4 inch pots—each, 35c; doz., \$3.50 .20 1.75

Beaute Poitevine. Largest and best crimson; 3½ ft. .15 1.50

Buttercup. A true buttercup yellow .15 1.50

David Harum. Flowers vermilion-scarlet; bronze colored foliage; 3½ ft. .15 1.50

Florence Vaughan. Yellow, spotted crimson; 5 ft. .15 1.50

Gold Bird (Oiseau d'Or). Bright yellow with red spots. .20 1.75

King of Bronze. Deep bronze foliage with small red flowers; 5 to 6 ft. .15 1.50

Madam Crozy. Vermilion with gold border; an old standard; 4 ft. .15 1.50

Maros. Almost pure white .15 1.50

Meteor. Immense brilliant crimson heads; spikes large; 4 ft. .20 1.75

Queen Charlotte. Orange-scarlet with gold band; 4 ft. .15 1.50

Niagara. Deep crimson with wide irregular border of deep golden-yellow; 3 ft. .15 1.50

Uncle Sam. Clear deep orange-scarlet orchid flowering; 5 to 6 ft. .15 1.50

CANNA—Yellow King Humbert

DAHLIAS

90% of the Varieties on This Selected List Are Prize Winners as Quality Specimens

The Dahlia flaunts its vivid hues far into the autumn, when more timorous blooms have withered. In addition to its utility as a cutflower it is unrivaled for use along borders or in backgrounds of shrub groups to provide a note of color.

The following list, comprised of the finest new and most popular Dahlia creations, is the result of careful elimination and selection from the various types. The Dahlia world is a crowded one and, therefore, we have made up this selective list in order to aid Dahlia lovers in choosing the best varieties.

Culture. The tubers should be planted in the spring in good garden soil which has been spaded or ploughed, well pulverized and thoroughly worked. In planting the tuber is laid flat in the ground from four to six inches deep, according to the soil conditions, the loam covering should be thoroughly mixed with a good commercial fertilizer, taking care that no clear fertilizer comes in contact with the plant. During the midseason another handful or two of fertilizer may be hoed in around the base of the growing plant. The Dahlia is readily grown thriving best under deep cultivation, good drainage, a liberal supply of humus, good circulation of air and plenty of sunshine and moisture.

It will be noted that the Dahlia prices vary—the new and improved varieties being higher priced. However, the quality in all cases is our same superior standard.

CACTUS DAHLIA

CACTUS AND HYBRID CACTUS

Key: C. Cactus; H. C. Hybrid Cactus.

	Each	Doz.
Ballet Girl. C. Orange-red at base, white tips and variegations. An entirely new color effect of real beauty. Very large. Color varies in different flowers -----	1.00	10.00
Bertha Horne. H. C. Golden yellow and bronze; beautiful large flowers; dwarf habit.-----	.50	5.00
Dardanella. H. C. Tawny scarlet, tipped orange, shaded bright gold. A very fine cutflower, extra large, one of the best dahlias in cultivation.-----	1.00	10.00

			Vivid. Brilliant red -----	.25	2.50

FIELD OF CONIFER EVERGREENS AT GEORGETOWN

GLADIOLI

This beautiful class of summer and autumn-flowering bulbs, deriving its name from the latin "gladius" meaning sword, has attained great popularity owing to the wide range of color, long blooming season and ease of culture. For garden decoration they may be planted by themselves, or promiscuously in the shrubby border where their long, colorful spikes make a pleasing effect. For cut-flowers, and as such they rival any other flower lasting from five to ten days after cutting by daily changing the water and removing the withered blossoms, they may be planted in rows to facilitate cultivation.

Culture. Gladioli are planted in the spring in a good garden soil, though they thrive particularly well in a sandy loam, making successive plantings about fifteen days apart to insure continuous blooming till frost. When the tops have turned completely brown in the fall the bulbs may be lifted and stored in a cool dry place until the following spring.

	Each	Doz
Alice Tiplady. See Primulinus.		
America. Clear, soft flesh pink-----per 100, \$4.00	.05	.50
Anna Eberius. New. Reddish purple, shaded cardinal on lower lips-----per 100, \$10.00	.15	1.50
Baron Joseph Hulot. Deep indigo blue-----per 100, \$7.50	.10	1.00
Catherina. Blue. Lower petals deeper blue, with brownish red spot -----per 100, \$10.00	.15	1.50
Crimson Glow. New. Vivid scarlet-red, lighter throat. Very beautiful-----per 100, \$10.00	.15	1.50
Evelyn Kirtland. Pink with brilliant scarlet blotches on lower petals-----per 100, \$7.50	.10	1.00
Etendard. Immense orchid-like flowers four inches and over across. Upper petals rich, cream tinted rose, lower petals marked with large fiery-red blotches, clearly margined with bright yellow. An exceedingly rich color combination-----per 100, \$15.00	.20	2.00
Flora. Golden yellow. Very large. Strong grower	.10	1.00
General Joffre. This is the improved "War," a healthy grower easily forced. Color, deep blood red, like "War." Tall and stately; produces large flowers -----per 100, \$7.50	.10	1.00
Glory of Kennemerland. Beautiful rose-colored with artistic ruby blotches on yellow ground. Immense perfect flowers on a straight spike-----per 100, \$10.00	.15	1.50
Golden Measure. (L. M.) Pure yellow, self color. Tall straight spikes. Flowers large, excellent substance. Many blooms open at one time. The best yellow Gladiolus -----per 100, \$10.00	.15	1.50
Goliath. An improvement of "Empress of India." Purplish maroon. Large flower -----per 100, \$7.00	.10	1.00
Gretchen Zang. Unusually attractive. Large sparkling bloom of a beautiful shade of soft pink blending into scarlet on lower petals. Especially adapted for the cutflower trade-----per 100, \$7.50	.10	1.00
Halley. Delicate salmon pink with creamy blotch. Very early -----per 100, \$4.00	.05	.50
Each Doz.		
Mrs. Doctor Norton. (M.) La France pink shading to a very pale pink throat. Large flowers of a fine substance -----per 100, \$10.00	.15	1.50
Mrs. Frank Pendleton. An elegant rose pink blended with white. Large carmine blotches on lower petals. A tall, strong grower-----per 100, \$6.00	.10	.85
Mrs. Watt. Glowing American Beauty shade of wine-red. Well open flowers on an erect spike-----per 100, \$7.50	.10	1.00
Muriel. New. When in full bloom a beautiful orchid shade, with purple blotch on lower petals. The best lavender -----	.35	3.50
Niagara. A light primrose yellow, slightly tinted with rose pink in throat; large open flowers on a strong spike-----per 100, \$6.00	.10	.75

Herada. New and elegant. The blooms, which are of immense size, are pure mauve, glistening and clear. Tall, straight spikes.

-----per 100, \$7.50 .10 .100

Kunder's Foch. Orange flame----- .25 2.50

Liebesfeuer. Flaming red-----per 100, \$10.00 .15 1.50

Lily White. Early white. An early forcer and a prolific bloomer. -----per 100, \$7.50 .10 1.00

Le Marechal Foch. Very delicate pink A seedling of "America," producing flowers twice the size of its parent. An early forcer-----per 100, \$4.00 .05 .50

Majestic. New. Flaming orange with cream throat----- .25 2.50

Mrs. Francis King. Scarlet, crimson blotch-----per 100, \$4.00 .05 .50

Field of Peonies in Bloom in Our Nurseries at Georgetown

JAPANESE LILIES

Lilies planted outdoors during the fall or early spring, flower each year from June to October. After bulbs are set out they should remain undisturbed for five or six years. They will increase in size, beauty and number of flowers; our Coast climate being perfectly suited to their requirements. They may be planted in open ground or in beds and are very effective when planted in a border either alone or among perennials or shrubbery. Malmö pays the postage.

LILIUM AURATUM—Golden Banded Lily of Japan

LILIUM REGALE (Myriophyllum)

Selected Holland Bulbs

For Fall Planting

Unrivalled for Color Brilliancy

YOUR Spring garden is not complete without the radiant beauty of flowering Holland bulbs—their lovely cups brimming with rainbow hues. Fragrant and colorful are the blooms, in vying shades of purest white, clearest yellow, brightest red.

These beautiful Spring bulbs, including the Hyacinths, Narcissi, Tulips, Crocus, Scilla, find friendly soil in the Puget Sound region, and thrive with a minimum of care.

During the 1926 Fall planting season, we will supply the large demand for Narcissi from our own plantings, as the embargo effective January 1, 1926, banned importation from Holland.

Fall Bulb Supplement Ready for Mailing October 1

Cape Code. Pink, very large	1.50	15.00

LILY OF THE VALLEY

One of the most charming spring flowering plants, producing in profusion its delicate bell-shaped, delightfully fragrant white flowers. They thrive best in a rich sandy soil and a shady situation—are perfectly hardy and can be left undisturbed in the open ground, where they will increase from year to year, and are very attractive in beds or borders. For outdoor planting and winter forcing pips are ready December to March.

Selected Pips, for forcing indoors or planting

PERENNIALS

While all plants that bloom every year are perennial (per annual) the common meaning refers to hardy garden flowers which die down to the ground at frost, coming up again in the spring and blooming again each year. The growing popularity of this class is not surprising when it is considered they give such an ever changing array of color in the garden without the yearly replacement that annuals require. Most varieties, moreover, remain green all winter in our mild climate.

Perennials of suitable habit may be used to brighten the shrub group or used by themselves in a border in an unlimited number of color combinations according to the individual taste.

Small plants in most instances if started the previous season will bloom better than older clumps, which usually are root bound. There are exceptions to this such as Peonies, Lilies and others. Many varieties will begin to fail the second and third years if not dug and divided. Some of the short lived perennials are Foxglove, Sweet William, Hollyhock, some of the Larkspurs and Campanulas, Snapdragons and Pansies. The line of demarkation between Perennials and Biennials, or two-year subjects, is indistinct.

In nearly all cases better results will be secured if deep rich soil is supplied that is well drained and that is kept continually moist, especially until the plants have become well established. A longer period of blooming is possible if flowers are removed before the seed pods form.

As an aid to proper planting as regards height an additional list will be found at the end of this section showing relative heights of different varieties.

Quantity prices: 15c plants, \$10.00 per 100; 20c plants, \$15.00 per 100; 25c plants, \$18.00 per 100; 30c plants, \$22.50 per 100; 35c plants, \$25.00 per 100.

	Each	Doz.
ACANTHUS. Foliage of bold habit, dark green, deeply cut. The leaf forms the famous design for the top of the Corinthian column in classic architecture.

DIGITALIS (Foxglove).		
Gloxiniæflora. Finely spotted, white, purple and rose-----	.20	2.00
Canariensis-----	.20	2.00
DORONICUM. Early spring flowering; vigorous growth. Will thrive in any soil or location. Large yellow daisy-like flowers. 2 ft.-----	.25	2.50
ERICA. See Heather in Broad Leaved Evergreens.		
ERIGERON (Fleabane).		
Purple-----	.25	2.50
ERYNGIUM (See Holly). Handsome blue ornamental flower-heads. Can be used as cutflowers or dried for winter bouquets. 2-3 ft. July-September-----	.25	2.50
EULALIA JAPONICA (Japanese Ribbon Grass). Long, narrow, graceful green foliage; when in flower the attractive plumes are 6-7 ft.-----	.25	2.50
EUPATORIUM (Mist-flower or Thoroughwort).		
Ageratoides. Numerous compound heads of pure white flowers, useful for cutting. 3 ft. August-September-----	.25	2.50
FEATHER GRASS. See Stipa Pennata.		
FERNS, HARDY -----	.50 to 1.00	
FEVERFEW. See Matricaria.		
FLAX. See Linum.		
FORGET-ME-NOT. See Myosotis.		
FOXGLOVE. See Digitalis.		
FUCHSIA RICCARTONI. Hardy fuchsia with dark bronzy green foliage, bright scarlet flowers. Usually dies to the ground in winter but comes up again in the spring. 3 ft. Blooms all summer-----	.25	2.50
GAILLARDIA Grandiflora (Blanket Flower). A hardy plant with gorgeous coloring, the center being dark red-brown, while the petals are marked with rings of brilliant crimson, orange and vermillion, and often a combination of all in one flower; excellent for cutting. 2 ft. June-Oct.-----	.20	2.00
GEUM. Richly colored, free blooming plants, excellent for cutting.		
Mrs. Bradshaw. Double brilliant scarlet. 1-2 ft. All summer-----	.25	2.50
Lady Stratheden. Double golden yellow. 1-2 ft. All summer-----	.25	2.50
GLADIOLUS. See pages 56-57.		
GOLDEN GLOW. See Rudbeckia.		
GYNERIUM Argenteum (Pampas Grass). Plumes 4-6 ft.-----	.25	2.50
GYPSOPHILA (Baby's Breath).		
Paniculata. An airy mass of delicate misty bloom. Excellent for cutting or for dried bouquets. 2-3 ft. June-August-----	.25	2.50
Paniculata Flore Pleno. New. Double, with larger flowers of a purer white-----	.50	5.00
HELIANTHEMUM (Sun Rose). Evergreen plants flowering throughout the summer in brilliant colors. Good for dry sunny situations, or for rockwork-----	.20	2.00
HELIANTHUS (Hardy Sunflower). 4-6 ft. Autumn-----	.20	2.00
HELIOPSIS (Orange Sunflower).		
Zinniaeflora. (Hardy Zinnia) 3 ft. Fine for cutting-----	.20	2.00
HEMOROCALLIS (Yellow Day Lily). Has tall graceful grass-like foliage which sets off the yellow flowers very effectively. In good soil should be left undisturbed for years. 3 ft. June-----	.25	2.50
HEUCHERA (Alum Root or Coral Bells). From a tuft of heart-shaped leaves spring the slender stalks which bear the small bell-shaped flowers in panicles, giving a delicate and airy effect. Good for cutting.		
Brizoides. Lighter than Sanguinea, but more floriferous. May-----	.25	2.50
Sanguinea. Bright coral-red flowers. 1-1½. May-September-----	.25	2.50
Sanguinea Splendens. Dark red. 1-1½ ft.-----	.25	2.50

PERENNIALS—Continued

Each Doz.

HIBISCUS (Mallow). Beautiful tall-growing plants of the Hollyhock family. Large foliage and large, showy flowers of delicate coloring produced the entire summer.		
Moscheutos Crimson Eye. Flowers of immense size, pure white with a large crimson spot at the base of each petal. 4-6 ft. June-August-----	.25	2.50
HOLLYHOCK (Althea).		
Double. Crimson, white, pink, rose, maroon, yellow, red-----	.20	2.00
Single. Red, pink, salmon, rose, white-----	.20	2.00
HYACINTHUS CANDICANS. Twenty to thirty white, pendent, bell-shaped flowers on stalks 3 to 4 ft. high. Blooms early and until late fall. One of the best of all hardy bulbs for herbaceous border-----		
	.20	2.00
HYPERICUM. See Broad Leaved Evergreens.		
IBERIS (Perennial Candytuft).		
Gibraltarica. Largest and showiest of this genus. Flowers slightly tinged with rose. 6-10 in. Early spring-----	.20	2.00
Sempervirens. (Evergreen Candytuft). Innumerable flat heads of pure white flowers. 9-12 in. Early spring-----	.20	2.00
INCARVILLEA Delavayii (Hardy Gloxinia). Large rich rose-pink Begonia-like flowers. 1½ ft. June-July-----	.25	2.50

IRIS GERMANICA (German Iris)

Popularly known as Flag Lilies and Fleur-de-Lis, are hardy, easily grown, free-flowering, drought-resisting and many of them fine for cut flowers. They bloom here in late May and June, just after the Peonies.

The best time to plant Iris is in late July, August and September if good bloom is desired for the following June. Planting may also be done between early spring and the middle of April. German Iris when planted in the frosty winter months are sometimes subject to being winter killed.

The following list comprises the best and most popular varieties:

	Each	Doz.
Blue Jay. Standards bright, clear blue, falls intense dark blue-----	.25	2.50
Caprice. Standards rosy red, falls deeper rosy red-----	.50	5.00
Celeste. Standards and falls pale azure blue-----	.25	2.50
Doctor Bernice. Standards coppery bronze, falls velvety crimson-----	.25	2.50
Her Majesty. Standards rose pink, falls bright crimson-----	.25	2.50
Juniata. A clear violet blue. One of the best-----	.40	3.75
Lohengrin. Standards light mauve, falls violet. Large, handsome foliage and flowers-----	.35	3.50
Loreley. Standards light yellow, falls ultramarine blue bordered cream-----	.25	2.50
Nibelungen. Standards fawn yellow, falls violet-blue with fawn margin-----	.30	3.00
Rhein Nixe. Standards white, falls rich violet-blue with distinct white margin-----	.25	2.50

**IRIS KAEMPFERI** (Japanese Iris)**IRIS KAEMPFERI** (Japanese Iris).

In the Japanese Iris we have a combination of colors, form and beauty far excelling any other type. The stately flowers, if grown under favorable conditions, will often attain ten inches in diameter. The blooms, open just after Iris Germanica, come in a beautiful array of colors ranging in shades of white, lavender, blue, red and purple with yellow at base of petals forming a bright yellow throat. The plants grow from three to four feet high, and thrive best in a rich moist soil, but should not stand in water during the winter months. They may be planted any time from late August to March, and should be left alone in the ground for two or three years after which it is better to separate the clumps.

	Each	Doz.
Beauty. Double, light lilac-blue, penciled purple, standards mottled purple-----	.35	3.50
Butterfly. Double, lavender shaded darker purple, clear blue shade next to yellow throat-----	.50	5.00
Cavalier. Single, delicate rosy lilac, shaded darker on edge, center the same-----	.35	3.50
Distinction. Single, lavender shaded to red, penciled light blue, standards red and lavender-----	.35	3.50
Fairy. Double, very large, purple penciled white, standards white edged violet-----	.50	5.00
Mikado. Double, large dark purple sprinkled lavender, large yellow open throat with lavender standards-----	.35	3.50
Milkmaid. Single, large white with lavender penciled standards-----	.35	3.50

Tornado. Single, small, light reddish purple penciled darker, standards evenly shaded the same. Very attractive ----- .25 2.50

White Lady. Single, white with white standards ----- .35 3.50

SPECIAL COLLECTION—One each of any of the varieties listed; 10 for----- **3.00**

SPECIAL COLLECTION of 10 varieties, not named ----- **2.00**

Mixed, all colors, dozen----- **2.00**

IRIS PSEUDACORUS (Yellowflag Iris).

A separate class of very tall growing (3-4 ft.), heavy foliaged Iris of bright yellow, medium sized flowers. Grows well in moist or marshy places or along the water's edge without any care. Blooms between the German and Japanese. Per 100, \$15.00----- .20 2.00

IRIS PUMILA (Dwarf Iris)

The large flowered, sweet scented dwarf Pumilas which bloom in March or early April are valuable for the perennial border, edging and for the rock garden. The tufts of foliage attain 3 to 4 inches in height.

Cyanea. Blue ----- .25 2.50

Snow-top or Schneekuppe. White----- .25 2.50

KNIPHOFIA (Tritoma) (Red Hot Poker). One of the most striking of autumn flowers, with tall spikes of flaming scarlet and yellow blooms. 3-4 ft. July to frost----- .30 3.00

LARKSPUR. See Delphinium.

LATHYRUS (Everlasting or Perennial Sweet Pea). A rampant grower, a good trellis plant, and adapted as a cover to wild, rough places, where it scrambles over bushes and stones.

Latifolius. Large deep red flowers on long stems in a constant succession of bloom ----- .25 2.50

Pink Beauty. Clusters of shell pink flowers ----- .25 2.50

LAVENDULA (Lavender). Dwarf, the earliest blooming and darkest in color. Suitable for borders----- .25 2.50
Larger sizes .50 to 1.00.

Lavendula Vera. True Lavender. The taller growing variety----- .25 2.50
Larger sizes .50 to 1.00.

BEDDING PLANTS

We offer a complete selection of Bedding Plants, both potted and grown in flats. These are ready for planting out when warmer weather begins in the last part of April, after which they are on display at our store.

WINDOW BOXES PLANTED

Large Flowering Hybrids Mixed-----	.20	2.00
PAPAYER Nudicaule (Iceland Poppy). Dwarf, producing small delicate flow- ers of orange and yellow shades. 1 ft. All summer -----	.20	2.00
PEONIES. See Peony Section.		

**PERENNIAL PHLOX****PHLOX.**

This group is among the showiest and most satisfactory of plants for the garden owing to their neat habit, good foliage, bright-colored flowers, profuseness of bloom and ease of culture. The panicles in some cases are a foot long made up of numerous small, compact blossoms resembling the hydrangea. For color effects the Phlox is unsurpassed, especially when used in the perennial border in masses of six or more of the same color. One example would be to begin at one end of the Phlox section with masses of pink followed by other variations of the pinks, such as rose, pink with a white eye or carmine eye, salmon-pink, carmine, etc., orange and red with occasional groupings of white for contrast. In another place in the border groups of the purple, lavender and mauve shades also interspersed with clusters of whites should be used.

Culture. Phlox requires a rich, moist soil allowing enough space for each clump to fully develop.

	Each.	Doz.
Aleste. Lavender with pink center. 2-3 ft. July-November-----	.25	2.50
Athis. Deep clear salmon pink-----	.25	2.50

An Example of What a Garden Can Do for a Back Yard

The Necessity of Adequate Watering

The light rains experienced during much of the year in this section are deceiving in making it appear that trees and shrubbery are receiving adequate moisture when, as a matter of fact, these light showers affect only the surface and hardly ever penetrate deep enough to wet the roots. It is especially important that new plantings should be well watered regardless of rain, especially during the first season after planting.

The functioning of the fine fibrous roots in moisture absorption is dependent on a firm contact with the surrounding soil. Regardless of how carefully transplanting is done this delicate connection is disturbed to an extent which necessitates two or three times as much water as will be required after the first season when the roots have become firmly established.

It is best to maintain saucer-shaped ridges of soil about each of the larger plants, that sufficient water may be held near the plant until the same has had time to soak down through the soil to the bottom of the ball of roots. In addition to soaking the roots twice a week, the tops of evergreens should be sprinkled once a day during the first summer after transplanting.

In starting new lawns it is of vital importance that the surface of the soil should be kept continually moist until the roots have attained sufficient length to penetrate down to continual moisture. This may necessitate light sprinkling several times daily on the warmer days during the first few weeks after sowing.

Only with adequate use of water can plants be expected to live and grow luxuriantly.

Heavenly Blue. New. Beautiful pure delphinium blue with no trace of violet. Flowers of immense size, well placed on long stiff stems-----Pkt. 25c; Oz., \$1.75

SPENCER SWEET PEAS GIANT WAVED ORCHID FLOWERING

This group includes the largest and most beautifully formed Sweet Peas. The Spencers have very large waved flowers which are produced abundantly on long strong stems, making the blossoms most desirable for cutting. They attain their great perfection on the Pacific Coast where they are grown extensively for seed, furnishing the greater part of the supply for the entire country.

CULTURE. Sweet Peas require good soil and plenty of water. On Puget Sound they may be planted from October till Christmas, for early Spring flowering. Most seasons they come through without any protection, but a few inches of straw placed on the row will insure sufficient protection against the frosts usually experienced here. Plant in the Spring as early as the ground can be worked.

The best method of planting is to dig a trench 12 to 18 inches deep. If the soil is not good, remove the poor soil and supply a good quality, using plenty of fertilizer, which should be well mixed with the soil, filling up the trench to within three or four inches of the top. On top of this mixture of soil and fertilizer, place about one inch of good mellow soil without any manure or fertilizer in it, on which to sow the seed. Cover the seed one-half to one inch with soil, a half inch being preferable. The trench should always be kept open an inch or two from the top in order that water used will lead to the plants. Sweet Peas require more moisture than most other plants, and whenever it is necessary to water them, soak them thoroughly. When the seeds are well up, thin them out and when grown to one or two inches, fill in some more soil around them.

When the Peas are in bloom they should, unless grown for seed, be cut every day. If this is done they will produce better blooms on longer stems and blossom profusely all through the season.

One ounce will plant a 15 to 20 foot row.

Malmo's Mixed Spencer Sweet Peas

This is made up from standard varieties named Spencers, properly blended, and is an ideal combination for those who want a variety of color.

Pkt., 10c; oz., 25c; $\frac{1}{4}$ lb., 75c; 1 lb., \$2.50 (Postpaid)

NAMED VARIETIES SPENCER SWEET PEAS

WHITE		Pkt.	Oz.		
King White. Glistening white	-----	\$0.10	\$0.35	Fiery Cross. Standard fiery red or rich crimson, fluted wings rich cherry orange	.10 .50

STATICE

STATICE.

Pkt. Oz.

Sinuata. An. An everlasting flower deserving far greater popularity. Large sprays of many colored small flowers which when dried make fine winter bouquets. Mixed ----- .10 1.00

Latifolia. Per. Long panicles of small, light blue flowers, which if dried make nice winter bouquets. ----- .10 1.50

STRAW FLOWER. See Helichrysum.

SUNFLOWER (*Helianthus*). An. These comprise plants of majestic growth and immense showy flowers, suitable for shrubberies, woodlands and wild gardens. The dwarf kinds are charming when grouped in mixed flower borders.

Double Dwarf. About 2½ feet high, flowers very double, rich golden yellow ----- .05 .40

Miniature Mixed. This is a splendid cutting variety of many different colors which blend together beautifully ----- .05 .50

Double Chrysanthemum-Flowered. An excellent plant for the lawn, shrubberies or any other place where color effect is desired. The plants grow six or seven feet high, and produce a great number of double flowers of various sizes. Golden yellow ----- .05 .30

New Red Sunflower. Is of a freely-branching habit, with well-shaped, dark-centered flowers of bright chestnut red, merging to a yellow at the tips of the petals. Height 6 ft. ----- .05 .40

Perennial Mixed. Contains the finest single-flowering hardy perennial sorts. Seed sown early will produce flowering plants the first year. ----- .15 2.00

SWAN RIVER DAISY. See *Brachycome*.

SWEET PEAS. See pages 72 and 73.

Perennial. See *Lathrus Latifolius*.

SWEET ROCKET (*Hesperis*). A hardy Pkt. Oz.
perennial, growing 2 to 3 feet high. This old-fashioned, fragrant flower is of easiest culture, clusters of white and purple blossoms. Mixed ----- .05 .50

SWEET SULTAN. An. (*Centaurea Imperialis*). This is the finest of the Sweet Sultans. Beautiful, deliciously sweet-scented flowers borne on long, strong stems and are particularly striking, lasting several days after cutting. Mixed ----- .10 1.00

SWEET WILLIAM (*Dianthus barbatus*). Per. A sweet scented perennial for bedding and borders, forming fine clumps and lasting for several seasons.

Scarlet Queen ----- .15 2.00

Pink Beauty ----- .15 2.00

Salmon Queen ----- .15 2.00

Newport Pink ----- .15 2.00

Single Mixed ----- .05 .50

Giant Double Mixed ----- .10 2.00

TASSEL FLOWER. See *Cacalia*.

THUNBERGIA (*Black Eyed Susan*). Beautiful, rapid-growing annual climbers, preferring a warm, sunny situation; used for hanging-baskets, vases, low fences, etc., flowers in buff, white, orange, etc., with dark eyes. 4 ft. Mixed colors ----- .10 1.50

TRITOMA (*Red Hot Poker*). Per. The flower spikes are of gigantic size; frequently 4½ feet high, with heads of bloom of a rich orange-scarlet, shading to salmon-rose at edge. Flowers from July until frost ----- .10 2.50

VERBENA. An. Verbenas thrive in almost any situation and in all good soils. They make attractive borders and beds, blooming profusely from June until October. Fine for pot culture.

Defiance. Scarlet ----- .10 3.00

Mayflower. Pink ----- .10 3.00

Mammoth Mixed ----- .10 2.00

Mammoth Purple ----- .10 2.00

Mammoth White ----- .10 3.00

VEGETABLE SEEDS

Prices Postpaid Only on All Packets and Other Seeds Where Noted

ASPARAGUS

This is one of the earliest spring vegetables, and it delights in a moist, sandy soil, but can be grown in any garden by following the directions given here. A bed 15x50 feet requires about 150 plants.

CULTURE. Beds are usually formed by setting plants one to three years old (which we carry in stock). The permanent beds should be prepared by deep plowing or spading and thoroughly enriching the ground with stable manure or other fertilizers. If the sub-soil is not naturally loose, it should be made so by thoroughly stirring with a sub-soil plow or the spade. Set the plants about four inches deep and one to two feet apart in rows three to five feet apart. After the plants are well started give frequent and thorough cultivation. Early the next spring spade in a heavy dressing of manure or other fertilizer and one quart of salt to each 100 square feet, and cultivate well as long as the size of the plants will permit it or until they begin to die down. The next season the bed may be cut over two or three times, but if this is done all the shoots, no matter how small, should be cut, and after the final cutting, give a good dressing of manure, ashes and salt, and frequent cultivation until the plants meet in the rows. In autumn, after the tops are fully ripe and yellow they should be cut and burned. If well cultivated and manured the bed should give a full crop the following season and continue productive for eight or ten years. Seeds should be soaked in warm water for 24 hours before planting.

Conover's Colossal. A mammoth green sort of the largest size and good quality. Pkt., 5c; oz., 10c; ¼ lb., 35c; postpaid.

Palmetto. Early green, for home and market. Pkt., 5c; oz., 10c; ¼ lb., 35c; postpaid.

ASPARAGUS PLANTS

See Vegetable Plants and Roots listed with Small Fruits on page 8 in the Nursery Section

ARTICHOKE

Globe Artichoke. Cultivated for its flower-heads which are cooked like asparagus. Plants set in any good soil, with slight covering in winter, will remain in bearing several years. Used also for ornamental purposes.

Green Globe. Pkt., 10c; oz., \$1.00. Postpaid.

Jerusalem (Tubers). This variety is not produced from seed. It is cultivated for its tubers, which are especially valuable for stock feeding on account of their great fattening properties. They are well adapted to any soil, where potatoes can be grown, and are the best hog food known. They should not be dug in the fall, but the hogs turned into the field to help themselves by rooting for them. 1 lb., 10c; 3 lbs., 25c; 10 lbs., 75c. Postage extra. Write for prices on larger quantities.

Our Seed Department

Our constant policy to furnish only reliable select seeds that have been tested to grow is responsible for the continued growth of our seed department. The following extract is typical of unsolicited comment:

*Malmö & Company,
Seattle, Wash.*

Dear Sirs:

" * * inclosing another order. I must send to you for my seeds as they are so reliable. Last year I believe I raised the finest sweet peas that ever grew in the ground. Everyone wanted to know where I bought my seed. I have sent everywhere for seeds and bulbs, but have decided from now on to do my shopping in that line with you."*

*Yours truly,
A. L.*

(Original letter on file.)

BEANS

CULTURE. A light loam is required for a perfect crop. Plant as soon as the ground has become thoroughly warm, about May 1st, in rows from two feet for hand cultivation to three feet apart for horse cultivation. Cultivate thoroughly and often, keeping a mulch of loose soil at all times. When beans are in bloom cultivate shallow, as deep cultivation at the time causes many blossoms to drop, decreasing the yield. For a succession plant every two weeks. One pound per fifty foot row.

BUSH BEANS—DWARF WAX OR YELLOW PODDED VARIETIES

Pkts., Postpaid. By weight. Postage Extra.
Black Wax. The earliest wax podded beans;

Pods tender and stringless; seeds black.
 Pkt., 10c; lb., 35c; 10 lbs., \$3.00.

Davis Wax. The most hardy and productive wax bean. Pods long, white, straight, crisp and tender. Vine is rustless and vigorous, bearing the pods in clusters. Seeds white, excellent for baking and canning.
 Pkt., 10c; lb., 35c; 10 lbs., \$3.00.

Golden Wax. One of the earliest and best. Plants erect, compact, and very productive. Pods of medium size, broad, flat, golden yellow, very fleshy.
 Pkt., 10c; lb., 35c; 10 lbs., \$3.00.

Jones' Stringless. Pods long, flat, clear waxy white and do not stain in canning. Good shipper.
 Pkt., 10c; lb., 35c; 10 lbs., \$3.00.

Wardwell's Kidney Wax. Variety maturing a little later than the Golden Wax; long, broad, light golden yellow pods. Of the best quality.
 Pkt., 10c; lb., 35c; 10 lbs., \$3.00.

BUSH BEANS—DWARF GREEN PODDED VARIETIES

Canadian Wonder. A hardy variety bearing long green pods of good quality. The seed is a rich mahogany red.
 Pkt., 10c; lb., 35c; 10 lbs., \$3.00.

Dwarf Horticultural. Absolutely stringless. Desirable for slicing when young. Pods medium length, broad, thick and splashed with red. Very desirable green shelled bean.
 Pkt., 10c; lb., 35c; 10 lbs., \$3.00.

Longfellow. Early. Long, round, green pods, solid, fleshy and exceedingly tender; no strings unless pods are quite old.
 Pkt., 10c; lb., 35c; 10 lbs., \$3.00.

Red Valentine. (Round Pod.) Early. Pods of medium length, very fleshy, tender and of good flavor.
 Pkt., 10c; lb., 35c; 10 lbs., \$3.00.

Refugee or 1000 to 1. True bush growth. Pods nearly round, pale green, fleshy, brittle and mild in flavor, but with slight strings.
 Pkt., 10c; lb., 35c; 10 lbs., \$3.00.

Stringless Green Pod. The earliest and hardiest of all green-podded sorts, large, handsome pods. Very productive. Pods perfectly round, straight, broad, tender, brittle, finest flavor, and entirely stringless.
 Pkt., 10c; lb., 35c; 10 lbs., \$3.00.

Round Yellow Six Weeks. An improved strain with tender, fleshy pods; very productive.
 Pkt., 10c; lb., 35c; 10 lbs., \$3.00.

POLE BEANS

Dutch Case Knife. Pods very large, flat. Seeds broad, clear white and of excellent quality.
 Pkt., 10c; lb., 35c; 10 lbs., \$3.00.

Kentucky Wonder. (Old Homestead.) Very vigorous and productive. Pods very long often being nine or ten inches, round, stringless and very crisp when young. One of the very best Pole Snap Beans.
 Pkt., 10c; lb., 35c; 10 lbs., \$3.00.

Kentucky Wonder Wax. Very similar to the green podded Kentucky Wonder, but the pods are a little broader. Stringless and of excellent qual-

ity. Pods long, handsome, light yellow. Its earliness and hardiness commends it for this locality.
 Pkt., 10c; lb., 35c; 10 lbs., \$3.00.

Lazy Wife. Pods long, broad, thick and fleshy. Seed white.
 Pkt., 10c; lb., 35c; 10 lbs., \$3.00.

Scarlet Runner. Rapid growing, bearing sprays of brilliant scarlet pea shaped blossoms. Used either as a snap or shell bean for eating as well as being desirable for ornamental purposes.
 Pkt., 10c; lb., 45c; 10 lbs., \$4.00.

POLE BEANS—Continued

Tall Horticultural, or Speckled Cranberry. Vines vigorous. Pods short, broad, green, streaked with bright red. Very fine quality, either as green shelled or dry.

Pkt., 10c; ½ lb., 15c; 1 lb., 35c; 10 lbs., \$3.00.

White Dutch Runner. Similar to the Scarlet Runner, but with white seed and long, thick, light green pods. Exceptionally good canned, and specially adapted to the growing conditions of the North Pacific Coast.

Pkt., 10c; lb., 45c; 10 lbs., \$4.00.

LIMA BEANS

CULTURE. Lima Beans are very tender and are liable to rot if planted in cold wet weather. Our conditions are such that they are not sure to ripen. They do, however, produce a crop of the most delicious green shell beans. They should be planted about the middle of May, 1½ inches deep, with the eye down.

Burpee's Bush Lima-Dwarf. Very large pods, excellent flavor. Seeds greenish white.

Pkt., 10c; lb., 40c; 10 lbs., \$3.50.

Henderson's Bush Lima-Dwarf. The earliest variety, fully two weeks earlier than any other; therefore especially recommended for planting

in this section. Beans small and used for canning. Pkt. 10c; lb., 40c; 10 lbs., \$3.50.

Large White Lima Pole (King of the Garden). A vigorous grower. Of good size and a flavor that is unsurpassed.

Pkt., 10c; lb., 40c; 10 lbs., \$3.50.

FIELD BEANS

Brown or Swedish. A fine field variety. The beans are brown, medium size and excellent for cooking.

Pkt., 10c; lb., 30c; 10 lbs., \$2.50.

Broad Windsor or Horse Bean. One of the finest green shelled beans. Grows on erect self-supporting stalks, two to three feet tall. Hardy.

Does particularly well in the Pacific Northwest. Seed light brown; flat very large and irregular. Pkt., 10c; lb., 30c; 10 lbs., \$2.50.

White Navy. Seeds small white. Very prolific. Our stock of this well-known variety has been carefully selected.

Pkt., 10c; lb., 30c; 10 lbs., \$2.50.

BEETS (Postpaid)

CULTURE. The best results are obtained on a deep, rich, sandy loam. If wanted very early sow such sorts as Crosby's Egyptian and Detroit Dark Red in hotbeds and transplant cutting off the outer leaves. For general crop sow in freshly prepared soil as soon as the ground will permit, in rows eight- to ten inches apart, covering about an inch deep and pressing the soil firmly over the seed. When the plants are well established thin four to six inches apart in the row.

For winter use the turnip varieties may be sown in June or July, so as to mature late in the season. The roots are stored in a cellar and covered with sand to prevent wilting, or they may be kept outdoors in pits such as are used for potatoes.

Crimson Globe. A very handsome variety of medium size, nearly globe-shaped, free from rootlets, smooth. The flesh is a rich, blood red of the best quality, sweet and tender.

Pkt., 5c; oz., 15c; ¼ lb., 40c; lb., \$1.25.

Crosby's Egyptian. More globe-shaped than Extra Early Egyptian, very early and of fine quality. Bright red with clear vermillion flesh.

Pkt., 5c; oz., 15c; ¼ lb., 40c; lb., \$1.25.

Detroit Dark Red. Roots globular; smooth with small tops; skin blood red; flesh dark red, zoned with a lighter shade; tender and sweet, a splendid variety for canning.

Pkt., 5c; oz., 15c; ¼ lb., 40c; lb., \$1.25.

Early Blood Turnip. Roots turnip-shaped, deep crimson, tender and sweet. Excellent for summer and autumn use.

Pkt., 5c; oz., 15c; ¼ lb., 40c; lb., \$1.25.

Early Eclipse. Makes rapid growth, quality fine, larger than Egyptian, but not as deep red.

Pkt., 5c; oz., 15c; ¼ lb., 40c; lb., \$1.25.

Edmand's Early Blood Turnip. A desirable second early beet. Roots nearly round, exterior dark red, interior purplish red, with little zoning; crisp, tender, sweet and an excellent keeper.

Pkt., 5c; oz., 15c; ¼ lb., 40c; lb., \$1.25.

Extra Early Egyptian Blood Turnip. Best for forcing, first early crop. Roots dark red, moderately thick; flesh dark purplish red, zoned lighter shade; firm, crisp and tender.

Pkt., 5c; oz., 15c; ¼ lb., 40c; lb., \$1.25.

Half Long Blood. Deep red variety for winter and spring use. Excellent to slice for pickles. Tops upright, exceptionally smooth leaves. Roots deep red, half long, smooth.

Pkt., 5c; oz., 15c; ¼ lb., 40c; lb., \$1.25.

Long Dark Blood. A standard late variety of very good quality which keeps well through the winter. Exterior dark purple; flesh dark red, tender and sweet. It is an excellent sort for pickles.

Pkt., 5c; oz., 15c; ¼ lb., 40c; lb., \$1.25.

Swiss Chard Giant Lucullus. This comparatively new variety is of finest quality. A strong and rapid grower, leaf stems long, broad and thick. The leaves bright green, crumpled or savoyed. Cook the stalks like asparagus. In our climate it may be left in the ground all winter and used as wanted. It will keep in good condition until late spring when it goes to seed.

Pkt., 5c; oz., 15c; ¼ lb., 45c; lb., \$1.25.

SUGAR BEETS

Klein Wanzleben. Smooth, with a broad shoulder tapering toward the base. A big yielder, grown exclusively for sugar.

Pkt., 5c; oz., 15c; ¼ lb., 35c; lb., \$1.00.

French White Sugar. Grown to a large size partly out of the ground. The upper portion is a bright rose. Flesh white.

Pkt., 5c; oz., 15c; ¼ lb., 35c; lb., \$1.00.

MANGEL WURZEL OR STOCK BEETS

Ask for Prices on Quantity.

FOR STOCK FEEDING. For main crop sow about March 1st in rows 22 inches apart, using five pounds of seed per acre. To get good, large and uniform beets, the plants should be thinned when in the fourth leaf to six inches apart in the row. Cultivate often.

Danish Sludstrup. Considered the best of all Mangels. In color it is reddish-yellow and of a distinct type. It contains the largest per cent of nutriment, is very hardy, grows well above ground and is easily pulled.

Pkt., 5c; $\frac{1}{4}$ lb., 20c; lb., 50c; 5 lbs., \$2.25.

Golden Tankard. Smooth, yellow-fleshed, roots of large diameter, with only a small tap-root. It grows largely above the soil and yields a large crop on good land, easily harvested.

Pkt., 5c; $\frac{1}{4}$ lb., 20c; lb., 50c; 5 lbs., \$2.25.

Giant Half-Sugar. The flesh is pure white, firm, and very sweet.

Pkt., 5c; $\frac{1}{4}$ lb., 20c; lb., 50c; 5 lbs., \$2.25.

Giant Intermediate (Gate Post). Large, yellow, olive-shape, with clear, white, brittle flesh, grows partly out of the ground, easy to dig.

Pkt., 5c; $\frac{1}{4}$ lb., 20c; lb., 50c; 5 lbs., \$2.25.

Mammoth Long Red. Very large. Flesh white tinged with rose.

Pkt., 5c; $\frac{1}{4}$ lb., 20c; lb., 50c; 5 lbs., \$2.25.

Yellow Globe. Large round, orange-yellow. Good for shallow soils.

Pkt., 5c; $\frac{1}{4}$ lb., 20c; lb., 50c; 5 lbs., \$2.25.

BROCCOLI (Postpaid)

CULTURE. The heads resemble cauliflower and the culture is the same. Broccoli is well adapted to those sections where the season is long, cool and rather moist. It withstands greater extremes of temperature than cauliflower. Should be planted in early summer and will produce heads early the following spring.

Early Large White French. Very hardy, the best sort for this section. The heads are white, compact, hard and of good quality.

Pkt., 5c; oz., 75c; $\frac{1}{4}$ lb., \$2.50.

St. Valentine. The best for early spring shipment, solid, handsome white heads being of immense size, ready in February.

Pkt., 10c; oz., \$1.50; $\frac{1}{4}$ lb., \$5.00.

BRUSSELS SPROUTS (Postpaid)

CULTURE. Used in the fall and early winter. Plant resembles the cabbage, the edible part being the numerous very small heads or sprouts formed on the stalk at each leaf joint. The culture is the same as for cabbage, except the leaves should be broken down in the fall to give the little heads more room to grow.

Improved Half Dwarf. The plants are half dwarf growing about one and one-half to two feet high. They are very hardy and produce compact, rounded green sprouts of good size and fine quality.

Pkt., 5c; oz., 40c; $\frac{1}{4}$ lb., \$1.25.

CABBAGE (Postpaid)

CULTURE. The early sorts may be sown in September and transplanted to cold frames for the winter, or may be sown in hotbeds in January or February and moved to cold frames when large enough. Second early varieties may be sown either in cold frames or out doors in March or April. Winter sorts in May or June. Set the plants in the ground up to the first leaves and do this on a cool, wet day if possible. The smaller varieties should be spaced about 18 inches apart in the rows and the rows about 24 inches apart. The larger kinds 24x36 inches. To prevent the heads from splitting in the field after they are matured the plants should be loosened a little at the root. One ounce of seed will produce about 2,000 plants.

EARLY VARIETIES

Charleston Wakefield. Very similar to the Jersey Wakefield, but a few days later and half as large again.

Pkt., 5c; oz., 35c; $\frac{1}{4}$ lb., \$1.00; lb., \$3.50.

Copenhagen Market. The earliest large round-headed cabbage; excellent quality.

Pkt., 5c; oz., 35c; $\frac{1}{4}$ lb., \$1.25; lb., \$4.00.

Early Winningstadt. Pointed head, medium in size.

Pkt., 5c; oz., 30c; $\frac{1}{4}$ lb., \$1.00; lb., \$3.50.

Early Jersey Wakefield. Always first in the markets in spring. Heads pointed with few outside leaves; very solid and of fine flavor; extremely hardy. On the Pacific Coast the seed is sown in fall and the plants wintered over in the open ground.

Pkt., 5c; oz., 35c; $\frac{1}{4}$ lb., \$1.00; lb., \$3.50.

SECOND EARLY VARIETIES

Early Dwarf Flat Dutch. A valuable second early variety producing large, compact, flattened heads of good quality.

Pkt., 5c; oz., 35c; $\frac{1}{4}$ lb., \$1.00; lb., \$3.50.

Early Summer. Forms large, solid, round, flattened heads of excellent quality.

Pkt., 5c; oz., 35c; $\frac{1}{4}$ lb., \$1.00; lb., \$3.50.

Enkhuizen's Glory. A recent introduction from Holland. Valuable on account of its earliness, large size and fine keeping quality. The heads are globe-shaped, dark green and are usually solid. Tender and of excellent quality. The outer leaves set close permitting planting of more heads to the acre.

Pkt., 5c; oz., 35c; $\frac{1}{4}$ lb., \$1.25; lb., \$4.00.

LATE VARIETIES

Chinese Cabbage (Pe Tsai). Makes a head fifteen inches long and four to five inches in diameter, good as salad or cooked as ordinary cabbage.

Pkt., 5c; oz., 40c; $\frac{1}{4}$ lb., \$1.35; lb., \$4.50.

Drumhead Savoy. The best variety of Savoy or crumpled leaf cabbage; sweet and delicious. Heads large and solid.

Pkt., 5c; oz., 35c; $\frac{1}{4}$ lb., \$1.25; lb., \$4.00.

CABBAGE—LATE VARIETIES—Continued

Danish Ball Head. Sure heading, very solid; of good quality, and one of the very best keepers. Plants vigorous and compact, with stem of medium length. They are exceedingly hardy, resisting both cold and dry weather. Heads round, medium sized, stand shipment better than any other.

Pkt., 5c; oz., 35c; $\frac{1}{4}$ lb., \$1.25; lb., \$4.00.

Late Flat Dutch. The heads very large; distinctly flattened on the top; solid and of excellent quality.

Pkt., 5c; oz., 30c; $\frac{1}{4}$ lb., \$1.00; lb., \$3.50.

Large, Late Drumhead. Heads are large, solid and of good texture; flattened on top, but very deep.

Pkt., 5c; oz., 35c; $\frac{1}{4}$ lb., \$1.25; lb., \$4.00.

Mammoth Red Rock. Heads are late maturing, large, round; very solid and deep red. Used for cold slaw and pickling.

Pkt., 5c; oz., 40c; $\frac{1}{4}$ lb., \$1.50; lb., \$5.00.

Marrow Cabbage. Very similar to Thousand Headed Kale, but more prolific. Plants average four to six feet in height, stalks five to six inches in diameter. Stalks are edible. Lower leaves are broken off and fed as they mature. Grown like Kale or Cabbage.

Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 60c; lb., \$2.00.

**DANISH BALL HEAD**

The head pictured above, weighing 36 lbs., was grown from our seed by Mr. Philip Wischmeyer of 2131 8th Avenue, Seattle. A dozen heads from the same 5c package of seed weighed over 20 lbs. each.

CARROTS (Postpaid)

CULTURE. A sandy loam is best, but any good land, thoroughly and deeply worked, will produce satisfactory crops. Sow as early as the ground is fit to work, though good crops may be grown from sowing as late as June 15. For table use, sow the smaller kinds in rows 16 to 18 inches apart, and for field culture sow in drills 18 to 24 inches apart. Cover one-half to one inch deep and firm soil well. Cultivate often. Sow 1 ounce to 125 feet of drill, 4 pounds per acre.

Early French Forcing. The earliest variety for forcing; small, globular shaped, orange red.

Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 50c; lb., \$1.75.

Early Scarlet Horn. Small, deep orange, fine grained and agreeable flavor; short, stump-shaped root.

Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 50c; lb., \$1.75.

Chantenay. Will average three inches in diameter at the shoulder, five inches in length. Flesh tender, fine grained, free from hard core; deep golden color. Excellent for winter use.

Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; lb., \$1.25.

Danvers Half Long. Two and a half to three inches in diameter at the shoulder, five to six inches long. Uniformly smooth, rich, dark orange color; fine grained and of best quality.

Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; lb., \$1.25.

Long Orange. Heavy cropper in light soil. We offer selected strain of brightest orange scarlet. Good for table or stock feed.

Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; 1 lb., \$1.25.

Nantes. Called "coreless" on account of its tender heart; brittle, fine grained, sweet. Color reddish orange, skin smooth. Six inches long. Cylindrical and stump-rooted.

Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 45c; lb., \$1.50.

Oxheart. Particularly desirable for heavy soil, being about four and one-half inches long and three and one-half inches thick at the shoulder.

Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; 1 lb., \$1.25.

Large White Belgian. One of the oldest white varieties. A long pointed root and should only be planted in light soil.

Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; 1 lb., \$1.25.

Improved Short White. The most popular of white varieties, being a heavy cropper of desirable shape to allow of easy digging in heavy soil. It is very thick in the middle and does not taper from shoulder.

Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; 1 lb., \$1.25.

CAULIFLOWER (Postpaid)

CULTURE. Make the soil as fine as possible for transplanting, and do not allow the young plants to become checked at any time for want of water. For spring and early summer use, sow in January or February in hot bed, and transplant to cold frames when sufficiently large, and to the garden as soon as ground is warm enough. For later autumn crops, sow in the early part of June, and transplant in July. In dry weather water freely, and as they advance in growth hoe deep and draw earth to the stem. When ready tie the outside leaves over the heads loosely to protect from the sun.

**CAULIFLOWER (Danish Giant or Dry Weather)**

CAULIFLOWER—Continued

Extra Early Dwarf Erfurt. Very dwarf, early and sure to head; of good size; pure white; solid; of excellent quality.

Pkt., 10c; $\frac{1}{4}$ oz., 85c; oz., \$3.25.

Early Snowball. The best and most popular early variety grown. There is a vast difference in the strains of this variety offered, but we offer the best imported stock. Will make uniformly fine heads even under adverse conditions.

Pkt., 10c; $\frac{1}{4}$ oz., 85c; oz., \$3.00.

Danish Giant or Dry Weather. This variety is desirable because of its adaptability to where the more delicate varieties would succumb. It is a sure header. Larger than Snowball, is snow-white and second early. This seed is grown in Denmark especially for Malmø & Co.

Pkt., 10c; $\frac{1}{4}$ oz., 85c; oz., \$3.25.

Large Late Algiers. Sure to head. Plants large; of upright growth, leaves protecting heads so they will endure frost. The best late variety.

Pkt., 10c; $\frac{1}{4}$ oz., 50c; oz., \$1.75.

CELERY (Postpaid)

CULTURE. Sow early in a hot-bed or cold frame. When three inches high transplant four inches apart. When grown six inches, set in richly manured, deep soil, in rows three and a half feet apart and about nine inches from plant to plant. Blanch by placing boards along the rows or earth up a little and continue doing so at intervals until only the tops of the leaves are visible late in Autumn. Never hoe up the earth when plants are wet. To succeed with celery keep plants growing constantly while young. If allowed to "stand still" they will run up seed later. One ounce of seed produces about four thousand plants.

Golden Self-Blanching. The best market variety especially for early crop. The plant is golden-yellow, but needs to be blanched to make it brittle.

Pkt., 5c; oz., 85c; $\frac{1}{4}$ lb., \$2.50; 1 lb., \$8.00.

White Plume. Early and easy to grow, hardy, and naturally white. Easy to blanch. Medium sized bunch, fairly tall.

Pkt., 5c; oz., 40c; $\frac{1}{4}$ lb., \$1.25; lb., \$4.00.

Giant Pascal. One of the most popular sorts for winter use. Thick with very heavy hearts.

Pkt., 5c; oz., 30c; $\frac{1}{4}$ lb., \$1.00; 1 lb., \$3.50.

CELERIAC

Turnip-rooted Celery. Smooth, turnip-like roots; used for flavoring soups or as a salad.

Pkt., 5c; oz., 30c; $\frac{1}{4}$ lb., \$1.00.

Soup Celery or Smallage. Foliage used for soups.

Oz., 15c; $\frac{1}{4}$ lb., \$1.00; lb., \$3.50.

CHERVIL

Curled. Very finely curled, resembling parsley; used in soups and salads.

Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 70c.

CUCUMBERS (Postpaid)

CULTURE. Cucumbers need a warm, rich soil, and should not be planted in open ground until the weather is settled. Plant in hills four feet apart each way, thinning to three or four of the strongest plants. As fast as the cucumbers attain suitable size they should be taken from the vine, whether required for use or not, as their ripening soon destroys the vines' usefulness.

Early Cluster. A small, early variety, bearing its fruit in clusters of two or three.

Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 60c; lb., \$2.00.

Short Green, or Early Frame. Very desirable for

pickling or table use. Fruit small; bright green.

Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 60c; lb., \$2.00.

Davis' Perfect. Long fruits of fine form, with an intensely dark, rich green skin. Very few seeds, solid white flesh of superb quality for slicing.

Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 70c; lb., \$2.25.

White Spine. Medium long, rich green fruit with very tender, white and crisp flesh.

Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 60c; lb., \$2.00.

Long Green. Fruit long, firm and crisp; excellent for slicing, or when small they are good for pickling. Very productive.

Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 70c; lb., \$2.25.

Boston Pickling. Extensively grown for pickles. Fruit bright green, of medium size, smooth and symmetrical; crisp and tender.

Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 60c; lb., \$2.00.

Japanese Climbing. Used mostly for ornamental planting, but is also good for the table. Good for training to a trellis. Fruit rich, dark green;

Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 70c; lb., \$2.25.

West India Gherkin. An extremely small fruited variety grown exclusively for pickles. Very prickly, but tender and crisp.

Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 70c; lb., \$2.25.

CUCUMBER (Davis Perfect)

SWEET CORN

Listed in Order of Earliness

Pkts. Postpaid. By Weight, Postage Extra

CULTURE. Corn should not be planted until the ground is warm, as the seed will rot in cold, damp soil, or if planted too deep. Late April is early enough for first plantings. For succession, plant every two weeks through May and June. Cover the first planting very lightly, increasing the depth a little for the later plantings. For the dwarf early varieties, rows should be three feet apart; for later large varieties, four feet, and the hills two or three feet apart in the rows.

Malmo's "Big Ear"

Extra Early Market. The earliest white corn.

Will ripen 12 to 14 days ahead of any other.

Pkt., 10c; lb., 35c; 10 lbs., \$3.00.

Golden Early Market. An excellent new variety of yellow corn as early as Extra Early Market and nearly as sweet as the Golden Bantam but two weeks earlier. Pkt., 10c; lb., 40c; 10 lbs., \$3.50.

Golden Bantam. Dwarf in growth, stalks averaging four feet; ears from five to seven inches. What it lacks in size is fully made up in its productiveness and quality. In good soil it will produce two and three fine ears to a stalk.

Pkt., 10c; lb., 35c; 10 lbs., \$3.00.

Malmo's Big Ear. The largest of all early varieties. Its immense size, 12 to 18 rows of large, sweet, plump grains of purest white, make it a ready seller on the market. The large ears, often a foot in length, mature very even, and, owing to the thin husks, the marketable ears are easy to detect. The stalks grow strong and vigorous, but rather dwarf.

Pkt., 10c; lb., 40c; 10 lbs., \$3.50.

Early White Cory. Ears are six to seven inches long. Kernels large in eight rows.

Pkt., 10c; lb., 35c; 10 lbs., \$3.00.

Mammoth White Cory. Large ears with twelve rows of perfectly formed kernels—large, pure white and of excellent quality.

Pkt., 10c; lb., 35c; 10 lbs., \$3.00.

Early Minnesota. A standard second early. Stalks about six feet; ears about eight inches long, eight to ten rowed; sweet and tender.

Pkt., 10c; lb., 35c; 10 lbs., \$3.00.

Stowell's Evergreen. Of excellent quality, but uncertain of maturing in the Puget Sound district, where it is grown chiefly for its rich fodder value.

Pkt., 10c; lb., 35c; 10 lbs., \$3.00.

Black Mexican. An old favorite on account of its sweetness.

Pkt., 10c; lb., 40c; 10 lbs., \$3.50.

EARLY ACCLIMATED SWEET CORN

Extra Early Market

Malmo's "Big Ear"

**Best for Market and Home Use
and**

**The two best sweet corns grown West
of the Cascades**

FIELD CORN

Postage, freight or express charges extra

Prices on all Field Corn, January 1st, 1926.
1 lb., 12c; 10 lbs., \$1.00; 100 lbs., \$8.50.

Prices subject to market changes.

Write for special quotation on larger quantity.

Early Eight-Rowed Canada, also known as **Yellow Flint**. A rapid growing, early variety. Very valuable where the seasons are short.

Pride of the North. A very early Dent variety, especially valuable on account of its extreme earliness. Deep, yellow grains.

Leaming. An early, tall growing variety, stalks leafy. Kernels long, deep golden yellow.

Minnesota No. 13. 16 to 20 rows of bright, rich, yellow, smooth, wedge-shaped kernels, packed closely on cob. Ears average eight inches in length usually two to a stalk.

King Philip. An old, New England favorite; ears long, very early, copper red in color.

Red Cob Ensilage. Deep red cob, strong leafy stalks and short joints.

Pop Corn, White Rice. Most popular variety; ears short, kernels long, resembling rice in shape. Color white. 1 lb., 30c; 10 lbs., \$2.50.

CRESS

(Postpaid)

Pepper Grass. Frilled, curled leaves, used in salads and for garnishing.

Pkt., 5c; oz., 20c; ¼ lb., 50c. Postpaid.

Water Cress. Small oval leaves used for salad. Grows in shallow water.

Pkt., 5c; oz., 60c. Postpaid.

Upland Cress. Looks like Water Cress has same flavor, but grows in any good garden soil.

Pkt., 5c; oz., 25c; ¼ lb., 75c. Postpaid.

EGG PLANT

New York Improved Spineless. The principal market variety; plants large and spreading; fruit large, deep rich purple. Sow in hotbed and transplant. Will thrive under same conditions as Tomato. Pkt., 5c; oz., 65c; ¼ lb., \$2.00.

ENDIVE

CULTURE. For early use sow in April; for late or main crop, in June or July, in drills 14 inches apart. When two or three inches high thin to one foot apart in the drills. When fully grown blanch by tying leaves together.

ENDIVE—Large Green Curled

ENDIVE—Continued

Large Green Curled. Hardy broad leaves, blanches white. Pkt., 5c; oz., 15c; ¼ lb., 40c.

Broad Leaved Batavian. A splendid salad and good for cooking; like spinach.

Pkt., 5c; oz., 15c; ¼ lb., 40c.

KALE OR BORECOLE

(Postpaid)

CULTURE. Kale is a hardy "green" of the cabbage family; excellent for winter and spring use. Sow either in rows or broadcast during August and September, or in early spring. One ounce makes about 2,000 plants.

Tall Green Curled Scotch. Grows up to three feet. Light green leaves, finely curled at edge.

Pkt., 5c; oz., 20c; ¼ lb., 60c.

Thousand Headed. Very large, tall growing variety with smooth leaves. Especially used for feeding chickens and stock.

Pkt., 5c; oz., 10c; ¼ lb., 25c; 1 lb., 60c.

Dwarf Green Curled. Most popular dwarf sort. Splendidly curled leaves; excellent flavor.

Pkt., 5c; oz., 20c; ¼ lb., 60c.

Kohl Rabi

KOHL RABI

CULTURE. Sow the seed in the Spring in drills three-fourths of an inch deep and two feet apart and when plants are a few inches high thin to fifteen inches. Cultivate same as turnips. The bulb which is the edible part grows above ground. Flesh resembles a turnip but has a distinct and delicious cabbage flavor. Sometimes called **Root Cabbage**. Should be cut for table use before fully grown.

Early White Vienna. The most desirable variety for general use, very early.

Pkt., 5c; oz., 35c; ¼ lb., \$1.00.

Early Purple Vienna. Has a bright purple bulb.

Pkt., 5c; oz., 25c; ¼ lb., 75c.

LEEK

The Leek belongs to the Onion family. Cultivate same as Onions, but should be hilled up about the neck to blanch it.

Large American Flag.

A very fine leek, with long, large stems, which are sweet and white when properly blanched; vigorous grower.

Pkt., 5c; oz., 30c; ¼ lb., 85c.

Leek

LETTUCE (Postpaid)

CULTURE. Lettuce in ground out of doors will stand some freezing, but is killed by prolonged frost or frequent freezing and thawing. An early crop may be secured by starting under glass in January. Lettuce to be at its best should be grown rapidly, hence the soil should be made as rich as possible. For general crop, sow outdoors early in the spring, in drills eighteen inches apart. Thin the young plants to four inches apart in the row. As the plants begin to crowd thin them out and use as required. For heading varieties, the plants should be thinned ten to twelve inches apart in the row. One ounce will sow 125 feet of drill and produce 3,000 plants.

EARLY LOOSE LEAF VARIETIES

Grand Rapids. The most popular variety for greenhouse and early out-door planting. Of handsome appearance, a strong and quick grower not subject to rot.

Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 60c; lb., \$2.00.

Simpson's Early Curled. A leading early market variety, forming a dense mass of finely curled and wrinkled leaves that are excellent and ten-

der and do not wilt readily. Used for very early planting and forcing.

Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 50c; lb., \$1.75.

Simpson's Early Black Seeded. An excellent variety. It has all the good qualities of Simpson's Early Curled but is larger. It is one of the tenderest and sweetest, and remains so longer than most other kinds.

Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 50c; lb., \$1.75.

HEAD LETTUCE

Big Boston. A large heading sort, very hardy and vigorous, with broad, comparatively smooth, thin, bright green leaves. Quite tender.

Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 50c; lb., \$1.75.

Hanson Head. Forms the head closely resembling early summer cabbage. Creamy white inside; very tender. Should be used young. May become bitter with age, or when matured slowly.

Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 60c; lb., \$2.00.

Iceberg. Has an unusually solid head. The white, main ribs of the leaves curve toward the center, and keep the interior thoroughly bleached. It is quick growing and always crisp and tender.

Pkt., 5c; oz., 25c; $\frac{1}{4}$ lb., 85c; lb., \$2.25.

May King. Exceptionally early, attaining a size suitable for use before other sorts. Also good for forcing. The outer leaves are light green, slightly tinged with brown.

Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 50c; lb., \$1.75.

Malmö's Prizehead. Large, loose headed, thin leaved sort. The very large leaves are crimped, bright green, tinged on the edges with reddish brown and are crisp and sweet.

Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 60c; lb., \$2.00.

New York Head, or Wonderful. Sometimes called Los Angeles. We have a very carefully selected strain of the true stock, producing immense heads as solid as a cabbage and blanching beautiful creamy white. Crisp, tender, delicious.

Pkt., 5c; oz., 25c; $\frac{1}{4}$ lb., 90c; lb., \$3.00; 10 lbs., \$25.00.

Paris White Cos. Large, elongated, compact heads, that blanch mild and crisp. The plants are of erect growth, forming a tall, slightly oblong bunch of large, crisp leaves.

Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 50c; lb., \$1.75.

MUSK MELON

Do not thrive west of the Cascade Mountains except in especially warm, sheltered locations. 1 oz. to 50 hills.

Burrell's Gem. Skin dark green, flesh orange salmon, sweet and firm, ripening close to the skin. Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 45c; lb., \$1.50.

Honey Dew. Small, oval fruit with light colored rind. The light green, tender flesh has a most delicate sweet flavor.

Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 50c; lb., \$1.50.

Rocky Ford, or Netted Gem. Fruit oval, slightly ribbed, densely covered with coarse netting. Flesh thick, green, very sweet.

Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 45c; lb., \$1.50.

Osage, or Miller's Cream. Medium size, green, oval, slightly ribbed. Flesh salmon.

Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 45c; lb., \$1.50.

MUSTARD

CULTURE. Sow early in spring in drills 18 inches apart; covering one-half inch deep. For succession, sow every two weeks until autumn. Water freely.

Southern Giant Curled. Hardy, large, light green leaves, crimped and frilled at the edges.

Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 30c; lb., \$1.00.

White English. Leaves dark green, small, mild and tender when young.

Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 30c; lb., \$1.00.

WATER MELON

Do not thrive west of the Cascade Mountains, except in especially warm and sheltered locations. One ounce to thirty hills.

Kleckley Sweet or Monte Cristo. Medium size, oval, dark mottled, sweet and tender.

Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 30c; lb., \$1.00.

Citron. Small, round melons, for preserves or pickles. Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 35c; lb., \$1.00.

Cuban Queen. Excellent shipping variety, oval shape. Rind thin, flesh bright red and firm.

Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 35c; lb., \$1.00.

MUSHROOM SPAWN

Lambert's Pure Culture comes in bricks, weighing about 20 ounces. Break these into pieces the size of a walnut and put into the bed 1 foot apart each way. A brick will plant 10 square feet. price per brick, 35c—postpaid, 40c. Write for price in large lots.

OKRA

CULTURE. Plant in rows two and one-half feet apart, covering with an inch of fine soil firmly pressed down. Thin to one foot apart. Pods best when one to three inches long.

White Velvet. Pods remain tender a long time.

Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 30c.

Perkins' Mammoth Long Pod. This variety is very early and productive. The pods are deep green, long, tender and of good quality.

Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 30c.

FERTILIZER PAYS BIG DIVIDENDS

ONIONS (Postpaid)

ONION—Yellow Globe Danvers

CULTURE. A strong, deep, rich loamy soil is most suitable. The ground should be heavily dressed with a good fertilizer and plowed a moderate depth, in the fall, if possible. As early in spring as the ground is in working order, harrow it thoroughly and make as fine and level as possible. Sow thinly in drills one-fourth inch deep and 15 inches apart. Keep the surface of the ground open and free from weeds, but do not ridge up to the growing bulbs.

One ounce will sow 100 feet of drill or four to five pounds per acre for large onions, 50 to 60 pounds for sets.

Alisa Craig. Grows to an immense size and not infrequently measures 18 inches around and weighs 2 lbs. Color light yellow, grain fine, flavor mild and ripens early.

Pkt., 5c; oz., 45c; $\frac{1}{4}$ lb., \$1.60; 1 lb., \$5.00.

Extra Early Red Flat. Medium sized. Ready for use about two weeks earlier than Large Red Wethersfield. Fine grained and mild in flavor.

Pkt., 5c; oz., 35c; $\frac{1}{4}$ lb., \$1.25; 1 lb., \$4.25.

Large Red Wethersfield. The best keeper, grows to an immense size; solid, oval-shaped, flattened on top. Skin purplish red, smooth and glossy; flesh white, slightly tinged with pink.

Pkt., 5c; oz., 35c; $\frac{1}{4}$ lb., \$1.25; 1 lb., \$4.25.

Large Red Globe. Handsome dark red, large, forming a hard, solid globular bulb.

Pkt., 5c; oz., 35c; $\frac{1}{4}$ lb., \$1.25; 1 lb., \$4.50.

Prizetaker. An onion of the largest size and nearly globular in form. Skin is yellowish brown; flesh is white, mild and tender.

Pkt., 5c; oz., 35c; $\frac{1}{4}$ lb., \$1.25; 1 lb., \$4.75.

Yellow Flat Danvers. Early; similar to Yellow Globe Danvers, except in shape, with a small neck.

Pkt., 5c; oz., 30c; $\frac{1}{4}$ lb., \$1.25; 1 lb., \$4.25.

Yellow Globe Danvers. Extensively used for main crop. Bulbs of medium to large size, uniformly globe shaped, with small neck and ripen very evenly. Skin is rich, coppery yellow, flesh a creamy white.

Pkt., 5c; oz., 35c; $\frac{1}{4}$ lb., \$1.25; 1 lb., \$4.50.

Australian Brown. Resembles the "Yellow Danvers" in general appearance, but has a clear, amber-brown skin. It matures early, ripens uniformly, and will keep in good condition longer than any other onion.

Pkt., 5c; oz., 30c; $\frac{1}{4}$ lb., \$1.10; 1 lb., \$4.00.

White Queen. Small; noted for extreme earliness and mildness of flavor. Bulbs average about an inch in diameter and are much used for pickling.

Pkt., 5c; oz., 45c; $\frac{1}{4}$ lb., \$1.35; 1 lb., \$5.00.

Southport White Globe. Medium early; medium to large; finely shaped, clear white bulbs; firm, fine grained, mild flavor.

Pkt., 5c; oz., 40c; $\frac{1}{4}$ lb., \$1.25; 1 lb., \$5.00.

White Portugal or Silver Skin. Medium size, ripening early and uniformly, with beautiful clear, white skin; flat, good keeper, mild flavor. Used largely for pickles and bunching.

Pkt., 5c; oz., 45c; $\frac{1}{4}$ lb., \$1.60; 1 lb., \$6.00.

ONION SETS

Prices subject to market changes. Postage extra.

Shallot's or Multipliers. 1 lb., 25c; 10 lbs., \$2.00.

Yellow Danvers. 1 lb., 20c; 10 lbs., \$1.75.

PARSNIP (Postpaid)

CULTURE. Sow the seed early in spring, in drills eighteen inches apart and thin the plants to three inches apart. Give frequent shallow cultivation during the summer. The roots may remain in the ground until wanted for use during the winter. They are improved by freezing.

Hollow Crown or Long White. Root very long, white, smooth, tender, sugary, and of most excellent flavor. Very hardy.

Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 50c; 1 lb., \$1.25.

PARSLEY

(Postpaid)

Sow as early as possible in the spring, in drills one to two feet apart covering not more than one-half inch with fine soil firmly pressed down. Thin plants eight to twelve inches apart in the row. Cut back first growth on curly varieties for best results.

Plain. Leaves flat, deeply cut but not curled.

Very desirable for flavoring.

Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 50c.

Triple Curled. Very finely curled; dark green color. One of the best varieties for all purposes.

Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 50c.

Moss Curled. Vigorous, compact growing. The leaves are very finely cut and closely curled.

Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 50c.

Hamburg, or Turnip Rooted. A plain-leaved variety, forming a long, thick edible root.

Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 50c.

PARSLEY—Moss Curled

SEED POTATOES

CULTURE. The hill or row system may be used in planting. If in hills, they may be three feet apart each way or thirty inches one way and thirty-six inches the other. The rows are usually three to three and one-half feet apart. The distance between the hills in the row from 16 to 20 inches. Plant four inches deep. Early varieties are planted any time after February 1. Usually it is best to plant the main crop of potatoes before the middle of May as early planting usually gives better results.

The cut seed should be as blocky as possible. Thin pieces are more likely to rot. A good method is to begin cutting off pieces at the stem diagonally across the tuber until just enough is left at the seed end to make two pieces, when this part should be cut in two in the middle so that all the eyes on the seed end will not be left on one piece.

DIPPING POTATOES in a solution of Formaldehyde kills scab. One pound of 40 per cent Commercial Solution of Formaldehyde in 30 gallons of water. Soak the seed two hours. The same solution may be used several times, but loses strength if kept. If the soil has become infected it will be necessary to plant in new ground as the infection will carry over in the soil for two years. The infected potato patch should be planted to some other crop and no volunteers allowed to grow.

ACCLIMATION. Authorities all agree that it takes three seasons to thoroughly acclimate potatoes. We therefore offer none but Puget Sound grown strains of the third generation.

PRICE. Prices subject to market changes, given on application.

EARLY VARIETIES

Beauty of Hebron. By many considered the best pink skin potato.

Earliest of All. The most productive early white potato ever introduced into the Northwest. Two weeks earlier than other early varieties. Uniformly round and smooth; an excellent cooker.

Early Rose. Earliest of all of the rose colored varieties.

Early Ohio. Pink skin; good quality.

Irish Beauty. Early; snow white potato; excellent quality.

Irish Cobbler. Splendid creamy white potato for early market. Large, round, sometimes slightly netted. Produces very smooth potatoes and will bake dry and mealy, even before ripe. Extra early.

White Lily. A beautiful, extra early, snow white potato, very popular with market gardeners, because of its uniform size attained quickly and its smooth, clean appearance. Wonderfully productive and very resistant to all diseases. A splendid cooker.

MAIN CROP VARIETIES

Burbank. Oblong, white; one of the best known main crop varieties.

Gold Coin. A fine main crop potato for home use or market. Large, oval tubers, of rich cream color.

Netted Gem. Grown on the East Side of the Mountains, is often called Yakima Gem. The strain we offer has been grown on Puget Sound for at least three years, and is a true Netted Gem.

PEAS Pkt. postpaid. By weight postage extra

CULTURE. The seed should be sown in drills very early in spring, as soon as the ground is in good condition to work, and covered two or three inches deep. Rows of the extremely dwarf varieties may be as close as twelve to eighteen inches apart; semi-dwarf and tall varieties should be two to four feet apart. Some sow the seed in double rows six inches apart, placing trellis or brush between the rows, thus making one row of supports do for two rows of peas.

For succession, seed should be sown at intervals of about two weeks until the middle of June. They do not do well in hot weather in summer.

On the Pacific Coast, where the winters are mild, the seed may be planted in rather light, porous, well-drained soil in November, and will be ready for use early in June.

EARLY VARIETIES

Alaska. (Dwarf.) An extra early hardy pea. On the Pacific Coast it may be planted in November; will not rot in the ground. Pods of perfect shape, well filled with smooth peas. Seed blue.
Pkt., 10c; 1 lb., 35c; 10 lbs., \$3.00.

American Wonder. (Dwarf.) One of the most popular of the early wrinkled sorts. Well filled pods containing seven or eight sweet, tender peas.
Pkt., 10c; 1 lb., 35c; 10 lbs., \$3.00.

Gradus. (Early.) The vines are similar in appearance to Telephone but not as tall. Pods are large, about $4\frac{1}{2}$ inches long, nearly as large

as those of the Telephone, uniformly well shaped.

Pkt., 10c; 1 lb., 35c; 10 lbs., \$3.00.

Laxton's Superb. (Dwarf.) One of the finest and hardiest large podded varieties for home and market garden.

Pkt., 10c; 1 lb., 35c; 10 lbs., \$3.25.

Laxtonian. A new, first early pea of unexcelled value. Splendid quality and unusually productive, growing only 15 to 18 inches in height, it excels in yield and equals in size of pods, the Gradus.

Pkt., 10c; 1 lb., 35c; 10 lbs., \$3.00.

Little Gem. (Dwarf.) Round, well filled pods, $2\frac{1}{2}$ to 3 inches long. Peas are green, wrinkled and sweet.

Pkt., 10c; 1 lb., 35c; 10 lbs., \$3.00.

Little Marvel. An extra dwarf, early pea, wonderfully prolific. Each pod has six or seven large peas, closely crowded in.

Pkt., 10c; 1 lb., 35c; 10 lbs., \$3.00.

Nott's Excelsior. Dwarf early. Pods 3 inches long, peas of medium size, green, wrinkled, good quality.

Pkt., 10c; 1 lb., 35c; 10 lbs., \$3.00.

Thomas Laxton. A very early, wrinkled variety of great merit. Vines are vigorous, of medium height, similar to Gradus but darker in color, hardier and more productive. Pods are large, often four inches long.

Pkt., 10c; 1 lb., 35c; 10 lbs., \$3.00.

MAIN CROP VARIETIES

Dwarf Telephone. A medium late pea, of dwarf, stocky habit, healthy, vigorous growth, bearing large, handsome pods and peas of highest quality.

Pkt., 10c; 1 lb., 35c; 10 lbs., \$3.00.

Tall Telephone. Immensely productive, of the finest quality and excellent sugary flavor; vines strong; large size pods filled with large, luscious peas; grows very tall.

Pkt., 10c; 1 lb., 35c; 10 lbs., \$3.00.

Teddy Roosevelt. Vines tall and vigorous, producing an abundance of pointed pods of largest size, often $4\frac{1}{2}$ to 5 inches long, filled with large peas, tender, sweet and of excellent flavor.

Pkt., 10c; 1 lb., 35c; 10 lbs., \$3.00.

EDIBLE POD VARIETIES

Tall Gray Sugar or Swedish. (Edible Pod.) Four to six feet tall, excellent both green and shelled; sweet and fine flavored.

Pkt., 10c; $\frac{1}{2}$ lb., 25c; 1 lb., 40c.

Melting Sugar. (Edible Pod.) We consider this the best of the edible podded sorts, in which the pods are used when half grown and cooked in same way as snap beans. The pods of Melting Sugar are large, four to four and one-half inches long, broad, often curved or twisted, and when young they are stringless and very tender.

Pkt., 10c; $\frac{1}{2}$ lb., 25c; 1 lb., 40c; 10 lbs., \$3.75.

FIELD PEAS—(See page 108)

PEPPER (Postpaid)

- CULTURE.** Plant seed $\frac{1}{2}$ inch deep in hotbed in March, or in boxes in the house. Set in rows about $1\frac{1}{2}$ feet apart each way in the garden about May 1. One ounce will produce about 1500 plants.
- Large Bell or Bull Nose.** A large, early bright red, mild flavor. Pkt., 5c; oz., 60c.
- Long Red Cayenne.** A late variety. Pods small, bright scarlet, cone shaped and pungent. Pkt., 5c; oz., 60c.
- Red Chili.** Fruit is small, bright red, very hot and pungent. Pkt., 5c; oz., 60c.
- Ruby King.** Bright red, large. Flesh exceedingly thick and sweet. Pkt., 5c; oz., 60c.
- Golden Dawn.** Similar to the large Bell or Bull Nose, excepting it is golden yellow and very sweet. Pkt., 5c; oz., 60c.

PUMPKIN (Postpaid)

- CULTURE.** Pumpkins will grow on any good farm land, but their size and quality will depend on the culture and fertility of the soil. Plant early in May, in hills six to eight feet apart. One pound of seed will plant about 300 hills. Care should be taken to keep the different varieties well apart, also away from other vining plants, as they mix and deteriorate very rapidly.
- Sugar or Sweet Pie.** Small, round, yellow sort; flesh is thick, sweet and of excellent quality. Best for pies and cooking. Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; 1 lb., \$1.50.
- Winter Luxury.** The best flavored pie pumpkin grown; enormously productive; excellent keeper; medium size; golden russet color, finely netted; flesh deep golden, sweet, tender and very thick; none better. Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; 1 lb., \$1.50.
- Connecticut Field.** A fine, large, orange colored variety, used for field culture and stock feeding. Flesh brittle and sweet. Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; 1 lb., \$1.50.
- Jumbo or King of Mammoths.** The largest pumpkin grown. Skin is salmon-orange, flesh is bright yellow, very thick; excellent quality for pies as well as stock. Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; 1 lb., \$1.50.

RADISH (Postpaid)

For forcing sow in hotbed or under glass in rich, sandy soil made perfectly level. Scatter evenly over the surface from fifty to one hundred seeds to the square foot and cover with one-half inch of soil sifted on. Careful watering to keep soil moist, even, moderate temperature and good ventilation are required for rapid root development. If the bed is a good one the whole crop can be marketed in twenty-four to forty days after planting.

For open ground culture sow in rich, sandy soil in drills twelve to eighteen inches apart and thin out later. A good dressing of nitrate of soda will greatly stimulate growth and insure tender, brittle roots. Successional sowings from one week to ten days apart will keep up a supply. After summer begins, sow winter varieties as they do not become tough and pithy so quickly as the early sorts.

RADISHES—LONG VARIETIES

- Early Long Scarlet.** This is a standard sort either for the home garden or the market. Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; lb., \$1.25.
- Long Scarlet, White Tipped.** One of the brightest and handsomest scarlet radishes. The roots are fit for use in about twenty-five days and continue in good condition until fully grown. Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; lb., \$1.25.
- White Icicle.** The finest of the early, pure white varieties. Planted in the spring, the radishes are ready for pulling in about three weeks. Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 45c; lb., \$1.50.
- White Strasburg.** One of the best large summer sorts. It covers a long season, as it is good when quite small. The roots are long, very white, crisp and tender. Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; lb., \$1.25.

ROUND VARIETIES

- Early Scarlet Turnip.** Early small, round red, of very quick growth; crisp, tender. Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; lb., \$1.25.
- Early Scarlet Turnip, White Tipped.** Very early, deep scarlet with white tip. Crisp, very tender and sweet. Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; lb., \$1.25.
- Sparkler.** A very handsome turnip-shaped variety. Upper half is bright scarlet and lower half a sparkling white; is a good forcer and sells especially well in the market. Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 45c; lb., \$1.50.

**RADISHES**

White Icicle

Early Long Scarlet

RADISHES—OLIVE SHAPED VARIETIES

French Breakfast. Half-long variety, medium size, crisp and tender; scarlet with white tip. Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; 1 lb., \$1.25.

Half Long Deep Scarlet. Early, deep rich red color. Flesh white, crisp and tender. Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; 1 lb., \$1.25.

RADISHES—WINTER VARIETIES

California Mammoth White China. The largest of all radishes. Roots grow ten to twelve inches long, solid, tender and crisp. Keeps well. Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; 1 lb., \$1.25.

China Rose Winter. One of the best fall and winter varieties; a favorite with market gardeners,

bright rose color; flesh white and firm.

Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; 1 lb., \$1.25.

Black Spanish Long. Standard winter sort; good flavor. Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; lb., \$1.25.

Black Spanish Round. Same as long, except shape. Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; lb., \$1.25.

RHUBARB

CULTURE. Good plants are easily grown in any good garden soil. Sow seed thinly in shallow drills 1 foot apart, thin to 4 or 5 inches. Keep soil loose and free from weeds. Pick out the strongest and best. In fall or spring following, transplant to the permanent bed, 4 feet apart each way, in deep, warm and very rich soil. The more manure the better stalks. For roots see page 9.

Victoria. Very large, the finest cooking variety. Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 75c; 1 lb., \$2.00.

SALSIFY OR VEGETABLE OYSTER

CULTURE. Salsify has the appearance of a small parsnip and flavor closely resembling oysters. Sow in drills a foot apart, and when two or three inches high thin out to three or four inches. Culture is same as for carrots. The roots are hardy and may remain in the ground during winter, or may be stored in dry earth or sand.

Mammoth Sandwich Island. The leading variety; produces a large crop of straight, smooth roots. Pkt., 5c; oz., 30c; $\frac{1}{4}$ lb., 90c; lb., \$2.75. Post paid.

SPINACH (Postpaid)

CULTURE. An easily grown plant. The richer the soil, the larger and more tender the leaves will be. As a field crop use eight pounds of seed per acre, one ounce for 100 feet of row.

SPINACH—King of Denmark

King of Denmark. This new variety is the most valuable introduction of spinach in recent years. Although the plants are ready for use almost as soon as the medium early sorts they remain in good condition from a week to two weeks after all other varieties have gone to seed. The leaves are thick, stand well after cutting and are of good quality.

King of Denmark. Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 25c; 1 lb., 75c.

Round Summer. Large-leaved, bright green; rather smooth and rounded at the top. A good variety for late spring and summer. Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 25c; lb., 65c.

Victoria. Large, exceedingly thick, dark green leaves slightly crumpled in the center. Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 25c; lb., 65c.

Bloomsdale. Savoy. Leaves large, round and thick, very much savoyed and rich deep green. Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 25c; lb., 65c.

Long Standing. A deep green variety, with rather elongated smooth leaves. Stands a long time without running to seed even in hot weather. Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 25c; lb., 65c.

Prickly Winter. Very hardy; large, smooth leaves, shaped like an arrow point. Color bright green. A fine winter and spring variety. Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 25c; lb., 65c.

New Zealand. Unlike true spinach in type and in that it thrives during hot weather in any soil. Tender shoots of good quality. Plant very large and spreading. Leaves small, broad and pointed. Plant three or four seeds in hills two feet apart each way. Before planting soak seed in warm water twenty-four hours. Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 50c; lb., \$1.50.

SQUASH (Postpaid)

CULTURE. Squash plants are very tender and sensitive to cold; planting must be delayed until settled warm weather. General methods of culture are the same as for cucumbers and melons. Summer varieties should be planted four to five feet apart each way and winter sorts eight to twelve. Three plants are sufficient for a hill. In gathering the winter sorts care should be taken not to bruise or break the stems from the squash, as the slightest injury will cause them to decay. Winter squashes should be stored in a moderately warm, dry place and the temperature kept as even as possible. For those who desire very early squashes seed can be planted in boxes, and transplanted.

EARLY VARIETIES

Delicata. May be used either as a summer or winter variety. Orange-yellow, splashed and striped dark green; rich and dry, wonderfully solid. Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 45c; lb., \$1.50.

Mammoth White Bush Scallop. Creamy white, slightly warted surface. The best summer sort for the market; very productive. Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 35c; 1 lb., \$1.25.

SQUASH—Continued

Mammoth Summer Crookneck. Early, prolific, solid, curved neck; skin yellow, thin, hard and warty; flesh tender and of good quality.
Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 35c; 1 lb., \$1.25.

Vegetable Marrow. A very popular sort. Is long and slim; color white with delicious white flesh.
Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 35c; 1 lb., \$1.25.

LATE VARIETIES

Boston Marrow. Large-fruited hard-shelled winter squash; bright-orange skin and deep-orange flesh; very productive; fruit oval.
Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 35c; 1 lb., \$1.25.

Hubbard. One of the best winter squashes; vigorous and productive. Fruits large, heavy and

moderately warted, with a very hard shell; skin dark green; flesh bright orange-yellow, fine grained, thick and richly flavored. Can be kept in good condition until spring.

Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 35c; 1 lb., \$1.25.

Golden Hubbard. Fruits of medium size, weighing from six to eight pounds, shaped like the Hubbard, but earlier. Can be held over in good condition for spring use. Shell hard, strong and of a beautiful orange-red.

Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; 1 lb., \$1.50.

Mammoth Chili. Very large. The skin is quite smooth, but with broad, open netting and of a rich orange-yellow. Flesh thick, of a rich yellow coloring; fine grained and sweet.

Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; 1 lb., \$1.50.

TOBACCO

The seed should be sown as early as possible after danger of frost is over. Dig and pulverize the earth and mix with wood ashes or potash fertilizer, after which the seed may be sown and covered very lightly. When the plants are about six inches high, transplant into rows four or five feet apart each way. Cultivate thoroughly.

Connecticut Seed Leaf. Hardy, well adapted to growing in the northern states.

Pkt., 5c; oz., 75c; $\frac{1}{4}$ lb., \$2.00; 1 lb., \$7.00.

Havana. The leaf is very thin and is of fine texture.

Pkt., 5c; oz., 75c; $\frac{1}{4}$ lb., \$2.00; 1 lb., \$7.00.

TOMATOES (Postpaid)

Sow early in hotbeds, and as soon as they have four leaves transplant into shallow boxes. Harden off, and set out as soon as danger of frost is past. Trim off most of the leaves. When the plants commence to grow they should be staked and tied, allowing only two or three branches from which surplus shoots should be kept off. After a sufficient amount of fruit is set no blooms or new growth should be allowed and the foliage should be trimmed off sufficient to allow the fruit to be exposed to the sun. For the best results pot grown plants, preferably in bud or ready to bloom should be secured. But at the time of transplanting the blooms, buds and part of the foliage should be removed, giving the plants a better chance for a quick start. A sunny exposure is necessary and after the fruit is set very little water is required. An ounce of seed will produce 3,000 plants.

Beauty. (Livingston's). One of the smoothest skinned and best of the large sorts. The fruit is large, uniform in size. Skin purplish pink, flesh light pink and of excellent flavor.

Pkt., 5c; oz., 50c; $\frac{1}{4}$ lb., \$1.50; 1 lb., \$5.00.

Bonny Best. Very early; scarlet; medium to full market size; even, smooth and regular. Excellent for forcing.

Pkt., 5c; oz., 50c; $\frac{1}{4}$ lb., \$1.50; 1 lb., \$5.00.

Chalk's Early Jewel. Fine; large; solid; smooth; scarlet; similar to Stone; early, good forcer.

Pkt., 5c; oz., 50c; $\frac{1}{4}$ lb., \$1.50; 1 lb., \$5.00.

Dwarf Champion. Dwarf and compact in habit; stands up well even when loaded with fruit; very desirable in small gardens; early; flesh solid, but has no hard core and is of good flavor.

Pkt., 5c; oz., 50c; $\frac{1}{4}$ lb., \$1.50; 1 lb., \$5.00.

Spark's Earliana. A perfect early Tomato, large, beautiful color, nearly seedless and very solid, a vigorous grower and prodigious bearer. The most popular variety on the Pacific Coast.

Pkt., 5c; oz., 40c; $\frac{1}{4}$ lb., \$1.25; 1 lb., \$4.00.

John Baer. An extra early scarlet variety. Hardy and exceptionally productive. The fruits are the largest of the extra early sorts and are most attractive in color; nearly round, smooth, firm and of excellent quality.

Pkt., 5c; oz., 50c; $\frac{1}{4}$ lb., \$1.50; 1 lb., \$5.00.

SMALL FRUITED TOMATOES

Husk Tomato or Ground Cherry. Greatly valued for use as a preserve, makes delicious pies. the fruit is small, very sweet, closed in a husk or calyx.

Pkt., 5c; oz., 60c.

Red Cherry. Fruits small, about five-eighths an inch in diameter, perfectly round and smooth. Fine for pickles and preserves.

Pkt., 5c; oz., 60c.

Red Pear. Used for preserves and to make "tomato figs." Fruits bright red, distinctly pear shaped and of excellent flavor.

Pkt., 5c; oz., 60c.

Turnip—Purple Top White Globe

WHITE VARIETIES

Cow Horn. White, carrot shaped; grows nearly half out of the ground and slightly crooked; a rapid grower of good flavor.

Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 35c; 1 lb., \$1.00.

Extra Early White Milan. The earliest turnip. Clean, white, smooth, flat, symmetrical and handsome in appearance. The flesh is white, tender and sweet.

Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 60c; 1 lb., \$1.50.

Extra Early Purple Top Milan. Similar to the White Milan, except that the upper portion is a beautiful purple-red.

Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 60c; 1 lb., \$1.50.

Early White Flat Dutch. Grows quickly, clear white skin, flesh juicy, mild flavor and excellent quality.

Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 35c; 1 lb., \$1.00.

Purple Top, Strap-Leaved. The most popular sort. Will do well either broadcast or in drills, and will form good sized bulbs in seven or eight weeks. Rather flat and of medium size. Color, purple above ground, white below; flesh, white, fine grained and tender.

Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 35c; 1 lb., \$1.00.

Purple Top White Globe. Perfect globe shape, about six inches in diameter, with smooth, white skin; flesh pure white, firm and crisp. A good keeper.

Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 35c; 1 lb., \$1.00.

Seven Top. For greens. Cultivated for its green leaves which are used the same as Spinach.

Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 35c; 1 lb., \$1.00.

Snowball The finest white-fleshed, ball-shaped early table turnip. Bulbs small, smooth and round, with clear white skin and sweet, crisp flesh.

Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 35c; 1 lb., \$1.00.

White Egg. Rather small egg-shaped; a quick grower; good keeper and excellent either as an early or late variety. The flesh is very sweet, firm and mild, never having a rank or strong taste.

Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 35c; 1 lb., \$1.00.

TURNIPS (Postpaid)

CULTURE. For summer use sow early in spring in light, rich soil, in drills one and one-half to two feet apart according to the size of the variety and cover one-half inch deep, or sow broadcast, but in either case be sure to have the ground rich and freshly stirred. Thin early and keep free from weeds so that the young plants will not be checked in growth. Any over-crowding will result in rough and poorly flavored roots. Sow for fall from the middle of June to the first of August and in the manner given for spring sowing.

YELLOW VARIETIES

Alaska. Medium size, early. Flesh yellow, tender, very pleasant, rounded, uniform in size and shape.

Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 60c; 1 lb., \$1.50.

Purple Top Yellow Aberdeen. Medium to large, globe-shaped with yellow flesh of fine quality; matures late so should be sown early; keeps well and is a good variety for stock.

Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 35c; 1 lb., \$1.00.

Golden Ball or Orange Jelly. One of the most delicious and sweetest yellow-fleshed turnips. Small but firm, hard, and excellent flavor. Keeps well and is superior as a table variety.

Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; 1 lb., \$1.25.

Petrowski. A most distinct variety of early maturity. The flat roots average two and a half to three inches in diameter, and the skin is a rich, deep orange-yellow, very smooth and entirely free from rootlets. The firm flesh is fine grained, crisp, and of fine flavor.

Pkt., 5c; oz., 20c; $\frac{1}{4}$ lb., 60c; 1 lb., \$1.50.

RUTA BAGAS OR SWEDES

Improved American Purple Top. The leading standard variety, being very distinct in type, attaining a wonderfully large size. The flesh is very firm, superior in every way, valuable alike for table and stock feed.

Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 35c; 1 lb., \$1.00.

Yellow Swede. Roots oblong, reddish color above ground but yellow underneath. This sort is hardier than the common turnip and will keep solid until spring.

Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 35c; 1 lb., \$1.00.

White Sweet Russian. Excellent for table or stock. It grows to a very large size; flesh white, solid and rich; an excellent keeper.

Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 35c; 1 lb., \$1.00.

HOW TO MAKE A HANDSOME VELVETY LAWN

The best time to make a lawn, we consider, is either in late summer or spring.

Spade the soil deep and cultivate well. If the soil is sour use hydrated lime, about 100 lbs. to 1000 sq. ft., applying it preferably two to four weeks before seeding. Commercial fertilizer should be scattered on evenly and well raked in just before the seed is sown. In sowing the seed be careful to spread it evenly. The best method is to take half of the seed and sow it walking across the lawn, then take the other half and sow it walking lengthways. After the seed is on do not rake, but roll it in. If a roller is not available, tamp the seed into the ground with the back of the shovel. Sprinkle lightly, being careful not to float the seed.

While the seed is germinating and the grass is young extra care should be used, especially during dry weather, that the ground be kept moist. It should never be allowed to dry out but cannot be soaked, so it is necessary to watch it very closely and sprinkle whenever necessary, sometimes as often as three times a day.

Commence cutting as soon as the grass is long enough, and cut often. This will both thicken the grass and make it finer. If cut often the clippings may be left on the ground for fertilizer. They will not be noticeable unless the grass is allowed to grow too long between cuttings.

After the lawn is established it should be thoroughly soaked about once a week during the dry weather. When watering, saturate the ground thoroughly and it will not be necessary to do it so often.

WASHELLI LAWN GRASS

This is the grass that is used exclusively at Washelli Cemetery and has produced all of their beautiful lawns. It is the best mixture of grasses for the purpose of quickly producing a fine, lasting lawn. Each variety of grass is there for a special purpose and nothing but the very highest grade of clean seed is used. It makes a rich, velvety, dark green turf that, when properly cared for, improves with age and stands almost any amount of wear. It starts quickly and makes a good lawn the first season. Sow 1 lb. to every 200 square feet. Subject to market change.

WASHELLI LAWN GRASS (Ask for price on large quantity. Postage extra)---1 lb. 65c; 10 lbs. \$6.40; 100 lbs. \$63.00.

EVERGREEN LAWN GRASS

A special blend of deep rooted, fast growing, turf forming grasses, somewhat coarser than Washelli. It starts quickly and grows well, even on poor soil and for those who want a quick permanent lawn at a minimum price this is the best. Sow 1 lb. to every 200 square feet.

EVERGREEN LAWN GRASS (Subject to market change. Postage extra)----1 lb. 35c; 10 lbs. \$3.45; 100 lbs. \$34.00.

SHADY LAWN GRASS

It is usually quite hard to obtain a good lawn under trees or in other shady places. This grass, however, will grow well and make a thick green turf in places where ordinary grass will not thrive for want of light. Sow 1 lb. to every 150 square feet. Ground that is densely shaded is very apt to be "sour" and as a rule the best results are obtained when an application of Hydrated Lime of about 100 lbs. to 1000 square feet is made before seeding.

SHADY LAWN GRASS (Subject to market change. Postage extra)-----1 lb. \$1.00; 10 lbs. \$9.50; 100 lbs. \$94.00.

MALMO'S GOLF LINKS LAWN MIXTURE

This mixture is composed of Creeping Bent and other high grade, fine-bladed grasses best adapted to withstand the frequent close cutting and hard usage required for the Fairways. White Clover not being suitable for this purpose is not included in the mixture. It is of the greatest importance that only such grasses as will fulfill all requirements are used and by a careful study of this subject we are able to offer a superior mixture for golf grounds. Subject to market change.

MALMO'S GOLF LINKS LAWN MIXTURE (Ask for price on large quantity; postage extra).
1 lb., 75c; 10 lbs., \$7.00; 100 lbs., \$62.50.

LAWN MIXTURES—Continued**MALMO'S SPECIAL PUTTING GREEN MIXTURE**

By close observation we have found the Bent Grasses to be particularly well adapted for use in establishing the Putting Green, owing to the smooth, thick turf they form which withstands the constant close cutting and trampling. This mixture of Seaside Bent and various other Bent Grasses is made up of seeds of the highest grade only. Subject to market change.

MALMO'S SPECIAL PUTTING GREEN MIXTURE (Ask for price on large quantity. Postage extra.)
1 lb., \$2.25; 10 lbs., \$21.50; 100 lbs., \$195.00.

CULTURES FOR LEGUMES

Alfalfa, Clover, Field Peas, Vetch, Beans, Peas, Sweet Peas
HUMOGERM—Garden Size 25c; ¼ bushel 35c; ½ bushel 60c; 1 bushel \$1.00

COMMERCIAL FERTILIZERS

Prices are f. o. b. Seattle docks, railroads, or delivered in the city on regular delivery routes, and are subject to market changes without notice. (Ask for prices in quantity.)

An allowance of 25c per sack of 100 lbs. or 50 lbs. may be deducted for call at store, yard or nursery. Less than 50 lbs. are at call prices. Ask for quantity price.

MALMO'S GARDEN FERTILIZER

Analysis: 2% to 3% Nitrogen as Ammonia, 10% to 15% Phosphoric Acid, 3% to 4% Potash.

The most complete fertilizer for vegetables, fruit, flowers and berries, prepared for the gardener who cannot give the time and labor necessary to treat each individual kind of plants separately. **MALMO'S GARDEN FERTILIZER** is made principally of pure, ground bone meal, dried and pulverized sheep manure, to which is added phosphate, potash and nitrogen, thus containing the necessary ingredients to supply the average percentage of available plant food required by the greatest number of crops at the least expense. It yields this plant food only as the plants require it and is therefore effective and lasting.

5 lbs., 25c; 10 lbs., 45c; 20 lbs., 85c; 50 lbs., \$1.75; 100 lbs., \$3.25.

HIGH GRADE FISH FERTILIZER

Analysis: 8% to 10% Nitrogen as Ammonia; 10% to 15% Phosphoric Acid.

A high quality ground and dried fish fertilizer, the best for quick results in the growing of roses, or the making and renewing of lawns or other uses where production of luxuriant foliage is desired. Its wonderful rapid action is due to the availability of its high nitrogen content, which is yielded to plant life as fast as it can be assimilated without the danger of over-stimulation or burning attending the use of nitrate of soda. For use on Flowers and Vegetables: Spread evenly over the ground as far out as the roots extend. Cultivate well; keep from stems of tender plants. For LAWNS, apply broadcast and rake in well, 100 lbs. for 1,500 sq. ft.; on old lawns use 100 lbs. to 3,000 sq. ft. Pulverize all lumps, wet with coarse spray.

5 lbs., 35c; 10 lbs., 60c; 20 lbs., \$1.10; 50 lbs., \$2.75; 100 lbs., \$4.75.

FERTILIZERS—Continued

Prices are f. o. b. Seattle docks, railroads, or delivered in the city on regular delivery routes, and are subject to market changes without notice. (Ask for prices in quantity.)

SEA-PRO-CO**GRASS FOOD FISH FERTILIZER**

Fish Fertilizer. Good for lawns, roses, etc.

Analysis: 7% to 10% Nitrogen as Ammonia, 2% to 3% Phosphoric Acid.

5 lbs., 35c; 10 lbs., 60c; 20 lbs., \$1.00; 50 lbs., \$2.50; 100 lbs., \$4.50.

An allowance of 25c per sack of 100 lbs. or 50 lbs. may be deducted for call at store, yard or nursery. Less than 50 lbs. are at call prices. Ask for quantity price.

PURE ANIMAL BONE MEAL

Analysis: 2½% to 3% Nitrogen as Ammonia, 22% to 45% Phosphoric Acid.

A white meal made from fresh animal bone. Valuable as a fertilizer where a large amount of phosphoric acid is required, combining also the advantage of a nitrogen content. It releases plant food continually through slow decomposition, making it desirable for use in rose beds and other permanent plantings.

5 lbs., 30c; 10 lbs., 50c; 20 lbs., 90c; 50 lbs., \$2.25; 100 lbs., \$3.75.

An allowance of 25c per sack of 100 lbs. or 50 lbs. may be deducted for call at store, yard or nursery. Less than 50 lbs. are at call prices. Ask for quantity price.

BONE MEAL, COMMON. A meal of lower analysis than above, 100 lbs., \$3.00.

BLOOD AND BONE

Analysis: 4% to 6% Nitrogen as Ammonia, 7% to 9% Phosphoric Acid.

Blood and Bone is composed of waste animal matter, yielding its plant food quickly when spread over the soil. It is, therefore, valuable for quick growing foliage crops, 500 to 1,000 lbs. per acre.

5 lbs., 30c; 10 lbs., 50c; 20 lbs., 90c; 50 lbs., \$2.00; 100 lbs., \$3.25.

An allowance of 25c per sack of 100 lbs. or 50 lbs. may be deducted for call at store, yard or nursery. Less than 50 lbs. are at call prices. Ask for quantity price.

SHEEP MANURE

Analysis: 1½% to 2% Nitrogen as Ammonia, 1% Phosphoric Acid, 2% to 2½% Potash.

The sheep manure we offer and recommend is kiln dried and finely ground, practically free from germinable seeds and moisture.

20 lbs., 50c; 50 lbs., \$1.25; 100 lbs., \$2.00; 500 lbs., \$9.00; 1000 lbs., \$16.00; per ton, \$30.00.

An allowance of 25c per sack of 100 lbs. or 50 lbs. may be deducted for call at store, yard or nursery. Less than 50 lbs. are at call prices. Ask for quantity price.

MURIATE OF POTASH

Analysis: Potash 52%.

This is a very strong, quick acting fertilizer and is the best form of Potash available for ground that is lacking in this element. It is packed 200 lbs. in a bag and is generally used at the rate of about 1 bag to the acre.

5 lbs., 35c; 10 lbs., 60c; 20 lbs., \$1.00; 50 lbs., \$2.25; 100 lbs., \$4.00; 1 sack (200 lbs.), \$7.25.

An allowance of 25c per sack of 100 lbs. or 50 lbs. may be deducted for call at store, yard or nursery. Less than 50 lbs. are at call prices. Ask for quantity price.

NITRATE OF SODA

13% Nitrogen.

Nitrate of Soda is entirely soluble, like salt and should be used frequently in light dressings for best results; 150 to 200 lbs. per acre.

4 lbs., 25c; 10 lbs., 50c; 20 lbs., \$1.00; 50 lbs., \$2.15; 100 lbs., \$4.00; 200 lbs., or more, \$3.75 per 100 lbs.

An allowance of 25c per sack of 100 lbs. or 50 lbs. may be deducted for call at store, yard or nursery. Less than 50 lbs. are at call prices. Ask for quantity price.

SUPER-PHOSPHATE

17% to 22% Phosphoric Acid.

Super-Phosphate furnishes a quickly available supply of phosphoric acid and is especially desirable as a top dressing for grain and fruit.

300 to 500 lbs. per acre.
10 lbs., 30c; 20 lbs., 50c; 50 lbs., \$1.10; 100 lbs., \$1.75.

An allowance of 25c per sack of 100 lbs. or 50 lbs. may be deducted for call at store, yard or nursery. Less than 50 lbs. are at call prices. Ask for quantity price.

GYPSON OR LAND PLASTER

For sweetening the soil, freeing plant food and supplying sulphur. 50 lbs., \$1.00; 100 lbs., \$1.75.

An allowance of 25c per sack of 100 lbs. or 50 lbs. may be deducted for call at store, yard or nursery.

HYDRATED LIME

Pure hydrated lime, best adapted for general use, including lawns, neutralizes the acid of the soil making it possible for fertilizer to accomplish maximum results. This form is quick and efficient. An application will attain the same results as twice the quantity of Ground Lime Rock.

20 lbs., 50c; 50 lbs., \$1.00; 100 lbs., \$1.75.

An allowance of 25c per sack of 100 lbs. or 50 lbs. may be deducted for call at store, yard or nursery. Less than 50 lbs. are at call prices. Ask for quantity price.

GROUND LIME ROCK

Used for sweetening the soil, but on account of slower action must be used in larger quantities than Hydrated Lime. One ton or more per acre required, according to extent of acidity of the soil. Indispensable to success in growing Alfalfa on the west side of the Cascade Mountains.

100 lbs. sack, \$1.25.

An allowance of 25c per sack of 100 lbs. may be deducted for call at store, yard or nursery.

"TORO" AGRICULTURAL SULPHUR

No plant can grow to maturity without the element of sulphur. "Toro" Brand is especially prepared to make these elements available for the plants and to act upon other chemicals naturally in the soil, transforming them into plant food. Applications of from 100 to 500 lbs. of "Toro" Sulphur per acre have, in many cases, doubled the yield.

3 lbs., 25c; 5 lbs., 40c; 10 lbs., 75c; 20 lbs., \$1.35; 50 lbs., \$3.50; 100 lbs., \$6.25.

STIM-U-PLANT

A concentrated fertilizer in tablet form, especially convenient for potted plants, window boxes, etc. May be used either in tablet form or dissolved in water.

30 tablets in pkg., 25c.

GARDEN TOOLS AND SUPPLIES

Multitool with Blade No. 2

THE MULTITOOL

Takes half the labor out of hoeing. One man can accomplish more than two with the old-fashioned hoe. With an extra handle two persons can be equipped with one outfit.

No. R 1555. Budding knife. White bone handle, high grade steel	1.50
No. 21122. Budding knife. Blade of finest razor steel. Ivory tipped ebony handle ..	1.75
No. 2944. Same as above except no tip	1.25
No. 2414. Combination pruning, budding and grafting knife. 3 blades, fine razor steel ..	2.25

Grafting Wax. See page 116.

Pruning Compound. See page 116.

GRASS HOOKS

No. 3. Village Blacksmith. Offset handle, narrow steel blade. Finest material. 65c.

Little Giant Grass Hook. Offset handle, wide steel blade securely bolted on. 75c.

LAWN MOWERS

Great American High Wheel

We consider this the finest lawn mower made. Has 10-inch wheels, ball bearing, patent self sharpening knife, five crucible steel blades. Parts are interchangeable and can always be obtained. Carries a factory guarantee.

15-inch cut	-----	\$22.00
17-inch cut	-----	24.50
19-inch cut	-----	27.00
21-inch cut	-----	29.50

Ambassador Ball Bearing

A high grade, high wheel lawn mower having five blades. The gears are raised from the ground and completely housed to prevent clogging. The revolving cutter is carried on ball bearings and is easily adjusted. Carries a factory guarantee.

14-inch cut	-----	\$15.00
16-inch cut	-----	16.00

Greenwood Lawn Mowers. This machine was built to meet severe conditions and give the user satisfaction and yet sell at a moderate price. Has three blades, 9-inch wheels, adjustable brass bushed journals. The knives are full sized, heavy and will not spring. The bottom knife is adjustable but will not jar loose.

12-inch cut	-----	\$11.00
14-inch cut	-----	12.00

GRASS CATCHERS

Canvas on metal frame, easily attached.

No. 508.	12 to 16 in.	-----	\$1.50
No. 10G.	12 to 18 in.	-----	2.00
No. 2G.	18 to 22 in.	-----	2.25

EDGERS

"The Pines" Lawn Edger.
Disc cutting wheel with wooden rollers.-----\$1.65

No. 40. Turf Edger.-----\$1.40

LAWN SPRINKLERS

Rain King.
A brass sprinkler having each nozzle independently adjustable—fine or coarse, slow or fast. Designed to meet every requirement. \$3.50.

Rotary. Three brass arms, head, stem and base enameled. Arms will turn with very low pressure. \$2.25.

Cyclone. Same as Rotary but of more solid base and construction. \$3.00.

Hartford. Blake heads on pipe with a spear point to stick in the ground, holding the sprinkler upright. Throws a fine even spray.

2 feet	-----	\$1.20
4 feet	-----	1.40
6 feet	-----	1.60

Blake. Heads only, $\frac{3}{8}$ or $\frac{1}{2}$ in. pipe thread. 50c.

Ring Fountain.
Sheet brass, throws a fine mist over a large area. Works best under a high pressure. .90c.

Rainboy Nozzle. The finest cast brass sprinkling nozzle for lawn and garden; can be regulated for fine, medium or coarse spray or for a solid stream. 85c.

Mistic Nozzle. Similar to the Rainboy but without as fine a regulation. 50c.

Hot House Nozzle.
Heavy cast brass, polished 3-inch flat face. Throws a large quantity of water. \$1.10.

GARDEN HOSE

Defiance. Extra heavy rubber, 7 ply. $\frac{5}{8}$ in.	
50 ft. with couplings-----	\$9.75
Star. Corrugated rubber. $\frac{5}{8}$ in.	
50 ft. with couplings-----	7.50
25 ft. with couplings-----	4.00
Antelope. Rubber hose, 5 ply. $\frac{5}{8}$ in.	
50 ft. with couplings-----	6.50
25 ft. with couplings-----	3.75
Red Line. Cotton hose. $\frac{5}{8}$ in.	
50 ft. with couplings-----	5.00
25 ft. with couplings-----	2.75

**HOSE REEL**

Reeleezy. Improved self balancing, all steel reel. Easily handled. Each--\$3.00

BAB VELVET SPRAY

A movable Lawn Sprinkling System

Attach to sections of hose or pipe on top of the ground with several sprinklers 10 feet or more apart, either in a straight line or in several parallel lines connected to the water system, making it easy to move from place to place as needed.

Sprinklers. Including union-----	\$2.00
Sprinkler Heads, only. For use on pipe sprinkler system -----	.60

HOSE COUPLINGS AND MENDERS

No. 300. Brass couplings. All sizes.	
Per pair -----	.25
No. 310R. Nickel plated couplings. All sizes. Per pair -----	.35
No. 350. Hose menders. Each-----	.12 1/2

SPRINKLING CANS

No. 514. 4 qt. galvanized-----	\$.95
No. 518. 8 qt. galvanized-----	1.20
No. 522 12 qt. galvanized-----	1.50
Wotherspoon. For Florists. Heavy, galvanized; extra long spout with two copper faced sprinkling heads, one fine, one coarse. Shipping weight 10 lbs.	
8 qt. -----	6.75
10 qt. -----	7.25

TRAPS

Out o' Sight Mole Trap. The surest trap for moles. Has a strong spring that will always close. Full directions with each trap. \$1.25.

Victor Beaver Trap -----	50c
---------------------------------	-----

Bab Multiple Sprinklers on Hose at Volunteer Park, Seattle

PANSY PLANTS

From Malmo's Selected Seeds—The best that can be obtained.

LARGE PLANTS IN BUD but not in bloom. After April 1st, doz., 60c; 100, \$4.50; postpaid.
LARGE PLANTS IN BLOOM. After April 1st, doz., 75c; 100, \$5.00.

PLANET JR. GARDEN TOOLS

No. 3 HILL and DRILL SEEDER

Plants in hills 4, 6, 8, 12 or 24 inches apart, in drills in the proper thickness, at just the right depth and economically. Special opening plow and coverer can be furnished for sowing onion seed for sets. No. 3 Hill and Drill Seeder; seed capacity 3 quarts. \$18.50.

No. 5 HILL and DRILL SEEDER

Same as No. 3 except capacity, which is 5 quarts. \$21.00.

No. 4 HILL and DRILL SEEDER and SINGLE WHEEL HOE COMBINED

Sows seed in hills or drills, accurately, at the proper depth, and economically. Opens the furrow, drops the seed, covers them, packs the soil, and marks the next row all at one operation. As a Single Wheel Hoe all necessary cultivating, hilling, plowing, etc., can be done with the cultivating attachment. Equipment, one pair of six-inch hoes, three steel cultivator teeth, one large garden plow. \$19.00.

No. 4-D SEEDER ONLY

Same as the No. 4, less cultivating attachments. \$15.25.

No. 25 HILL and DRILL SEEDER, DOUBLE and SINGLE WHEEL HOE COMBINED

Drops seed in hills 4, 6, 8, 12 or 24 inches apart and plants in drills the same as the No. 4. The Double Wheel Hoe straddles the row until the plants are 20 inches high, then as a Single Wheel Hoe it does all necessary cultivating work between rows. The equipment, one pair of six-inch hoes, four cultivator teeth, one large garden plow; capacity 2½ quarts seed. \$22.50.

No. 12 DOUBLE and SINGLE WHEEL HOE

Equipment, one pair of six-inch hoes, four steel cultivator teeth, one pair garden plows. The No. 12 is the best combination of Double and Single Wheel Hoe. As a Double Wheel Hoe the rows can be straddled until the plants are 20 inches high and then, used as a Single Wheel Hoe, cultivation is done between rows. The assortment of cultivating attachments permits one to do all the necessary cultivating, plowing, drilling, furrowing, etc., necessary in the garden. \$11.50.

No. 17 SINGLE WHEEL HOE

Equipment, one pair of six-inch hoes, three steel cultivator teeth, one large garden plow. The No. 17 is an effective tool, with which it is possible to do all necessary plowing, hilling, furrowing, etc. With this tool it is possible to do in one day's time that which would require several days with the hand hoe. \$8.25.

No. 17½ SINGLE WHEEL HOE

Same of the No. 17 except equipment does not include the garden plow. The six-inch hoes are the most useful attachments. The three cultivator teeth also do fine work. By putting the wheel on the outside of the wheel arm it is possible to do both sides of a row at one time. \$7.25.

No. 119 GARDEN PLOW and CULTIVATOR

Equipment, one 1¼-inch cultivator steel, one 4-inch cultivator steel, one large garden plow, one reversible scuffle blade and three-tooth cultivator; 24-inch steel wheel. For those who desire a high wheel garden cultivator this tool will be just what they need. Where the ground is rough this high wheeled hoe runs easier. The assortment of cultivating attachments makes it possible to do all the necessary plowing, furrowing, hilling and cultivating. \$5.50.

POTS, TUBS and MISCELLANEOUS GARDEN SUPPLIES

POTS

Clay Flower Pots. Prices are f. o. b. our store. Packed for shipping add 20 per cent. Minimum packing charge 50 cents. While we take every precaution to pack pots so that they will arrive at destination safely we do not guarantee against breakage in transit and will not replace any pots that are broken on arrival. We advise against shipping by parcel post.

For large, thick, single glass in greenhouses, skylights, etc. Pkg. 1000 \$1.00

SPRAY PUMPS

HAND SPRAYERS

Made of heavy tin, suitable for spraying small plants and rose bushes. Capacity about 1 quart; 50c each.

CONTINUOUS HAND SPRAYER

Made of heavy galvanized iron, and if properly cleaned after using, will last many times longer than the ordinary tin sprayer. Throws a continuous spray and has an extra nozzle for spraying at an angle. \$1.25 each.

ALL BRASS CONTINUOUS

Throws a steady spray. All parts removable for cleaning, and being made entirely of brass, will outlast any other hand sprayer. \$1.50 each.

STANDARD SPRAY PUMPS

Double acting, all brass, continuous. Pump is held in both hands and suction hose is dropped into a bucket. \$5.50 each.

No. 131 BLOW POWDER SPRAYER

Reservoir, Mason fruit jar. This sprayer is easy to operate the size of the spray being regulated by the operation of the plunger. \$1.00.

WHEELBARROW SPRAYERS

No. 85-A

No. 40. 18-gallon tank made of heavy galvanized steel, reinforced with iron bands; a standard pump with an air chamber fastened to the tank by a spider casting. Frame made of steel tubing well braced. Tank easily removed. Single wheel 18 inches, with 2½ inch face. Ten feet of ½-inch, 5-ply hose, 4 foot spray rod and shut-off nozzle. \$28.00.

No. 40-A. Same as above, but has an air pressure tank mounted on the spider. Sufficient pressure may be attained and considerable spraying done with one pumping. Has pressure gauge and drain plug. \$40.00.

No. 85-A. Same as No. 40-A, except that it has two wheels and the handles are connected at the rear. This makes it narrower (18 in.), which permits its use in greenhouses, where the aisles are narrow, and allows it to be moved with one hand. \$47.00.

NO. 185 COMPRESSED AIR SPRAYER

A small compressed air sprayer, holds about 1 gallon. Constructed same as No. 10, except that the discharge is through a pipe. The nozzle is brass and has a strainer. \$4.00 each.

NOS. 10 AND 15 COMPRESSED AIR SPRAYERS

The No. 10 tank is made of galvanized steel, the No. 15 of brass; holds 3½ gallons. Seam closely riveted and all joints well soldered and tested.

Pump, brass, with bronze ball valve. One-half inch 5-ply hose attached to tank with standard brass hose connection. Filling cap easily removed without a wrench. Angle nozzle, automatic shut-off type, brass, with strainer, fine, medium and course discs.

No. 10 Galv. tank----\$7.00

No. 15 Brass tank---- 9.00

ALL BRASS BUCKET PUMP

All parts except handle and foot rest made of brass. Gives a strong, steady pressure on the nozzle with little exertion. Comes with 2 feet of hose and adjustable nozzle. Will handle whitewash as well as spray materials. \$5.00 each.

D. & B. No. 25 COMPRESSED AIR SPRAYER

The tank is made of reavy galvanized steel, seams closely riveted and all points well soldered and tested. Capacity 1½ gallons. With brass extension and shut off, \$4.50.

SPRAY NOZZLES and EXTENSIONS

Bordeau	-----	\$1.00
Utility Straight Nozzle. For No. 95 Bucket Pump	-----	1.00
Utility Automatic Nozzle. For Nos. 10 and 15 Compressed Air Sprayers and Nos. 40 and 85 Wheelbarrow Sprayers	-----	1.75
Spray Hose Pipe Extensions. Galvanized iron, threaded to fit hose and nozzle. ¼ in. pipe.		
4 ft. length	-----	.60
6 ft. length	-----	.90
8 ft. length	-----	1.20

SPRAY MATERIAL

If you do not know what to spray with, write us giving all the information that you can and we will be glad to advise you what to use. Prices subject to market change. Postage extra. Poisons cannot be mailed.

Aphoil. A light miscible oil spray for summer use to control many sucking insects such as the Green, Purple and Woolly Aphis. 1 qt., 65c; ½ gal., \$1.00; 1 gal., \$1.75.

Arsenate of Lead. For spraying trees and shrubs or plants against the attacks of leaf-biting or leaf-eating insects. Can be combined with other sprays. Use 1 to 2 lbs. to 50 gallons of water; 1 to 2 tablespoonfuls to a gallon. Poison, not mailable. ½ lb., 30c; 1 lb., 55c; 5 lbs. \$2.25; 25 lbs., \$10.00.

Nicotine Sulphate. (Hall's Nicotine Sulphate) (Black Leaf 40). Poison, cannot be mailed. A concentrated solution of nicotine sulphate containing 40 per cent nicotine. Fish oil soap mixed in this solution makes it more effective and is necessary for perfect results. 1-oz. bottle, 35c, makes 5 gals. spray; ½-lb. can, \$1.25, makes 47 gals. of spray; 2-lb. can, \$3.50, makes 240 gals. spray; 10-lb. can, \$14.50, makes 1000 gals. spray. Full instructions with each can.

Bluestone. 1 lb., 15c; 10 lbs., \$1.40.

Bordeaux Mixture, Dry Powdered. Quickly dissolved in water. Used for fungus diseases such as mildew, potato scab, tomato blight, etc. Can be used in combination with Arsenate of Lead or Paris Green. 8 lbs. to 50 gals. of water. 1-lb. can, 35c; 5-lb. can, \$1.50; 25-lb. drum, \$4.75. Poison, cannot be mailed.

Carco Vegetable Spray for root maggots, cutworms, scale, mildew, etc. ½ pt., 35c; 1 pt., 60c; 1 qt., \$1.00.

Crest Spray. A vegetable oil spray for scale, aphids and root maggots. Will not injure foliage or tender plants. May be used either as a dormant or summer spray. 1 gallon makes from 50 to 100 gallons when diluted. 1 pint, 35c; 1 quart, 60c; ½ gal., \$1.00; gal., \$1.75; 5 gals., \$7.50.

Cyanogas (Calcium-Cyanide). Especially used for exterminating moles, gophers and rats. Care should be taken in handling as this is very poisonous to people as well as animals. Poisons cannot be mailed. 1 lb. can, 60c.

Dormoil. Miscible oil spray for dormant use. The most effective spray prepared especially for use during the dormant season to control the San Jose scale and other scale insects. 1 qt., 65c; ½ gal., \$1.00; 1 gal., \$1.75.

Fish Oil Soap. 1 lb., 15c; 10 lbs., \$1.25.

Formaldehyde. Poison, cannot be mailed. Kills scab and prevents blight on potatoes. 1 pint makes 30 gallons. Soak seed potatoes in solution for two hours. ½ pint, 50c; 1 pint, 90c.

Hellebore. For currant worms and chewing insects. ½ lb., 35c; 1 lb., 50c.

Kerosene Emulsion. Dormant spray especially effective against scale and aphids. 1 pt. can, 35c; 1 qt. can, 65c; ½ gal. can, \$1.25.

Dry Lime Sulphur. Lime and sulphur solution in a dry powdered form. Instantly soluble. Does everything that lime sulphur solution will do. Is easier to handle and will keep indefinitely if container is closed tight. It weighs about one-sixth as much as the liquid, so will save in transportation and handling charges. 1 lb. makes 5 gallons. 1 lb., 30c; 5 lbs., \$1.25; 10 lbs., \$2.00; 25 lbs., \$3.75; 50 lbs., \$7.00; 100 lbs. \$11.50; 200 lbs., \$20.00.

Lime Sulphur Solution (Liquid). Dilute 1 part to 10 parts water. (Cannot mail.) 1 gal., \$1.00.

Mag-O-Tite. For the prevention of root maggots. 2 lbs., 25c; 4 lbs., 50c; 8 lbs., 75c.

Paris Green. 8 lbs. to 50 gals. of water. ¼ lb. pkg., 20c; ½ lb. pkg., 35c; 1 lb. can, 55c; 4 lb. pkg., \$2.00; 14 lb. pkg., \$6.00; 100 lb. drum, \$35.00. Poison, cannot be mailed.

Slug Shot. 1 lb., 25c; 5 lbs., \$1.25.

Sulphur. Powdered. Lb., 5c; 100 lbs., \$3.25.

Rose Spray. Kills mildew and aphids on rose bushes and other plants. Pt., 35c; qt., 65c.

Tree Tanglefoot. 1 lb. can, 60c.

Tree White. For coating trees to prevent sunscald and gumming. 5 lb. pkg., 65c.

Hall's Nicotine Sulphate (Liquid). 40% Nicotine. For outside spraying. An efficient insecticide for plant lice and similar soft-bodied insects attacking plants and trees. 1-oz. bottle, 35c; ½-lb. can, \$1.25; 2-lb. can, \$3.50; 10-lb. can, \$14.75.

Hall's Free Nicotine Solution (Liquid). 40% Free Nicotine. Prepared especially for fumigating and spraying in greenhouses and general inside work. 8-lb. cans, \$15.00; 2-lb. cans, \$4.25; ½-lb. cans, \$1.40.

HALL'S NICOTINE FUMIGATOR

Effective and economical for fumigating greenhouses. A specially prepared tobacco powder, treated to insure proper burning qualities, saturated with pure nicotine—12½% guaranteed. Packed in airtight tins.

Easy to Use

A measure is enclosed in each tin. Fill measure, press in gently and empty the cone of fumigator on a tin plate.

Light cone at top. It will light easily, burn evenly, and will be consumed in five minutes. The cone should be placed at least 12 inches above the floor. One cone will fill 7000 cubic feet.

1 lb. cans, \$1.25; 2½ lbs., \$2.50; 10 lbs., \$8.50.

For maximum yield or luxuriant beauty the garden must have proper plant food.

Malmo's Garden Fertilizer

supplies all ingredients necessary to maximum production

SPRAYING TABLE

By **ARTHUR FRANK**, Plant Pathologist, Western Washington Experiment Station, Puyallup, Washington

Proper spraying is the most effective way to prevent and control diseases and pests on trees and the cheapest insurance against crop failure. Trees must be kept clean and well cared for or they become a harbor for pests and a menace to other plants. Starting during the dormant season, it is best to prune and then spray, following a systematic program as set forth in the tables below:

APPLES and PEARS		
Time of Application	Pest or Disease	Spray Materials and Strength
(1) Dormant Spray before buds come out in the spring.	Oyster shell scale. Aphis eggs. Red spider eggs. Moss and lichens. Scab and mildew.	Liquid Lime Sulphur, 1 gal. to 8 or 10 gals. of water.
(2) "Pink" Spray when bloom buds show pink, but before they open.	Aphis. Bud moth worms.	Lime Sulphur Solution, 1 gal. to 35 gals. water. Add Black Leaf 40, or Hall's Nicotine, 1-5 pt. to 35 gals. or 1-3 pt. to 50 gals.
(3) Petal Fall Spray, also called Calyx Spray, just as last petals fall.	Scab and mildew. Coddling moth.	Add Lead Arsenate, 1½ oz. to 35 gals. water, or 1 lb. to 50 gal.
(4) Two Week Spray, 10 days or two weeks after petals fall.	Scab and mildew. Tent caterpillars.	Lime Sulphur, 1 gal. to 40 gals. water. Add Lead Arsenate, 1 lb. to 50 gals.
(5) Thirty Day Spray two weeks after above.	Scab and mildew.	Lime Sulphur, 1 gal. to 40 gals. water.
(6) Fall Application first to middle of September before fall rains.	Apple anthracnose.	Bordeaux Mixture.

CHERRIES

Same as for Apples and Pears.		
(1) Dormant.	Brown Rot. Aphis. Bud moth worms.	Lime Sulphur, 1 gal. to 40 gals. water. Add Black Leaf 40, ¼ pt. or Hall's Nicotine. Add Lead Arsenate, 14 oz.
(2) Spring Spray when bloom buds show white but before they open.	Brown Rot. Aphis. Tent caterpillars.	Lime and Sulphur, 1 gal. to 50 gals. Add Black Leaf 40, 1-3 pt. Add Lead Arsenate, 1 lb.
(3) After petals fall.	Brown Rot. Slugs.	Lime Sulphur, 1 gal. to 50 gals. water. Add Lead Arsenate, 1 lb.
(4) Two weeks later.		

PLUMS and PRUNES

Same as for Apples and Pears.		
(1) Dormant.	Brown Rot. Aphis and Leaf Hopper. Bud Moth.	Lime Sulphur, 1 gal. to 50 gals. water. Add Black Leaf 40, or Hall's Nicotine, 1-3 pt. to 50 gals. Add Lead Arsenate, 1 lb. to 50 gals.
(2) Spring Application, as bloom buds show white but before they open.	Brown Rot. Tent caterpillars.	Lime Sulphur, 1 gal. to 50 gals. water. Add Lead Arsenate, 1 lb. to 50 gals.
(3) After petals fall.	Brown Rot.	Lime Sulphur, 1 gal. to 50 gals. water.
(4) Two weeks later.	Brown Rot.	Lime Sulphur, 1 gal. to 50 gals. water.
(5) About one month before fruit is ripe.

Success In Transplanting

An evergreen ready for delivery showing method of packing at our nursery

trees and shrubs has its foundation in the care given them in the nursery. Our stock is transplanted often to insure a fibrous root system close to the plant.

All evergreens are carefully dug with a solid ball of soil which is wrapped with burlap and properly tied to prevent breaking. The rich soil in our nurseries is especially adapted to this method of handling, thus allowing the transplanting of our evergreens at any time with the utmost of safety.

MALMO & COMPANY

CHOICE STOCK—Properly Grown—Properly Dug—Properly Packed

*This head was grown from our seed.
Our special strain is popular with mar-
ket gardeners who ship hundreds of carloads East each year.*

A Bigger Store - To Better Serve You
